For the Hardest Kind of Workthe McCORMICK-DEERING Model T-40

TERE is good news for crawler tractor users who need heavy-duty performance at the lowest possible cost per hour. International Harvester engineers have adapted the Diesel principle to TracTracTor operation. No auxiliary engine of any kind is used. The International Harvester Diesel engine is characterized by remarkable ease of starting and quick conversion to low-grade fuel. In fact, the shift from gasoline to Diesel fuel is almost entirely automatic.

Using low-grade fuel you can now couple exceptional economy of operation with the economy of maintenance for which TracTracTors are celebrated.

Ask us for complete details concerning the new McCormick-Deering Diesel TracTracTor.
