CHESTERVILLE NOTES.

Emmanuel M. E. Church South, Sunday School at 10; preaching at 11; Epworth League at 7.

Trinity M. E. Church South, Millington: Sunday-school at 2, preaching at 3, League at 7, followed by short address. Thursday night service at 7.30.

The roads have been impassable for several weeks, and much of them at this time. The fields have been used, but since the rain they have been badly cut up. This is nearly always a damage to the farmer and in the majority of cases could be avoided. Why would it not be a good idea for the community to band together to keep the roads open, independent of any money consideration from the county? As it is everybody wants to travel, but few are willing to come out and break the roads. It shows a lack of public spirit and good old-fashioned generosity. What is the county coming to if white men refuse to do a little work for the public good without a money consideration? If the county had offered a dollar a day for opening roads men enough would have applied to have made a string miles long. Some of the farmers came out with their teams and did what they could, but why let some come while all are just as able to do their part and owe it to themselves and the whole community? May there be a revival of the good old-fashioned spirit of public interest.

Recently there has been a good deal of stealing in the vicinity. About Christmas time Mrs. Effie Spry lost some chickens and hens, and since then several people have had corn stolen from their cribs. On Wednesday night Mr. England had a quantity taken from his crib; in this case the lock was broken. The guilty will probably read this item, and it may be a good thing to go and settle with the parties from whom the corn and chickens were stolen; it might save a term in the Cut, for tracks in the snow and mud and other indications make good evidence.

It is expected now that the free lecture on the "Brownies of Dia Nippon" will be given in Trinity Church, Millington, on the 27th, and in Emmanuel on the 28th of this month. This lecture is for the spread of missionary information concerning Japan. Seventy-eight beautiful slides will be used.

Epworth League at 7 p. m., followed by short sermon. All invited.

Mr. Bordley at McDonogh.

Mr. T. Kemp Bordley, son of Mr. and Mrs. T. S. Bordley, of Chestertown, a teacher in McDonogh School, has been in public print the past week because of a charge of excessive punishment laid against him.

The trouble which brought the matter to a head is said to have occurred last Monday night, when, after finding himself unable to pick out the infractors of some rules from a class of boys, Mr. Bordley is said to have punished about 50 of them. Mr. Bordley stated that it was moderate punishment, but the boys looked upon it in a different light. Five of the lads packed their belongings and returned to their homes in Baltimore. They were Clarence Martin, S. Mohler, Worthington, Takel and Taylor.

After the punishment on Monday night the boys determined to "rush" Mr. Bordley, and, according to the story of the boys, laid in a stock of ammunition in the way of bricks, stones, bottles and other missiles. The attack was to take place at an evening class, but to the astonishment of the boys, some information of the insurrection had been gained by the instructors and instead of Mr. Bordley appearing to teach the class, Professor Moreland himself appeared. This quelled any disturbance which might have taken place.

Mr. Bordley has made the following statement:

"I feel that a terrible injustice has been done to me and the school has been presented in a disagreeable light before the public and before its friends. So far as I have been able to ascertain the boys left school for causes entirely foreign to the whippings they received.

"My opinion is that it was because the lads had just returned from their Christmas vacations at home, where they had been petted and where everything possible had been done for their pleasure. Then, when it came to settling down to the work of studying it came hard. Their minds were more upon the pleasures that had been rather than upon the work to be done.

"I did whip the boys, but I did so with a 'pokey' stick, a form of punishment that has been in vogue at the school ever since the institution has been founded, and in which every teacher indulges.

"A 'pokey' stick is merely a short pine paddle, and the boys are struck on the palms of their hands, and I did not consider that the punishment was unduly severe. There was no animosity. I was perfectly cool and displayed no anger."
