PRODUCTION NOT REDUCTION

Is What the World Seeks

PRICES of some things have been temporarily reduced; prices of other commodities remain about as they have been for months past. So long as people leave the farms to flock to the already overcrowded cities, creating an acute shortage of housing facilities, prices for building materials are likely to remain about on the present level.

IF DEMAND continues to exceed supply, you will be able to build as cheaply now as you can later in the year. Whatever your problem may be it will pay you to come in and talk over your plans, to get estimates. Remember that our architectural service is at your disposal entirely free of charge. And we can at least get acquainted.

PRODUCTION is about the only thing that will bring prices of anything down to a permanent lower level. If you can foresee increased production in all industrial lines, you might wait: but if you can't see larger supplies for the future, don't take a chance. Come in today.
