We state it as our honest belief that the tobaccos used in Chesterfield are of finer quality (and hence of better taste) than in any other cigarette at the price.

WRITE YOUR CONGRESSMAN

A Republic Advances in Proportion to The Intelligence of Its Citizens

Here is a worth while questionnaire—

Should not education of the coming generation be the most vital interest and business of the American people today?

Is it Not Time education should be considered of at least equal importance with War, Commerce or even Agriculture, and that spiritual development should travel hand in hand with material development?

Shall We Not dignify and promote education by creating a Department of Education in Washington with a Secretary in the President's Cabinet?
stimulate teaching training, stabilize national

Is It Not Time to create a great national centre to gather statistics, study methods of teaching, ideals, write our histories and radiate this knowledge throughout the country?

It Is Not True that the agitators appeal most successfully to the illiterate, and will not our government be safeguarded as ignorance is overcome?

The Towner-Sterling Education Bill, embodying these and many other good features, has been before Congress several years, but its active consideration has been crowded out by the necessities of war.

Now Peace prevails, and the means of keeping Peace will be a wise, self-controlled, intelligent people, sincerely interested in the progress of the world.

Will You Not do all in your power to promote the passage of this bill at this session of Congress?

Will You Not write to your Congressman, Today?
