"COLD IN THE HEAD"
is an acute attack of Nasal Catarrh.
Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.
HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous surfaces of the System, thus reducing the inflammation and assisting Nature in restoring normal conditions.
All Druggists. Circulars free.

BOTH FORGETFUL

A certain young man wrote the following letter to a prominent business firm, ordering a razor:

Dear Sirs—Please find enclosed 50c for one of your razors as advertised and oblige,

John Jones.

P. S.—I forgot to enclose the 50c but no doubt a firm of your high standing will send the razor anyway.

The firm addressed received the letter and replied as follows:

Dear Sir—Your most valued order for one of our razors received today and will say in reply that we are sending the razor as per request and hope that it will prove satisfactory.

P. S.—We forgot to enclose the razor, but no doubt a man with your cheek will have no need of it.—The Associated Grower (Fresno).

THEIR FUTURE ASSURED

Graduate: "Darling, we can be married at last. I have obtained a position at the University."

Prof.'s daughter: "But we can never live on an instructor's salary."

Graduate: "Ah, but the job I've got is that of a janitor."—Columbia State.

IMPROVED UNIFORM INTERNATIONAL

Sunday School Lesson

(By REV. R. B. FITZWATER, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.)
Copyright, 1922, Western Newspaper Union.

LESSON FOR JULY 30

THE FIRST RETURN FROM EXILE

LESSON TEXT—Jer. 29:10-14; Ezra 1:1-11.

GOLDEN TEXT—We know that all things work together for good to them that love God.—Romans 8:28.

REFERENCE MATERIAL—Psalms 96; 130; 131; Jer. 29.

PRIMARY TOPIC—God's People Return Home.

JUNIOR TOPIC—How God Kept a Great Promise.

INTERMEDIATE AND SENIOR TOPIC—How God Kept a Great Promise.

YOUNG PEOPLE AND ADULT TOPIC—Striking Manifestations of God's Providence.

I. The Return From Captivity Predicted (29:10-14).

It seems that false prophets were flourshing in Babylon telling the people that they would speedily be restored to their own land. To counteract this the Lord moved Jeremiah to send this letter to the captives in Babylon (vv. 8, 9). In this letter he advised them to settle down and quietly pursue their regular callings of life and not to be led astray by the false prophets (vv. 6, 7).

1. The length of the captivity (v. 10). Their coming back was to be "after seventy years." From Daniel 9:2 it is clear that seventy years means a definite time. It dates from the time when the first company was taken captive among which Daniel was found.

2. Recovered by God (vv. 10-14). God's purpose in the captivity was to cure them of their idolatrous practices. He assured them that when His purpose was accomplished he would visit them and convince them of His good purpose toward them. When once this was done they would call upon Him in sincerity and He would be found of them. Their captivity He would turn away; gather them from all the nations and bring them into their own land.

II. Prediction of Captivity Fulfilled (Ezra 1:1-11).

1. The proclamation of Cyrus (vv. 1-4). (1) This was not by accident, but that the word of the Lord might be fulfilled (v. 1). What God has promised He will do; He never forgets. Wherever we find a promise which He hath made we can rest upon it; He will make good. (2) By divine initiation (v. 1). "The Lord stirred up the spirit of Cyrus." How this was done we do not know. Possibly Daniel brought to his attention the prophecy of Isaiah and Jeremiah (Isa. 44:28; Jer. 25:12). Every impulse to do good in all men is caused by the Lord—even a heathen king who may not have been conscious of doing His will, at God's appointed time took the initiative in this matter. It may have been that Cyrus only saw his own action as a piece of statecraft—the creation of a buffer state nation between his kingdom and that of Egypt. Be that as it may, God stirred him up to do His will. (3) The content of His proclamation (vv. 2-4). (a) "The Lord God of heaven hath charged me to build Him a house in Jerusalem" (v. 2). This makes clear that he had some impression of God's hand upon him. (b) Appeal to Jewish patriotism (v. 3). He invokes God's blessing upon such as possess the national religious feeling, and commands them to go and build the house of the Lord God. (c) Lend assistance (v. 4). Many of the Jews were established in business and therefore were not free to go. Many, no doubt, had lost their national spirit and therefore were not anxious to go.

All such were to lend friendly assistance in silver, gold and beasts. Those who cannot go to do God's work should strengthen the hands of those who do go.

2. The response of Cyrus' proclamation (vv. 5, 6). The chief of the fathers of Judah and Benjamin and the priests and Levites presented themselves as willing and ready to go. The company which returned was largely made up of representatives of Judah and Benjamin.

3. The royal favor (vv. 7-11) Cyrus brought forth the vessels of the house of the Lord which Nebuchadnezzar had brought forth out of Jerusalem and put into the house of his gods. This was a great encouragement to every loyal Jew whose heart had been grieved over the profanation of these sacred vessels. Now to have 5,400 of these vessels returned to their owners and sent back to Jerusalem to be put to their original use, met a hearty response by the Jews.

Who Knoweth the Lord's Mind.
He that is spiritual judgeth all things, yet he himself is judged of no man. For who hath known the mind of the Lord, that he may instruct him?—I Corinthians, 2:15, 16.

Perseverance Is Necessary.
Few things are impossible in themselves. It is not so much means, as perseverance, that is wanting to bring them to a successful issue.—Rochefoucald.

Godliness.
Godliness consists not in a heart to intend to do the will of God, but in a heart to do it.—Jonathan Edwards.

Enemies Discover Your Faults.
Observe your enemies for they first find out your faults.—Antisthenes.

FARM BUREAU NEWS

IMPROVEMENT OF NEGRO FARM AND HOME LIFE DISCUSSED

The annual conference of Virginia negro farmers was held at Hampton Institute, Va., June 28 to 30, for the purpose of giving farmers, extension agents, and others interested in rural welfare an opportunity to discuss means of improving farm and home conditions among the negroes of the state.

Assistant Secretary Pugsley of the United States Department of Agriculture, in addressing the conference, spoke of the need of recognizing agriculture as the industry by which the larger proportion of negroes earn a living. He also called attention to the need for the right outlook with reference to this industry and the importance of proper preparation of negroes for farm life. The place of negro schools and teachers in bringing about farm efficiency and contentment was emphasized. The value of boys' and girls' club work in the promotion of agriculture and home economics was brought out.

C. B. Smith, chief, Office of Extension Work, States Relations Service, stressed the value of agricultural education in improving farm and farm home practices of negroes and the need of cooperative effort, since the average individual makes progress about in proportion as the entire community makes progress. Other speakers, including members of the extension staff of the department, the director and assistant director of the Virginia extension service, and the principal and assistant principal of Tuskegee, discussed the importance of an education in agriculture, the need for community betterment, recent development of extension work, and the place of Virginia in the expansion of extension work among negroes.

There were 49 delegates from negro county extension clubs present at the conference, 18 delegates from other negro county extension organizations, 39 delegates sent by miscellaneous negro farmers' organizations and 31 negro county extension agents.

CAMERA MAN SHOULD KNOW THE EFFECTS OF CLIMATE

Climatic conditions powerfully influence photographic work, points out the Weather Bureau of the United States Department of Agriculture. Much photographic work may be spoiled or improperly done because the operator was working out of his accustomed climatic conditions. A successful camera man should have at least a fair knowledge of climatology and meteorology.

The weather or climatic element in photography is an important one, first, because of the wide variations in the strength of daylight with the time of the day, season of the year, condition of the sky, with latitude, and with altitude; and second, because of the important effects of temperature and humidity conditions on photographic chemical processes.

IMPETUS GIVEN TO FIGHT ON CATTLE TUBERCULOSIS

As the possibility of eradicating tuberculosis in cattle becomes apparent to a greater number of people, the campaign against the great live-stock plague gains impetus. States and counties that had given little thought to this work from the economic standpoint are now taking it up in a business like manner, says the United States Department of Agriculture, because they see the possibility of ending for all time this drain upon their live-stock resources.

The latest state to fall into line for practical tuberculosis eradication work is Louisiana. On June 29 the legislature passed a bill authorizing the State Live Stock Sanitary Board to co-operate with the United States Department of Agriculture, and providing an indemnity fund of $15,000 a year for two years. A small amount of eradication work had been done there before, but because no money was provided for paying indemnities for slaughtered animals almost no progress was made. Since the State has only a light infestation of tuberculosis estimated by the Bureau of Anmial Industry at 1 per cent, it should require only a few years of such appropriations to free the cattle entirely.

Massachusetts, a state that has been spending money to fight tuberculosis of cattle since 1894, recently passed a law enabling the State Bureau of Animal Industry to co-operate with the United States Department of Agriculture. About $60,000 a year will be provided to pay indemnities on the co-operative basis with the Federal Government.

During the year ending May 31, over 1,500,000 bales of cotton were stored in warehouses licensed by the United States Department of Agriculture under the United States warehouse act.

* * *

A total of 136,441 boys and girls were enrolled in agricultural extension clubs in 1921, for training in various phases of live-stock work. These junior farmers owned, last year, 76,148 head of farm animals and 554,286 fowls, representing a total value of $3,605,176.

* * *

The corn earworm has been infesting beans used for cannery purposes near Baltimore, Md., and has been investigated by the United States Department of Agriculture. The actual damage to the infested fields is not apparently great, but as a factor of material inportance to bean growers and canners of that section is the fact that the "worms" enter the pods, where some of them remain. Eventually they find their way into canned beans, even under the most careful handling, thus damaging the reputation of the cannery from which the jobber or wholesaler buys his stock.

* * *

The potato aphis (Macrosiphum solanifolii) during the early part of June caused serious damage on the Eastern Shore of Virginia, in some cases reducing the crop yield one-half, according to estimates of growers reported to the United States Department of Agriculure. A specialist from the Bureau of Entomology found on visiting the region that in fields where the insects were abundant just before the potato had blossomed the young tender shoots had in many instances been completely killed. Control by natural enemies and fungous diseases was doing much to reduce the number of aphids. Two applications of a 3 per cent nicotine dust made at the Onley branch of the Virginia Truck Experiment Station, under the direction of the officials of that station, proved successful.

The Fear of Fire Should Be in the Heart of Every Factory Owner

The most fearful thing a manufacturer can contemplate is the loss of his buildings and equipment by fire.

It means suspension of business and of profits, rebuilding when building materials are at the highest price in history, trying to get new machinery without weary months of waiting.

A factory completely equipped with Pyrene Fire Extinguishers is a factory that is well protected. Pyrene Fire Extinguishers will put out any small fire before it can gain headway and all fires are small fires first.

Pyrene is safe on electrical fires. It won't freeze and there is no recharging necessary except when used. Pyrene liquid will not damage machinery, fabrics or anything with which it comes in contact.

Let us tell you how many Pyrene Fire Extinguishers there should be in your own factory.

TUCKAHOE NECK

Miss Hilda Elben visited Oyster Shell Point on Sunday.

Miss Madge Higgins and Miss Thelma DeFord spent last week near Centreville.

Mr. and Mrs. Clayton Roe, Jr., spent a few days camping at Oyster Shell Point last week.

Misses Jessie and Beulah Clopper visited Miss Ellen Roe Sunday.

The Tuckahoe Neck Community Club met with Mrs. Fred Anstee last Thursday.

The club will go on its annual outing to Oyster Shell Point on Thursday, August 17.

Mr. and Mrs. Howard Holsinger visited Mr. and Mrs. Fred Anstee on Sunday.

Sunday School class No. 4. with the mothers, are invited to the home of their teacher, Mrs. H. B. Wright, on Thursday afternoon.

Mrs. Wallace Clark returned Saturday from a motor trip through Pennsylvania. She visited her brother, Dr. Will Betts, of Chadds Ford and Dr. James Betts of Easton, and also went to Gettysburg, Valley Forge, Paxinosa and Delaware Water Gap. James Betts, Jr. returned with her for a visit.

BURRSVILLE

Miss Dorothy Moore of near Seaford is visiting her cousin Miss Victoria Betts.

Miss Aliene Greenly of Philadelphia is visiting her mother, Mrs. Will Greenly.

Mr. and Mrs. Ralph Garrett and Victoria and Hartley Betts were Sunday visitors of Mr. and Mrs. James Moore of near Seaford, and also the guests of Mr. William Betts and son Roy and Mr. and Mrs. Blidge Commerns of Blades.

Mrs. Roy Chance and three children of Baltimore have returned home, accompanied by Master Milton Jacobs, after visiting her relatives in and near Burrsville.

Several of the Burrsville people attended the funeral of Mr. Charles Porter which took place at his home Tuesday at 2 o'clock. Interment was made in Denton Cemetery.

LACK OF TACT

"Mrs. Blank is positively tactless."

"Tactless! Why that woman would wake her husband out of an afternoon nap to show him her dressmaker's bill."—Boston Transcript.

HOUSECLEANING ?
We have large sheets of paper, suitable for laying under carpets. Only 5c a bundle. Sheets are big and it only takes a few for each carpet.

C. LESLIE WALLS
General Hardware
Law Building Denton, Md.

FARMER JONES was progressive. He believed in good barns, good outbuildings. But there he stopped. He thought that fire insurance was too expensive. "Would never need it, either."

One day a pile of straw and litter caught fire. From a small fire it became a big one. It consumed his barn, and seriously damaged his homestead.

—and Farmer Jones lost EVERYTHING! He was not insured!

Are **You** Farmer Jones? Where would **you** be if your property was consumed? Remember every day of the year fires are busy devouring the work of years. It may visit you **tonight.** Tomorrow——?

Be safe—be sure—INSURE—at once, **Today. Let us tell you how little fire insurance really costs.**
