AFTER DOCTORS FAILED

Lydia E. Pinkham's Vegetable Compound Cured Her

Knoxville, Iowa.—"I suffered with pains low down in my right side for a year or more and was so weak and nervous that I could not do my work. I wrote to Mrs. Pinkham and took Lydia E. Pinkham's Vegetable Compound and Liver Pills, and am glad to say that your medicines and kind letters of directions have done more for me than anything else and I had the best physicians here. I can do my work and rest well at night. I believe there is nothing like the Pinkham remedies."—MRS. CLARA FRANKS, R. F. D., No. 3, Knoxville, Iowa.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

For thirty years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills, and suffering women owe it to themselves to at least give this medicine a trial. Proof is abundant that it has cured thousands of others, and why should it not cure you?

If you want special advice write Mrs. Pinkham, Lynn, Mass., for it. It is free and always helpful.

Comfort and Cash.

Few dairymen fully appreciate the relation of comfort of the cows to his cash returns. The dairy cow is a good machine, but she is very particular as to how she is run. A soft, clean bed and a nutritious cud are essential requisites to winter contentment.—Farmers' Home Journal.

Safeguarding The Flocks.

The best safeguard against transmitting weakness of poultry in a breeding flock, is the culling of all stock that shows, or has shown any weakness. Sometimes this means the culling of the entire flock, and starting in with new. Better do the culling process before hard weather begins.

There are advantages in securing the new flock or parts of the flock in the fall or early winter. One gets a better selection; the price is usually a little lower; the birds are well ready for duty before spring and one gets a chance to become acquainted with the fowls through the winter. Don't delay too long else there may be only second rate stuff.—Indiana Farmer.

To Prevent Colds.

During some seasons of the year little attention is given on the general farm to the poultry. Many of the diseases as roup, colds, etc., could be avoided if the hen houses were given proper attention. A cold, damp house, which has broken windows, or even small cracks which allow drafts, promote all such diseases. Newspapers tacked or pasted over the walls are cheap, but very effective. It is a little thing to do this when one once gets at it, and the trouble is more than paid for by the increase in eggs, for the hens will be sure to begin to lay earlier in the spring.

There might be some trouble in overdoing this by stopping up every opening and not allowing any ventilation. Fresh air is essential but it should be admitted into the hen houses in such a way that there would be no draft. If no plan for this has been arranged the doors should be opened during the day, or a window, or a piece of glass removed, and cloth placed over the opening.—Indiana Farmer.

Sheepish Glances.

Once a week is not enough to salt the sheep. Have salt accessible at all times.

It isn't much trouble to count the sheep every day. Better do it and be sure that all of them are all right.

A small flock of sheep on every farm should be the slogan of the organized farmers throughout the country.

It is easier to keep breeding sheep condition after they have once run down.

Feeding the fodder out in the pasture is a good practice in dry and pleasant weather. It spreads the manure where it is wanted and saves hauling.

Sheep and young stock should never be yarded together. The young stock will be pretty sure to chase the sheep and that means trouble every time.

See that the sheep get good, pure water, and do not hurry them or allow them to be crowded through gates or doors.

Breeding ewes should not be allowed to get fat. They should be kept in good condition and so fed as to be plump and hard, but there should be very little surplus fat on them.—Epitomist.

Hay From Pea Vines.

In the early history of pea canning, the pea vines were treated as a waste product, the disposal of which involved considerable difficulty and expense. Most commonly they were thrown out in piles to rot, the resulting manure being used for fertilizer.

During recent years, the pea vines have risen to the dignity of a by-product, from which the factories derive considerable profit. They are now used for silage, or fed to stock in a fresh state, or cured for hay. They make a silage superior in value to corn silage. They may be preserved in silos the same as green corn, or they may be put up in large stacks in the open air. If these stacks are well put up and the vines are well tramped, decay will only affect the surface to a depth of a few inches.

The United States Department of Agriculture has recently made an extensive investigation of this subject and published the records in a circular.

The pea vines can easily be cured by spreading them on sod land. Pea vine hay is considered better than clover hay.

Both the hay and the silage are excellent feeds for dairy cows. They are also satisfactory feeds for beef, cattle, horses, and sheep. The hay sells at $3 to $5 a ton.

In some cases the pea vines are hauled away from the factory by the farmers who supply the peas; in other cases they are sold in a fresh state; and in still other cases the factories either silo the vines, or cure them for hay.

Thoro Drainage.

We think one very essential thing is much neglected in our efforts to keep up or restore fertility and that is drainage.

The application of manures whether barnyard or commercial to undrained lands does not give best results for the reasons that too much of the valuable parts are carried off on the surface, because of the inability to reach a lower strata already filled with water, and even those elements that do enter the lower strata have no assistance from currents of air in the soil.

No land can be properly fertilized until thoroughly drained and then many good results follow. Such land can be cropped in any of the grains or clovers without any danger of the winters and springs killing them, and at the same time those winter and spring rains and snows will assist in the fertility. Failure to get good catches of clover, or good stands of the spring sown grains, is due to the condition of the drainage.

Drained lands can be worked at proper seasons for our plantings, are much warmer, never bake, all acidity or sourness is removed, are loose and pliable, rendering culture easy.

Drouths are robbed of their harmful effect, because moisture is derived from the lower strata in drained fields. In wet seasons fertility is not carried off in surface streams, but it sinks into the soil quickly, leaving fertility to the soil elements by admixture with air currents while the surplus water is carried off in the drain.

The air oxygenizes and fits these various elements in the drained soil for plant food. In fact the air itself fertilizes and puts that fertilized portion just where the plant can reach it, with its vast system of rootlets.

Tiled soil is warmer both in the early and late season, rendering early planting and quick germination a surety and prolonging the ripening season weeks beyond the natural course. Black lands, or wet clay lands, subject to heaving, are made our most productive soils by drainage. This is plainly shown over the northern part of the state, and such soils, then manured and rotations followed, are susceptible of the highest fertility.—J. H. Haynes, in the Indiana Farmer.

Is a Hen a Bird?

For the first time in five years European eggs are being shipped into this country. They were all shipped from Liverpool; having been collected there from the remotest parts of Europe. A thin coating of a secret compound of paraffin has been used as a preservative. About a million have already arrived and the receipts are expected to continue throughout Lent. The shipping charge was four cents a dozen, and the duty five cents, and yet the importers are able to sell them in competition with domestic eggs.

An interesting point of law has yet to be decided with regard to the duty on eggs. The tariff law says that birds' eggs shall be admitted free, but that eggs are to pay five cents a dozen. Are hens' eggs "birds'" eggs, or are they simply "eggs?" Secretary McVeagh has been asked to decide if a hen is not a bird. It seems like an absurd question to ask when the intention of the law seems so obvious, yet it may indeed be found that a hen is a bird, and that the duty on eggs must be supposed to apply to some other kind of eggs—turtles' eggs, for example, or lizards', or snakes' eggs.

Such a ruling would not be more ludicrous than the previous one of the department that frogs' legs are dressed poultry. If frogs' legs are poultry, then, of course, frogs are hens, and their eggs—but, really, one should never subject the tariff to anything so cruel as cold reason. All law is supposed to bear a literal translation, but on this basis it would be quite clear that our legislators intended to pay a duty of five cents a dozen on the eggs of fishes, turtles, frogs, snakes, lizards and other reptiles, and not on "hens'" eggs.

But to continue with the subject of the importation of foreign eggs, what is the matter with the American hen that her Austrian rival from half way round the world can afford to lay eggs at nine cents a dozen less? Is she, too, suffering from the high cost of living? The Austrian eggs bring from one to two cents more a dozen in New York than the home product. This presents one more question. Is the American hen cheating us on the size of her eggs, or has she perchance taken to laying eggs of an inferior quality?—Weekly Witness.

Notes.

A few apples, if you can spare them, taste wonderfully good to the cows dry days.

A dose of Epsom salts is good for the cow that is soon to begin giving new milk.

When juicy feed is scarce especially if you have not a silo, give the cows the best that you have.

Milk the cows that have udders so full they are painful before they come into new milk. It is better than to let them suffer.

If cows are fed any kind of dusty feed while being milked, it is a good plan to sprinkle it. This helps to keep the milk clean.

It takes work of course, to have a clean stable, and yet, as you value the life and health of your stock, be thorough about this part of your work.

Don't set milk in the pantry near the kitchen, close by the stove where the corn-beef and cabbage are cooked. You surely can not make good butter that way.

A few coals from the wood fire in the kitchen put into the houses now and then, where the hogs can grind them up into charcoal, help, to keep the hogs healthy.

Cold water never should be given the new milk cow. It may bring on a chill and cause milk fever. Warm it a little for a couple of days. That will help to avoid the danger.

Women Not Dishonest.

"Are women less honest than men?" This palpitating question has become one of the great subjects of discussion in Paris, thanks to a symposium in La Revue. There is not one dares openly to affirm that woman is dishonest. Anatole France, the master of contemporary French literature, questions whether man is so virtuous that he should desire to weigh himself in the balance against women. And he speaks of masculine arrogance and ferocity and brutality. And so woman—according to the judgment of Paris—is not more dishonest than man. Whence sprang that legend that she was?

There are about 26,800 worms to an acre of cultivated land.

Munyon's Paw Paw Pills coax the liver into activity by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no calomel; they are soothing, healing and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munyon's Doctors. They will advise to the best of their ability absolutely free of Charge. MUNYON'S, 53d and Jefferson Sts., Philadelphia, Pa.

The government of Venezuela, in connection with the Compania Anonima de Navegacion Fluvial y Costanera de Venezuela, has decided to establish wireless stations of the De Forest system at Pampatar, Coache and Araya, Margarita Island, and on board the steamer Venezuela of the company. The apparatus has been ordered from the United States.

The flora of Switzerland is peculiarly adapted to bee culture and it is estimated that 100,000,000 pounds of honey are made in that country each year.

GAVE UP HOPE.

Doan's Kidney Pills Cured When Doctors Failed.

Mrs. John H. Cole, 82 Arlington St., So. Framingham, Mass., says: "For years I was a martyr to kidney trouble. One physician treated me and then another, and it was thought I would not live. I rallied from that attack, but my back ached as if it would break. I was languid and nervous. Life seemed a burden. Doan's Kidney Pills helped me very promptly and it was not long before I was cured. Now I enjoy perfect health and am without an ache or pain."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Filipino Buglers.

"Speaking of buglers," says Boatswain Juraschka, in the Wide World Magazine, "it astonished me to find that the insurgents had so many buglers, and that many of them were of the best. They knew all our army calls, although they did not know their significance. I was often asked the meaning of the various calls, and was careful to give them any but the proper one. One insurgent colonel asked me what call was sounded as the retreat from charge. I told him that we had no such call, but that the charge once sounded, American soldiers and sailors went through, or never came back. He was very much interested, and with good reason, as he had just escaped from the attack of our men at Iloilo, and could well believe it. He said that charging was unfair—that both sides should simply snipe at each other."

The Immortal Fount.

A truly eloquent parson had been preaching for an hour or so on the immortality of the soul.

"I looked at the mountains," he declaimed, "and could not help thinking: 'Beautiful as you are you will be destroyed, while my soul will not.' I gazed upon the ocean and cried: 'Mighty as you are you will eventually dry up, but not I!'"—Exchange.

The recent completion of a 10,000-foot tunnel through the Andes has permitted a railroad to have an unbroken line from Buenos Ayres on one edge of the continent to Valparaiso on the other.

ROSY COLOR
Produced by Postum.

"When a person rises from each meal with a ringing in the ears and a general sense of nervousness, it is a common habit to charge it to a deranged stomach.

"I found it was caused from drinking coffee, which I never suspected for a long time, but found by leaving off coffee that the disagreeable feelings went away.

"I was brought to think of the subject by getting some Postum and this brought me out of trouble.

"It is a most appetizing and invigorating beverage and has been of such great benefit to me that I naturally speak of it from time to time as opportunity offers.

"A lady friend complained to me that she had tried Postum, but it did not taste good. In reply to my question she said she guessed she boiled it about ten minutes. I advised her to follow directions and know that she boiled it fifteen or twenty minutes, and she would have something worth talking about. A short time ago I heard one of her children say that they were drinking Postum now-a-days, so I judge she succeeded in making it good, which is by no means a difficult task.

"The son of one of my friends was formerly a pale lad, but since he has been drinking Postum, has a fine color. There is plenty of evidence that Postum actually does 'make red blood,' as the famous trade-mark says."

Read "The Road to Wellville," found in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Where Ciphers Count.

A peculiar and perplexing problem is offered by the Kirkland Enterprise in the following: A friend asks us to multiply $5 by $5. We do so, and announce the result of $25. Now multiply 500 cents by 500 cents, give the answer in cents pure and simple, not as fractional parts of a dollar. We do so, and are surprised to see the figures climb up to 250,000 cents, which is $2,500. As $5 and 500 cents are equivalent, the result is puzzling. It cannot be argued that decimal marks should be used. A cent, as such, is as distinct a unit as a dollar, and as the result is to be announced in cents, the decimal cannot be pleaded in extenuation of the rather surprising result. But there is clearly something wrong. Can any reader explain it?

It is very easy of explanation, says "The Dallas News." When you have $5 and multiply it by 5 you have $25 in real money. When you accumulate 500 pennies and multiply them by 500 you have $2,500 worth of subsidiary coinage. The reason it is so much better to have 500 times 500 cents than five times $5 in the same as because one is more fortunate in having a lot of money than a little.—Washington Herald.

Will Spot The Speeder.

A clever camera-like device designed to record accurately the rate of speeding automobiles will be welcomed alike by automobilists and officials of the law.

As described by "The Scientific American," the machine consists in large part of a camera with two lenses so arranged that the second band of a watch is also included in the picture. The first exposure shows the automobile close at hand with the number on the rear axle. The second exposure shows the machine farther away. With the distance from the lens to the plate known in each case and the time shown in the same picture it can be shown absolutely how fast the machine was going.

With the elimination of all guesswork by the driver or the policeman by such evidence, convictions of speed violations will be more frequent. The machine can be used to good advantage on crowded city streets because of the short distance required for its operation.

The majority of automobilists will welcome this device as one of the agencies in the elimination of the minority which persists in violating law, to the discredit of the whole class.—St. Paul Dispatch.

Diplomacy And Lying.

Sir Henry Wotton's definition of an ambassador as "an honest man sent to lie abroad for the good of his country"—which was quoted by Professor Pollard in his address on "Politics and Character"—was destined to cost its author dear. It was written in a friend's albumn at Augsburg in 1604. Eight years afterward Gasper Scioppius, a Jesuit controversialist, used it as an argument against the honor and integrity of James I. in a Latin attack on the King.

James was very angry and demanded an apology from Wotton. This was promptly forthcoming, but the offense does not appear to have been overlooked, and, according to Mr. L. Pearshall Smith, Wotton's latest biographer, it was not till nearly a year later that the ex-Ambassador "had hopes of public employment." It should be borne in mind that the epigram in its English form—it was originally written in Latin—is really a pun, the verb "to lie" having in those times the same meaning as 'to sleep."—London Daily News.

Baby Sleepless With Awful Itching.

"When our baby was seven weeks old he broke out with what we thought was heat, but which gradually grew worse. We called in a doctor. He said it was eczema and from that time we doctored six months with three of the best doctors in Atchison but he only got worse. His face, head and hands were a solid sore. There was no end to the suffering for him. We had to tie his little hands to keep him from scratching. He never knew what it was to sleep well from the time he took the disease until he was cured. He kept us awake all hours of the night and his health wasn't what you would call good. We tried everything but the right thing.

"Finally I got a set of the Cuticura Remedies and I am pleased to say we did not use all of them until he was cured. We have waited a year and a half to see if it would return but it never has and to-day his skin is clear and fair as it possibly could be. I hope Cuticura may save some one else's little ones suffering and also their pocket-books. John Leason, 1403 Atchison St., Atchison, Kan., Oct. 19, 1909."

Buy "BATTLE AXE" SHOES.

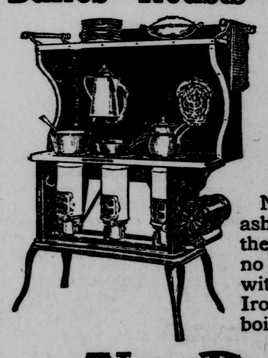
Hides and skins in India are either air dried and then usually dipped in arsenic to destroy insects, or dry salted. Buffalo hides are almost always dry salted. Hindus are not permitted to sell cattle for slaughter, but animals are slaughtered in Mohammedan villages, while municipal towns usually contain slaughter-houses.

The deserts of the earth cover 4,180,000 square miles.

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of illness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs and Elixir of Senna, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact that it is the only remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is, therefore, all-important, in order to get its beneficial effects, to purchase and note that you have the genuine article, which is manufactured by the California Fig Syrup Co. only.

It is pleasant and refreshing to the taste, and acts gently yet promptly on the kidneys, liver and bowels, cleanses the system effectually, dispels colds, headaches and fevers and assists in overcoming habitual constipation permanently, also biliousness and the many ills resulting therefrom. The great trouble with all other purgatives and aperients is not that they fail to act when a single dose is taken, but that they act too violently and invariably tend to produce a habit of body requiring constantly augmented doses. Children enjoy the pleasant taste and gentle action of Syrup of Figs and Elixir of Senna, the ladies find it delightful and beneficial whenever a laxative remedy is needed, and business men pronounce it invaluable, as it may be taken without interfering with business and does not gripe nor nauseate. When buying note the name, California Fig Syrup Co. printed on the front of every package. Price, 50 cents a bottle.

Bakes—Roasts—Broils—Toasts



BAKES bread, pie and cake—bakes them perfectly all through, and browns them appetizingly.

ROASTS beef, poultry and game with a steady heat, which preserves the rich natural flavor.

BROILS steaks and chops—makes them tender and invitiig.

TOASTS bread, muffins, crackers and cheese.

No drudgery of coal and ashes; no stooping to get at the oven; no smoke, no dust, no odor—just good cooking with greater fuel economy. Irons and water in wash-boiler always hot. The

BUY "BATTLE AXE" SHOES

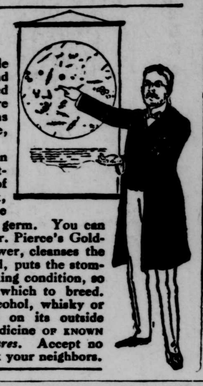
Afraid of Ghosts



Many people are afraid of ghosts. Few people are afraid of germs. Yet the ghost is a fancy and the germ is a fact. If the germ could be magnified to a size equal to its terrors it would appear more terrible than any fire-breathing dragon. Germs can't be avoided. They are in the air we breathe, the water we drink.

The germ can only prosper when the condition of the system gives it free scope to establish itself and develop. When there is a deficiency of vital force, languor, restlessness, a sallow check, a hollow eye, when the appetite is poor and the sleep is broken, it is time to guard against the germ. You can fortify the body against all germs by the use of Dr. Pierce's Golden Medical Discovery. It increases the vital power, cleanses the system of clogging impurities, enriches the blood, puts the stomach and organs of digestion and nutrition in working condition, so that the germ finds no weak or tainted spot in which to breed. "Golden Medical Discovery" contains no alcohol, whisky or habit-forming drugs. All its ingredients printed on its outside wrapper. It is not a secret nostrum but a medicine OF KNOWN COMPOSITION and with a record of *40 years of cures*. Accept no substitute—there is nothing "just as good." Ask your neighbors.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DRUG CO., Quincy, Illinois.
