IN MEMORIAM

"In memory of my dear mother, Catharine M. Potts, who departed this life May 28th, 1922.

Sleep in peace, my dearest mother,
Thou art happy, thou art blest;
Earthly care and sorrow ended,
Naught can break thy holy rest.

Never did a heart more faithful
Throb within a human breast
Than the one now still forever
Passed into eternal rest.

Daughter, Mary E. Thompson"

McCormick-Deering Two-Row Cultivators

DOUBLE your cultivating capacity with a McCormick-Deering two-row. It is one of the steps toward lowering the production costs of row crops.

The gangs shift in pairs, making dodging just as simple as with a single row cultivator. The gangs on each side also lift together, thereby saving time at the end of the rows. The wheels pivot to guide the cultivator, and the gangs can be locked to shift at the same time on the cultivator frame. It assures clean, accurate cultivation.

Although the President of the United States can draft the National Guard for foreign service, yet the purpose of this organization of well trained men is for defense and handling local situations.
