Will be exposed to sale at Public Auction or Vendue, on the 1st day of February next, at Belle Air, the county town of Harford, Maryland,

The New Blast Furnace,

Situate on the Public Road, leading from Kirk's (commonly called Peach Bottom Ferry,) thro' Belle Air to Baltimore, and near the old noted Mill and Homestad of Mr. Ashmore. This Furance was lately erected on a large scale, an over shot wheel, thirty feet diameter, of excellent plan and construction, and of the best materials, and large Tub Bellows with all the harness complete, the stack of Stone Work (well secured with heavy Iron bars) about 30 feet diameter at the base and 30 feet high; large Bridge and Casting House, 3 Dwelling houses for workmen, with work shops and stables sufficient for the establishment. Also, a good Stamping Mill, detached from but very convenient, being worked by the same steam below; the water power is amply sufficient in all seasons without risk of inundation or damage to the dams and races. Appendant to this property is a lease on a bank of very rich Iron Ore (called Black Oxyde or Steel Ore) apparently inexhaustable and of easy access, there are also appearances of several veins of other good Iron ore within common hauling distance not yet explored, and a large scope of young growing woods in the vicinity to the north, the east and the west, extending to the state ridge. Upon the whole of these qualities and conveniences it is conceived it would in the hands of a person well skilled and experienced in working the black Oxyde or steel ore be a very valuable establishment. It is situate about 5 miles West and directly opposite the head of the Canal which empties into the tide water of Susquehanna. This water power and scite would it is believed (if not kept up as a furnace) answer well for a large manufactory of Wool, Cotton, &c. There is also a lot of good thriving woodland on the state ridge of about 30 acres, to be sold separately at the same time & place, one of the proprietors being lately deceased, it will be sold to close to the concern.—Title indisputable. Terms will be made known at time of sale. For view or information apply to the subscribers on the premises.

130 Dollars Reward.

Absconded from Georgetown, where he was bound to a Blacksmith, a Negro Man called SAM, about 24 years old, 5 feet 10 inches high, slender and very black, oval face, a scar over one eye, stands generally with one foot forward, and seems to drag his feet, having a very slovenly walk, notwithstanding is very active and healthy, apt to get drunk, and very quarrelsome; he is a good Blacksmith, and probably will endeavor to hire as a free man. He is well known to most of the stage drivers, as the man with whom he lived did all the work for Mr. Crawford's tavern.——He went away the 5th July, and was apprehended at M'Coy's, between this and Baltimore, but escaped the same night; he was again seen and taken, at Gunpowder Ferry, between Baltimore and Susquehanna, about the last of October, but escaped again.

I will give one hundred dollars if said Negro is lodged in Baltimore jail, and information given so that I get him again; or one hundred and thirty dollars if put in jail at the City of Washington.

WATER POWER.

TO MILLERS, MANUFACTURERS, AND LAND OWNERS.

It is well known, that in the general mode of applying the power of water to machinery, by means of water-wheels, a great proportion of the force is lost; and that so much of the force as arises from a fall exceeding 30 feet, can hardly be turned to any account on a single over-shot water wheel—This defect is obviated by the Hydrostatic Engine, (a substitute for the over-shot wheel) patented to S. H. Long, and George F. A. Hauto; which, with a head and fall of about 30 feet will produce double the effect of the over-shot wheel, and by means of which, the whole power of the greatest fall can be used.

The Hydrostatic Engine is simple in its construction, not apt to get out of order, can be made by a common carpenter, and at about one half the expence of the water-wheel.

In situations, where is much fall, and very little water, and where little or no power could be got by means of the over-shot wheel, by using this engine, a proportionate great power can be obtained.

A Mill at Mr. Bayly's in Germantown, put in motion by such an Egnine, with 25 feet head and fall, an expenditure of 100 gallons of water per minute, grinds 20 bushels of malt (found equal by experience to five bushels of wheat) per hour. One of the best over-shot Mills in the same neighborhood with 25 feet head and fall, an expenditure of 400 gallons of water per minute, grinds only three and a half bushels per hour.

The engine now at work at Mr. Bayly's, may be seen. Licenses to use them, (which will be very reasonable) treated for, and information on the subject obtained, by applying to

A Sovereign remedy for cold, obstinate coughs, catarrhs, asthmas, sore throats and approaching consumptions.

I was attacked with a most violent cold, a severe cough and pain in the breast, which continued to grow worse—during which my appetite failed and my voice altered so much that it was with the utmost exertion I could pronounce a single sentence louder than my breath. Some of my friends having observed to me that much good had been done by the use of Lee's Elixir, advised me to procure a bottle from Messrs. Warner & Hanna, which I accordingly did—and to those persons unacquainted with the merits of this medicine, it will appear astonishing that three does should remove the pains in my breast, and the use of one bottle only restored me to perfect health.
