A comb patented by a Maryland woman is made hollow, the ends of the teeth being perforated, to introduce hair tonics or healing lotions to the scalp as the hair is being combed.

The wills of 141 persons connected with the wine and spirit trade in the United Kingdom were proved during the past year. The aggregate net personalty amounted to $20,000,000.

In Spain shoeblacking is mixed with wine instead of water.

Munyon's Paw Paw Pills coax the liver into activity by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no calomel; they are soothing, healing and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munyon's Doctors. They will advise to the best of their ability absolutely free of Charge. MUNYON'S, 53d and Jefferson Sts., Philadelphia, Pa.

PIMPLES

"I tried all kinds of blood remedies which failed to do me any good, but I have found the right thing at last. My face was full of pimples and black-heads. After taking Cascarets they all left. I am continuing the use of them and recommending them to my friends. I feel fine when I rise in the morning. Hope to have a chance to recommend Cascarets." Fred C. Witten, 76 Elm St., Newark, N. J.

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sicken, Weaken or Gripe. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C C C. Guaranteed to cure or your money back. 923

WHY
NATURE'S CREATION SAVES CONSUMPTIVES.
E. D. MORGAN, Hippodrome Building, CLEVELAND, O.

The Philosophy Of Hustling.

The American moves rapidly, but if you should infer from this that he is always in a hurry, you would make a mistake. His fundamental philosophy is that you must be quick sometimes if you do not wish to be hurried always. You must condense, you must eliminate, you must save time on the little things in order that you may have more time for the larger things. He systematizes his correspondence, his office-work, all the details of his business, not for the sake of system, but for the sake of getting through with his work. In his office hangs a printed motto, "This is my busy day." He does not arrive at the railway station 15 minutes before the departure of his train, because he has something else that he would rather do with those 15 minutes. He does not like to spend an hour in the barber shop, because he wishes to get out to his country club in good time for a game of golf and a shower bath afterward. He likes to have a full life, in which one thing connects with another promptly and neatly, without unnecessary intervals. His characteristic attitude is not that of a man in a hurry, but that of a man concentrated on the thing in hand to save time.—Henry Van Dyke, in American Magazine.

On a ride of 1,250 miles at an average of 44 miles a day a Russian calvary officer lost but six pounds, while his horse lost only 45.

THE FARMER'S HOME AND ACRES

Pure Bred Ram.

In a grade flock, the pure-bred ram exerts at least half, and probably more than half of influence on the lambs that he gets. Select a ram that is low set, deep in body, wide of back, and heavily muscled over all parts, especially in the leg of mutton, the highest priced cut in the whole body.—Farmers' Home Journal.

Grass Seeding.

The spring is the best time for sowing nearly all kinds of grasses, and usually the early spring is best. There may be some conditions, however, when it may answer to sow in summer, as when, for instance, the weather is quite moist. The single grasses which come without hand sowing are usually distributed by the winds in the late summer or the early autumn.—Prof. Thomas Shaw.

Young Sows.

The age of breeding young sows has been demonstrated by the Mississippi experiment station. Young sows should not be bred until 1 year old, for a sow cannot make a litter of pigs and grow at the same time, according to their report. Early-maturing breeds attain full size at 8 to 10 months old when properly fed, and are more generally bred before a year old, but breeding too young injures the stamina, and, therefore should be avoided.—Epitomist.

Supplements and Substitutes.

The proper supplementary feeds which balance corn in a ration not only enables the hog to show better results in fattening, but they also make possible a more economical ration. Feeding a hog on corn alone, whatever the form, is a false economy by which the feeder cheats both himself and the hog. Its natural supplements are those which furnish protein and mineral matter, and, if not easily available on the farm are usually purchasable so as to be used at a profit. Some, such as clover, alfalfa and other pasturage, are unquestioned as to their desirable qualities, and others, such as the prepared meat scraps from the great packing houses and known by their trade names of meat meal or tankage, having rapidly come in favor for the large amount of protein they supply. The ash or mineral matter of the corn grain is considered indigestible for swine, and the absence of mineral matter impairs the nutritive process and injures the structure; yet it is neither difficult nor expensive to supply hogs with ashes, salt, coal, charcoal or charred cobs as correctives, with corn.—From Coburn's "Swine in America."

Intensive Farming.

Concentration of effort to a small number of acres means more thorough preparation of the soil, more liberal fertilizing and more thorough and timely tillage. All these things increase the yield of crops and greatly improve the quality of the products. The soil fertility on small farms has more chance to be maintained or increased and intensive cultivation is rendered much easier and more certain to succeed. When the farm is large often there are fields that are allowed to go wild, (rest, it is generally termed) even for a season, the resources of such a farm are not fully taken advantage of. If there are fields from which the soil is being washed by rains and melted snow, and no successful effort made to prevent such waste, the loss thereby is very great.

If the barnyard is so situated that the rains reach and carry away the richest of the manural elements it is another loss, if the stables are inconveniently arranged, it's a time-waster; if the cattle have no barnyard shed, and there are stacks of staw rotting away in the field; if the orchard has become unsightly with dead and broken branches, and there is no new, thrifty orchard coming on to replace it; if there is a mere apology for a garden, if opportunities to have a full and convenient water supply are not considered; if the home surroundings are not made more cosy and attractive every year, then the resources of the farm are being neglected, advantages ignored and the old farm not given an opportunity to prove what a delightful and profitable home place ambitious and intelligent farming could make of it. Intensive farming enables the farmer to husband his resources and get the largest possible returns for his labor and capital invested.—Epitomist.

The Draft Stallion.

Everything now points to the truth of the suggestion that there will be more draft horse breeding the coming spring than in many years past, on account of the increasing demand for heavy horses. One of our exchanges says: Unless all signs fail, more pure-bred stallions will be purchased and distributed over the country generally within the next five months than have ever changed hands in any like period. Every one of the importers is stocked up to the limit and the output of homebreds is greater than ever before. Combined the imported and native stallion crop available for the coming season, is the largest ever offered in North America. Everywhere horses are selling at record-breaking figures. Demand continues unabated. Promise is that more mares will be bred next spring than have been counted into the breeding ranks in any one year in the past decade. Many new men will enter the stallion business, and generally the prospects are that the selling season will be a profitable one all around.

Most men who determine to purchase stallions make the mistakes of holding off until the end of winter, thinking that by so doing they lessen the risk they must run of loss by death and save money in interest and keep. This is a mistaken view. It takes a stallion several months to become accustomed to the changed conditions he must encounter after removal from the importer's barn to the country. He should have plenty of time in which to become acclimated and the best possible place for him to do that is right in the barn in which he is to stand for service. If he is to contract distemper as a result of shipping, or some kindred trouble, he should have ample time to become thoroughly healthy again before beginning his season. Therefore the best time to buy a breeding horse is as soon as possible.—Indiana Farmer.

Weaning Foals.

It would probaly be correct to say that weaning foals are usually under rather than overfed. On the supposition that they have been taught to eat grain along with the mare before weaning, the following treatment should produce a good growth during the first winter. Feed crushed or ground oats and bran in about equal parts by weight, and as the Winter season advances rather increase the proportion of the oats. Give the foal about all of this kind of food it will eat with a relish and it will eat a considerable quantity. It will probably be better to feed the oats and bran dry in the morning, but the evening feed will be improved if the oats can be boiled or steamed and mixed with the bran in a mash, and if a little molasses can be added the colt will grow all the better. However, we do not favor feeding very large quantities of this food to growing animals, especially if they are intended for breeding purposes.

The fodder part of the ration should consist, if possible, of good hay. Clover is rather to be preferred to timothy, but if the two are mixed the results will be very satisfactory. A part of it should be cut and the meal fed should be mixed with a small quantity of the cut fodder. It will cheapen the ration if good corn fodder can be fed along with the hay. It is not a good plan to feed much corn, but a small amount fed occasionally at noon in alternation with ground barley, may serve a good purpose. The corn is better cracked and fed with bran. If in addition to the above a few roots can be fed per day, either raw or cooked and mixed with the mash, the digestion of the foal will be benefitted thereby. Such feeding may be looked upon as being decidedly liberal. Perhaps it is, but it is just such feeding that produces the best type of animals. As a general thing weanling foals are underfed the first winter, and this arrests their development, and to some extent hinders size that would otherwise be attained.—Weekly Witness.

Notes.

Sheep for breeding should be given a light ration, such as will keep them in good, thrifty condition but not too fat.

The best thing that you can do with ewes which have reached the age of six years is to fatten them and send them to market.

Tuck a forge and a little kit of tools into some corner of the farm buildings. Tinker up things that get broken there on days when you can't very well work out of doors.

If you can't pay for two new farm tools this year, pay for one and lay up money for the other by cutting off some useless habit. Most men have such things hanging about them.

Half the farm runaways come from carelessness and the other half from poor harnesses and other wornout fixings. Have everything solid, and then keep your wits about you when using horses.

We made a good land roller by putting four old mowing machine wheels on a shaft and rivetting hard wood planks to the surface, with frame and pole attached. You can put on a seat if you want to, and most men do. Then use the roller when you get it made.

Rig up a good workbench in the wagon-house. Upstairs is a good place. Have it nice and light and get some good tools to go along with it. You have no idea how many little things you can mend yourself, right at home. Good place for the boys to spend their odd moments, too.

Wood will lose a good share of its goodness if piled up outof-doors. The sun dries it out, the storms take a little more and if you don't look out rot will do more damage than both the others put together. Make a good woodhouse if you can. Now it is a good time to do it. Save time, have dry wood and make the wood last longer.

A Mark Twain Story.

Mark Twain, when he worked in Nevada on "The Virginia City Enterprise," inserted in the news a good many boarding house jokes.

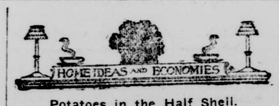
In revenge the humorist's sensitive fellow boarders in Virginia City decided to put up a game on him. They enlisted the landlady's help, and at the Thanksgiving dinner at the boarding house Mark Twain, by a dexterous piece of sleight-of-hand, was served, apparently direct from the fowl, with a turkey leg of painted wood.

"You've changed your poultry dealer, haven't you, ma'am?"

"Why, no, Mr. Clemens. What makes you think so?"

"This turkey," he answered, giving the wooden drumstick a little whack with his knife; "it's about the tenderest morsel I've struck in this house for some months."—Detroit Free Press.

Canada's total railway mileage last July was 30,330 miles. This means that there is one mile of railway for every three hundred inhabitants.



Potatoes in the Half Shell.

Wash, carefully scrub and bake as many potatoes as desired. Cut them in halves lengthwise and scoop out the potato. Add one tablespoonful of butter, a half cupful of hot milk, the whites of two eggs beaten stiff and salt and pepper to taste. Fill the potato skins, heaping up the mixture, put into the oven and brown slightly. —New York Tribune.

Soft Caramels.

For one pound of brown sugar allow one cupful of milk, a tablespoonful and a half of butter and half a cake grated chocolate. Cook nine minutes, take from the fire and stir steadily five minutes, but not until too stiff to pour. Turn into a buttered pan and mark in squares. This candy will be crumbly and rich.—New York Telegram.

Eggs a La Monaco.

Put into a saucepan a claret glassful of strained tomato juice, highly seasoned with salt and cayenne pepper, with a tablespoonful of melted butter. Dilute with a cupful of broth or milk and cook for three minutes. Strain into a casserole and carefully break into the sauce six eggs. Put a drop of melted butter on each egg and set in the oven until the whites are set.—New York Tribune.

Vienna Steaks.

Half a pound each of lean uncooked veal and beef. Chop finely and season with salt, pepper, a tablespoonful of chopped parsley and a teaspoonful of minced shallot. Stir in two well-beaten eggs and turn the whole upon a flat dish. When the mixture is firm cut in slices, roll in flour and fry in butter three minutes on each side. Make a plain brown gravy to be served separately.—New York Tribune.

Mushroom Fritters.

Half a pound, or two cans, of mushrooms are required. Trim and prepare the mushrooms in the usual way and cook for twenty minutes in equal parts of milk and water, seasoned with salt and pepper. Strain through a fine sieve and thicken the broth over the fire with a tablespoonful of butter, the same of flour and, lastly, the yolk of a raw egg. Chop finely the mushrooms strained from the broth and fry in a little butter for a few minutes. Chop up two hard boiled eggs and add them to the mushrooms; dilute with the sauce and stew until the mixture is quite thick. Turn into a dish and when cold cut into cutlets, roll in egg and breadcrumbs and fry until a golden brown. New York Tribune.

Martha's Vineyard Chicken Stew.

Take a nice fat chicken which is cut up, after having fried out 4 or 5 slices of nice fat salt pork; remove them from the kettle, and into that fat put the chicken, with a little salt and pepper and just water enough to cover it; let it boil about 2 hours; then put in 3 or 4 onions, about 6 potatoes, both sweet and white, whole also, and just before it is done take 1 quart self-raising flour, mix with milk to a not very stiff dough, make dumplings and set all around the sides of the kettle, being careful to let them rest in the onions, potatoes and turnips, which are also good in it, and not let the water go over them; when they are done take everything up separate and make a nice gravy of the liquor, thickening with flour, and you will say it is a fine dinner.—Mrs. M. E. Cole in the Boston Post.

Hints.

Don't boil milk for coffee. Scald it.

Don't put butter in your refrigerator with the wrappings on.

Don't serve mashed potatoes with mutton or chicken. Reserve them for beef.

Don't make bread into large loaves. The center is apt to be underdone and spoil easily.

Don't salt meat before the cooking. Add it after the meat is cooked or when nearly done.

Don't allow graniteware to dry over a hot fire. The iron expands, chipping off the entire outside.

Don't boil meat at a gallop. Boil five minutes, then cook it at a temperature of 160 degrees Fahrenheit.

Don't clutter up the kitchen when getting a meal, because it will take hours to "clean up" after the meal is over.

Don't allow your marketing to stand in the kitchen; put it away at once. Meats frequently become heated and quickly spoil.

Don't use steel knives for cutting fish, oysters, sweetbreads or brains. The steel blackens and gives an unpleasant flavor.

Don't save cold coffee in the pot in which it was made. Draw it off and put it in a jar; cover and reheat it quickly at serving time.

Don't fill the tea kettle the night before. Fill it with fresh water in the morning, bring it to the boiling point, and then use it at once.

Don't scrub your refrigerator with warm water. When necessary sponge out quickly with two ounces of formaldehyde in two quarts of cold water.

Don't put tablecloths and napkins that are fruit-stained into hot soapsuds; it sets or fixes the stains. Remove the stains with diluted oxalic acid, washing quickly in clear water.

Don't fail to use a string for cutting hot brown bread and you will be surprised at the ease in slicing and the smoothness. Turn the loaf on one side, using both hands in drawing the string.—From "Don't for the Kitchen" in the Philadelphia Star.

In a turbine steamer, the rhythmic thumping of the pistons disappears, and instead the engineers give out a thin soprano song that rises or falls in key with the speed, sometimes suggesting a continuous squeal.

Loaded Scales.

Rodrick—He is all right in his way.

Van Albert—Yes; but he doesn't weigh much.

Rodrick—That's an ancient joke.

Van Albert—No joke about it. He is a sugar weigher, and his scales are always short.—Chicago News.

Why Drag That In.

Politician—Congratulations, Sarah. I've been elected.

Sarah (with delight)—Honestly?

Politician—What difference does that make.—St. Louis Times.

The Portuguese Navy has 5,000 men.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At druggists.

A Prolonged Negative.

An assult case involving two Chinese merchants was being heard in a local court several days ago.

Li Ho acted as interpreter.

During the course of the trial the district attorney told Li to ask one of the merchants whether he was present at the time the alleged assult took place.

The interpreter asked the question.

The Chinese merchant who was questioned in answer spoke for a period of about ten minutes.

He then stopped. The interpreter turned to the judge and said, "Him say no."—Philadelphia Times.

Colder Even Than Curzon.

Lord Curzon, during the visit that ended in his marriage to Miss Leiter, proved very interesting in his cold, proud way."

The speaker, a Chicagoan, smiled and resumed:

"Cold and proud as young George Curzon was, he regarded the House of Lords as colder and prouder. He told me once that when he asked his father if his first speech in the House of Lords had been difficult, the old gentleman replied:

"'Difficult! It was like addressing sheeted tombstones by torch light.'" —Washington Star.

The Real Squaw Man.

Though it is, happily, true that the tie of civilized wedlock is generally recognized by the white men who have taken the hands of Indian maidens in marriage, there are sad exceptions. Some pioneers, government officials, and army officers of high rank and low morals have never acknowledged as their wives the devoted Indian women united to them by solemn tribal rites. And here and there an Indian girl married and then deserted, has had good reason to sing with her far Eastern sister the song of the Shalimar. That such instances are exceptions among the Sioux is partly due to strict paternal discipline. The girls are wise in their generation: they not only insist on civilized marriage, but, as a rule, they will not marry a white man who drinks or gambles, or is not worth a thousand dollars. —Everybody's Magazine.

In certain districts of Florida excellent highways are made by covering the sandy roads once a year with the leaves of the long-leafed pine.

WHAT'S THE USE

Sticking to a Habit When It Means Discomfort?

Old King Coffee knocks subjects out tolerably flat at times, and there is no possible doubt of what did it. A Mich. woman gives her experience:

"I used to have liver trouble nearly all of the time and took medicine which relieved me only for a little while. Then every once in a while I would be suddenly doubled up with an awful agony in my stomach. It seemed as though every time I took a breath I would die. No one could suffer any more and live.

"Finally I got down so sick with catarrh of the stomach that I could not turn over in bed, and my stomach did not digest even milk. The doctor finally told me that if I did not give up drinking coffee I would surely die, but I felt I could not give it up.

"However, Husband brought home a package of Postum and it was made strictly according to directions. It was the only thing that would stay on my stomach, and I soon got so I liked it very much.

"Gradually I began to get better, and week by week gained in strength and health. Now I am in perfect condition, and I am convinced that the whole cause of my trouble was coffee drinking, and my getting better was due to leaving off coffee and taking Postum.

"A short time ago I tasted some coffee and found, to my astonishment, that I did not care anything about it. I never have to take medicine any more. I hope you will use this letter for the benefit of those suffering from the poisonous effects of coffee."

Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Fisherman's Luck.

When asked a question about the reason for the battle at Bunker Hill, a youngster solomnly answered:

"The Americans did not want the British to take Bunker Hill, so in the night they all assembled and threw up earth worms."—Circle Magazine.

At Home.

Wilson—Does Nagger and his wife make you feel at home when you go there?

Bilson—Oh, yes. Why, they quarrel right before me, just as if I was one of the family.

Technically Discussed.

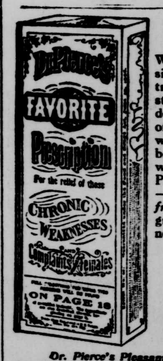
"So there is to be a divorce," said the woman who discusses everybody. "It seems but a little while since he he asked her for her hand."

"Yes," replied the rude man. "He got the hand all right. But it turned out to be a misdeal."—Washington Star.

The Money Question.

"Wot do they mean, Jimmy, when they say money talks?"

"I dunno unless it's the wonderful way it says good-by to yer."—London Tatler.



Honored by Women

When a woman speaks of her silent secret suffering she trusts you. Millions have bestowed this mark of confidence on Dr. R. V. Pierce, of Buffalo, N. Y. Everywhere there are women who bear witness to the wonder-working, curing-power of Dr. Pierce's Favorite Prescription—which saves the *suffering sex from pain*, and successfully grapples with woman's weaknesses and *stubborn ills*.

IT MAKES WEAK WOMEN STRONG IT MAKES SICK WOMEN WELL.

No woman's appeal was ever misdirected or her confidence misplaced when she wrote for advice, to the World's Dispensary Medical Association, Dr. R. V. Pierce, President, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets induce mild natural bowel movement once a day.

COLT DISTEMPER

Can be handled very easily. The sick are cured, and all others in same stable, no matter how "exposed," kept from having the disease, by using SPOHN'S LIQUID DISTEMPER CURE. Give on the tongue or in feed. Acts on the blood and expels germs of all forms of distemper. Best remedy ever known for mares in foal. One bottle guaranteed to cure one case. 50c and $1 a bottle; $5 and $10 dozen, of druggists and harness dealers, or sent express paid by manufacturers. Cut shows how to poultice throats. Our free Booklet gives everything. Local agents wanted. Largest selling horse remedy in existence—twelve years.

SPOHN MEDICAL CO., Chemists and Bacteriologists, Goshen, Ind., U. S. A.

Although Japan's newest railroad will have 12 or 15 tunnels and about 300 bridges in its 166 miles, not a steam shovel, pneumatic stone drill or power-driven pilediver has been utilized in its construction.

Tiny Baby's Pitiful Case.

"Our baby when two months old was suffering with terrible eczema from head to foot, all over her body. The baby looked just like a skinned rabbit. We were unable to put clothes on her. At first it seemed to be a few mattered pimples. They would break the skin and peel off, leaving the underneath skin red as though it were scalds. Then a few more pimples would appear and spread all over the body, leaving the baby all raw without skin from head to foot. On top of her head there appeared a heavy scab a quarter of an inch thick. It was awful to see so small a baby look as she did. Imagine! The doctor was afraid to put his hands to the child. We tried several doctors' remedies but all failed.

"Then we decided to try Cuticura. By using the Cuticura Ointment we softened the scab and it came off. Under this, where the real matter was, by washing with the Cuticura Soap and applying the Cuticura Ointment, a new skin soon appeared. We also gave baby four drops of the Cuticura Resolvent three times daily. After three days you could see the baby gaining a little skin which would peel off and heal underneath. Now the baby is four months old. She is a fine picture of a fat little baby and all is well. We only used one cake of Cuticura Soap, two boxes of Cuticura Ointment and one bottle of Cuticura Resolvent. If people would know what Cuticura is there would be few suffering with eczema. Mrs. Joseph Kossmann, 7 St. John's Place, Ridgewood Heights, L. I., N. Y., Apr. 30 and May 4, 1909."

Baltimore's population in 1752 was 200.

DR. W. H. MAY, 548 Pearl Street, New York.

Conclusive Proof.

A certain captain in the army was summoned by his colonel to answer a charge of assault preferred against him by a sentry, who had stated that the officer had used him pretty roughly one evening at the gate of the barracks.

A humorous phase of the affair was that the officer apparently had no recollection of the alleged assault. The sentry had made so bold as to declare that the officer was intoxicated.

Among those questioned was the captain's orderly, an Irishman, who protested vigorously that the allegation of the sentry was a slander—that he was sure the captain was perfectly sober the evening of the alleged assault.

"Why are you so sure that Captain Blank was sober that evening?" he was asked. "Did he speak to you upon his return to his quarters?"

"He did, sir."

"What did he say?"

"He told me to be sure an' call him early in the mornin' sir."

"And did the captain say why he wished to be called early?"

"Yis, sir, he did, sir. He said he was goin' to be Queen o' the May, sir," responded the orderly with convincing gravity.—Pittsburg Chronicle-Telegraph.

Two Missouri men have patented a simple mop wringer for household use, consisting of a conical can to be hung on the inside of sinks, perforated to let out the water and with blades on the inside to engage the mop and hold it when twisted.

Venezuela has granted British interests the exclusive right to explore and exploit the petroleum belt of that country, with the exception of certain territory previously reserved.

HER PHYSICIAN APPROVES

Taking Lydia E. Pinkham's Vegetable Compound

Sabattus, Maine.—"You told me to take Lydia E. Pinkham's Vegetable Compound and Liver Pills before child-birth, and we are all surprised to see how much good it did. My physician said 'Without doubt it was the Compound that helped you.' I thank you for your kindness in advising me and give you full permission to use my name in your testimonials."—Mrs. H. W. Mitchell, Box 3, Sabattus, Me.

Another Woman Helped.

Graniteville, Vt.—"I was passing through the Change of Life and suffered from nervousness and other annoying symptoms. Lydia E. Pinkham's Vegetable Compound restored my health and strength, and proved worth mountains of gold to me. For the sake of other suffering women I am willing you should publish my letter."—Mrs. Charles Barclay, R.F.D., Graniteville, Vt.

Women who are passing through this critical period or who are suffering from any of those distressing ills peculiar to their sex should not lose sight of the fact that for thirty years Lydia E. Pinkham's Vegetable Compound, which is made from roots and herbs, has been the standard remedy for female ills. In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound.
