MOTHERHOOD WOMAN'S JOY

Suggestions to Childless Women.

Among the virtues of Lydia E. Pinkham's Vegetable Compound is the ability to correct sterility in the cases of many women. This fact is well established as evidenced by the following letter and hundreds of others we have published in these colums.

Poplar Bluff, Mo.—"I want other women to know what a blessing Lydia E. Pinkham's Vegetable Compound has been to me. We had always wanted a baby in our home but I was in poor health and not able to do my work. My mother and husband both urged me to try Lydia E. Pinkham's Vegetable Compound. I did so, my health improved and I am now the mother of a fine baby girl and do all my own house work."—Mrs. ALLIA B. TIMMONS, 216 Almond St., Poplar Bluff, Mo.

In many other homes, once childless, there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong

CASTORIA

[Cut this out and save for reference].

HOW TO CAN

General Directions for Canning Early Fruits and Vegetables.

1. SOFT FRUITS. Such as blackberries, dewberries, huckleberries, sweet cherries, apricots and peaches. Can the same day as picked, if possible. Grade and rinse the fruit by pouring water over it, through a strainer. Seed cherries and remove stems. Pack immediately in glass jars. Add boiling hot syrup made by boiling 3 quarts of water and 2 quarts of sugar to a thin syrup; cook long enough to dissolve all the sugar without making a sticky syrup. Put rubber and top in place and partially tighten the cover. Place jars in a boiler with a wooden rack in the bottom, fill up with hot water until the water covers the jars. Boil 16 minutes from the time the water begins to bubble. Remove jars, tighten covers, invert to cool and and test joints

2. ROOTS AND TUBER VEGETABLES. Carrots, parsnips, beets, turnips, sweet potatoes. Wash thoroughly, using a vegetable brush. Blanch in boiling water according to the table, from 5 to 10 minutes, according to tenderness. Sweet potatoes should be parboiled. Plunge in cold water, scrape or pare to remove skin. Pack whole or in sections. Add boiling water and one level teaspoonful of salt to each quart. Do not add any water to sweet potatoes. Place rubbers and caps in position, partially seal and boil as directed above 90 minutes. Have the water in the boiler to cover the jars.

3. PEAS, STRING BEANS, LIMA BEANS, OKRA, ETC Can the same day they are picked, if possible. Prepare as for the table, blanch in boiling water from 2 to 5 minutes. Remove and plunge in cold water. Pack in jars, add boiling water to fill crevices and one level teaspoonful of salt to each quart jar. Place rubbers and caps in position, partially seal, put in boiler, fill up with hot water to cover the jars and boil 120 minutes. The full two hours boiling will insure success. Tighten covers and test.

Do not have an empty jar in your home next fall and use all wide necked bottles and glasses for jams, jellies and preserves, and seal with cork, paper or parafine. Put fruit juices in ordinary bottles.

Reserve all tight sealing containers for canning and concentrate products so that each jar will hold as much food and as little water as possible.

Dry all foods that can be dried. Navy beans and Mature Lima beans are fine when dried for winter use. There is a very good fruit and vegetable drier on the market, costing six dollars. This drier can be used on any cook stove, no matter what kind of fuel is used, wood, coal, coal oil or gasoline.

Produce in your gardens, cabbage, potatoes and root crops that can be kept for winter without canning.

BY THE KENT COUNTY PREPAREDNESS COMMISSION.
