CONG. GOLDSBOROUGH DISCUSSES TARIFF JOKER

(Continued from Page 1)

Cotton hose and half hose will probably be increased in price 50 per cent and the price of cotton gloves doubled. In other words, importations of cotton have always been only a fraction of domestic consumption; section 905A will create an absolute embargo and the cost of gingham, striped-cotton flannel, flannelette, dotted swisses, colored sateens, fruit of the loom and almost every other kind and grade of cotton cloth can be doubled at retail prices if the tariff bill becomes a law.

Under the present tariff the records of the Department of Commerce show large profits to the cotton manufacturers on an inflated capitalization after paying top-heavy salaries to officers in order to avoid corporate income taxes, wages, costs of production, and income taxes, and no reason has been offered for an increase in the duties, except the selfish greed of a powerful class.

It is estimated that section 905A alone of the tariff, this cynical "joker" inserted at the suggestion of the lobbyist Lippett, will filch from the American people the colossal sum of $750,000,000 annually, an average of $37.50 from every family in the land, and as cotton goods are used by everyone, and as there are more poor people than any other class, the backs of the poor will be bowed under the greater part of this awful burden, and while the golden flood, wrung from the people, is poured into the laps of a handful of rich cotton manufacturers, I say to them that they are depriving the poor of the simplest necessities of life, and I say to them also that their wives and their daughters, when they cover themselves with their gowns of silk, have not been clothed by the worm alone, but their raiment has been spun from the bowels of babes.

BLUE RIDGE COLLEGE

NEW WINDSOR, MD.

J. Maurice Henry, M. A., President

GROUNDS — Twenty-eight acres. A large and well-kept campus commanding a view of the finest landscape scenery in the state. Large athletic field.

LOCATION—Ideal. Forty miles from Baltimore by rail, and sixty from Washington by auto.

EQUIPMENT — Comfortable dormitories. Up-to-date library, commodious gymnasium. Chemical, Biological, and Physical Laboratories.

FACULTY—Strong and Experienced. Leading Universities represented.

COURSES—Classical and Scientific leading to the B. A. and B. S. degrees. Art, Music, Commercial and College Preparatory. Special courses in Education for Teachers.

PURPOSE — Development of Character and High Standards of Scholarship in the student.

EXPENSES—Moderate. Scholarships available.

THE HUGHES LUMBER AND COAL CO.

Denton Maryland

To the Citizens of This Town

You carry great responsibilities.

In your hands are placed the lives of our children.

If a fire should start in any schoolhouse two things may happen.

The building may be burned to the ground, and you know the building itself and its equipment could not be replaced today at many times the price it cost.

But that is unimportant compared to the possibility of a panic and loss of life among the children.

Every school building should be equipped with Pyrene Fire Extinguishers, and the use of Pyrene Fire Extinguishers should be taught in every school fire drill.

A Pyrene Fire Extinguisher will put out any small fire before it can gain headway. It is so light and simple that any woman or young child can use it. With a Pyrene handy fire can be put out before there is a chance for a panic.

Let us show you how many Pyrene Fire Extinguishers should be in each schoolhouse in this district.

Pyrene should be in every home also.

THE CHILDLESSNESS OF THE CHILD

When a thoughful person looks into the face of a little child he sees written there, and also in the palms of his hands and the soles of his feet, the word, POSSIBILITY. Meditate on that word, POSSIBILITY. Continue to read it and think about its meaning and you will discover that the word leads you into one of two directions: It is possible for that little child to become a great man, to be of incalculable benefit to his generation, and to leave upon posterity the imprint of a noble life. The other direction shows that it is possible for that child through neglect to become a criminal—an educated criminal—who will blight the lives of thousands of people, and increase the tax burden of the community in which he lives. It is possible for him to become a curse to his family, a menace to society, and a blot on the page of history. Which direction do you want the POSSIBILITY to take in your child's case?

The child is the indispensable unit, the essential factor, and the master in all spheres of human activity. Around the child the world must revolve. From the child society must evolve. Heaven bends to bless and breathe a benediction of infinite love upon the child—the infant king—of social destinies. The child, cannot become great, useful, and powerful if the childishness of the child is taken from it; if he is robbed of the spirit of youth; taken out of the sphere of innocency, and deprived of the domestic blessings that belong to him.

The curse of this hour is the childishness of children. We haven't children any more. Babies are plunged into the maelsthom of social iniquity. They are prematurely advanced to girlhood and boyhod, and are ushered on the stage where young men and young women play the fool for the pleasure of a world of vultures. Parents are ambitious for their daughters to become social factors, and for their sons to become social leaders; consequently, they are prematurely advanced. In advancing them, forcing them, and introducing them to a world of social maturity they are robbing them of their childish nature, inclinations, innocency, pleasure, and sweetness.

One can stand in the midst of so-called young men and young women and cry out in anguish and sorrow, "Where are the children? O, where are the children?" The girls of today know more than their grandmothers knew at 75 years of age. Boys can teach their old, aged grandfathers.

Where are the children? The Juvenile Society of today is a curse, an infamous blot on the page of American history. It is so because parents have robbed their children of childhood.

HARD-SURFACE ROADS SHOULD BE AT LEAST 18 FEET WIDE

A minimum width of 18 feet for hard surface roads is recommended by the Bureau of Public Roads of the United States Department of Agriculture. The maximum width of truck body generally permitted is 8 feet, and 5½ feet is the ordinary clearance width of automobiles. At an average speed of 30 miles an hour it is unreasonable to expect the driver of an automobile to drive with the wheels closer than 1½ feet to the edge of the pavement, says the bureau. For trucks at an average speed of 15 miles an hour this distance should not be less than 1¾ feet on account of the great width of the rear wheel. Three feet seems to be a minimum safe clearance between bodies. Inasmuch as a certain amount of truck traffic is to be expected on all main country roads, the minimum width of surface should be 18 feet to provide these clearances when an automobile meets a truck.

Where the frequency with which trucks pass each other becomes a big factor, as in the neighborhood of large cities, the minimum width of pavement should be 20 feet to provide a clearance of 3½ feet and a safe distance of wheels from edge of pavement.

"COLD IN THE HEAD"

is an acute attack of Nasal Catarrh.

Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions.

FARMER JONES was progressive. He believed in good barns, good outbuildings. But there he stopped. He thought that fire insurance was too expensive. "Would never need it, either."

One day a pile of straw and litter caught fire. From a small fire it became a big one. It consumed his barn, and seriously damaged his homestead.

—and Farmer Jones lost EVERYTHING! He was not insured!

Are **You** Farmer Jones? Where would **you** be if your property was consumed? Remember, every day of the year fires are busy devouring the work of years. It may visit you **tonight.** Tomorrow——?

Be safe—be sure—INSURE—at once, **Today. Let us tell you how little fire insurance really costs.**
