BOISTEROUS CONDUCT

MESSRS. EDITORS KENT NEWS:—

The writer's attention has been attracted for some time to the great number of negro boys, ranging in age from probably 8 to 16 years, that are now seen on our streets. Whether the number really is greater than ever before, or whether from some cause more of them are making their appearance on the streets, it is difficult to say; but it is a fact that they are fast becoming a nuisane. They are very much in evidence wherever one goes—at the depot, at the wharves and in the shops—but they are more particularly a nuisance on the streets in the business section of the town, where they congregate in large numbers, and their loud boisterous talk, plentifully interlarded with profanity and other obscene language, is very annoying, not only to pedestrians, but to the residents and merchants of these sections. Most of them are found with shoe-shining outfits, and taking their stand in the most public places of the town, their shrill cries to every passer-by for a "shine or polish," together with their general disreputable appearance and rowdy antics, cause an uproar and disorder on the sidewalks that should be suppressed.

If the Government could find some way in these strenuous war times to utilize this class of idle youngsters, it would be a blessing to the community. It seems that the effort to educate them is only tending to make them more idle, thus illustrating the old maxim that "a little learning is a dangerous thing." While corporal punishment is not looked upon with favor by learned scholars of to-day, and the proverb of the wise Solomon to "spare the rod and spoil the child" has been relegated to the dust heap, we still believe that its vigorous application in the case of these young negroes would have a salutary effect.

CITIZEN.

THE Life Saving crew at the Green Run Life Saving Station, located below Ocean City, nabbed a fine prize last week when they discovered a sperm whale about twenty-five feet long on the beach. The whale had evidently been injured at sea and floated in dead. When discovered, life had been extinct only a few hours and the crew of the lifesaving station got to work at once to save the sperm oil which is found in the head of this specie of whale where the brains are usually located in other animals. After working for several hours, a barrel of this sperm oil wat taken from the head of the whale, every drop of which was zealously saved because of the extreme hign price which at it sells. At the present time this sperm whale oil is quoated at one dollar per ounce, and as the crew of the life saving station secured one barrel it is easy to see what a rofit they had in finding this monster.

THE State Board of Education has just issued a very interesting bulletin, "One Year of Compulsory School Attendance in the Counties of Maryland," reporting the experiences of the several counties last year in enforcing the attendance law and showing increases in attendance by counties.

The increase in the average daily attendance in the public schools of the counties for last year was 8,240, while the increase the year before when attendance was not compulsory was only 905. Although many more pupils were brought into school through the operation of the law, there was an average of 8,240 more pupils present each day throughout the year than during the preceding year. Since the term for colored schools was lengthened in most counties, and since the demands for child labor were more acute, owing to industrial conditions produced by the war, an increase of 8,240 in average attendance is an excellent showing.

State Superintendent of Schools, M. Bates Stevens, estimates that at least 5,500 of the children were held in school by the work of the school attendance officers. Outside of Allegany, Baltimore and Carroll counties few arrests were made.

CAN SELECT SERVICE DESIRED

For the information of the drafted men in your county who have not been called to report for examination, I would thank you to give the following notice publicity through the columns of your paper in your next issue.

"Word has been received at the United States Naval Reserve Force Enrollment Office, Baltimore, that all men who have been drafted and not called for examination have the privilege of selecting the military or naval service they desire until December 15th, 1917. After this date all men in the selective draft will be examined and classified for the National Army."

The seacoast of the United States is divided into Naval Districts. The Fifth Naval District embraces the entire Chesapeake Bay and the seacoast from Assateague Inlet, Virginia, to New River Inlet, North Carolina. In Maryland the boats patrolling our waters are known as Squadron 8, which includes all the boats formerly in the Maryland Oyster Navy.

The U. S. S. McLane, flagship of Squadron 8, visits all districts every two weeks and its commanding officer is authorized to enrolled men for the service directly on the steamer, where a naval surgeon is stationed for the purpose of making a physical examination. If you have the desire to enroll in this service you may communicate with your postmaster or one of the captains of the local boats of Squadron 8, (formerly the Maryland Oyster Navy) or by writing to the Commanding Officer, U. S. S. McLane, 512 Munsey Building, Baltimore, Md., and arrangements will be made whereby you may be enrolled without expense to you.

An experienced waterman having handled oyster vessels in the Chesapeake Bay may be enrolled as boatswain's mate which pays from $41.00 to $61.00 per month, others who are thoroughly familiar with marine gasoline engines may be enrolled as machinists mates with pay from $52.60 to $66.50. Firemen receive from $32.20 to $46.50, oilers $48.70, seamen $35.90, coxswains $41.00, cooks $35.50 to $66.50, waiters from $32.50 to $34.50, each being provided with clothes to the value of $60.00.

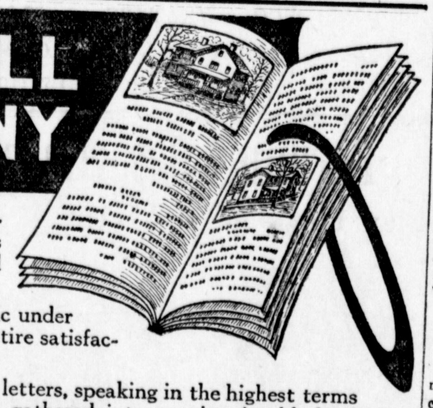
A BOOK FULL OF TESTIMONY



Thousands of Caloric Pipeless Furnaces are owned by as many people—in city, town and country, all over the land.

These owners installed the Caloric under a distinct and definite guarantee of entire satisfaction, or the removal of the furnace.

Hundreds have written voluntary letters, speaking in the highest terms of the Caloric. These letters have been gathered into a quite sizeable book that you may read for yourself if you will call and ask for a copy. This book is

Proof Positive That the Caloric Operates Perfectly and Saves Money

for the operator. In fact, the Caloric **is guaranteed** to make a warmer house on less fuel than any other furnace or heating system. The average amount of fuel saved—as these letters show—is 35%, and the average comfort obtained is 100%.

Do you know of any house-heating system that will beat this record?

The Caloric is a **one register** furnace. It heats by a natural warm air circulation. Its heat isn't cooled down passing through long crooked pipes, but rises freely and without hindrance from room to room till the whole house is delightfully comfortable. Scientists say that circulated heat is most healthful, and Caloric owners find it true—The Caloric is a perfectly healthful home heater.

You can install the Caloric in any home, new or old, and cheaply. In fact, a cellar isn't absolutely necessary—a pit under the house will do.

We have a Caloric set up and will be delighted to point out its many advantages and money-saving qualities.

Come in and read our surprising guarantee—no other heater can or does make one like it.
