"There's the Telephone!"

Promptness in answering a telephone call is a mark of courtesy shown to the caller. It is also a help to the operator, for it enables her to complete the call and give her attention to others. Folks should answer calls promptly if only for a selfish reason, for sometimes the calling person gets tired of waiting—and "hangs up." Should this occur, don't blame the operator when she asks you to "Excuse it, please."

The Spreader Comes First

Nothing in America is more important than the success of the 1918 crop. Of all the means at the farmers' command for increasing the crop, a good manure spreader easily comes first. It requires no addition of power or help, in fact it saves time and labor. **It increases the yield from every acre in which it is properly used.** This is the year, and this is the month to buy and begin to use a

Low Cloverleaf Manure Spreader

The Low Cloverleaf is a wide spreading, easy running, light draft, narrow box spreader, made in three handy sizes—small, medium and large. The wide spreading device catches the manure as it comes from the beater, breaks it up into still finer particles, and throws it out beyond the wheel tracks in a wide, even spread. This is the kind of fertilizing recommended by all the authorities.

The entire load is spread in 3 to 5 minutes. The machine runs easily and lasts a long time because the working parts are all securely fastened to a sturdy steel frame which keeps them all in place and in line.

The Low Cloverleaf spreader is backed by International Harvester reputation for quality machines. It does the work as it should be done. This year of all years you should have a good spreader and you will profit most by using a Low Cloverleaf. Immediate delivery. Place your order now.

The attendance for the three days, while not as large as in former years, due to the rains of Tuesday and Wednesday, yet there were between five and six thousand paid admission and from a financial viewpoint the week was considered a success.

The exhibits of fancy work, canned goods, household and garden products, poultry and domestic science demonstration, all under one large tent, was the centre of attraction throughout the week; the exhibits were the finest ever displayed at the local fair. The Girls Canning Club and Women's Departments were under the supervision of Miss Annie Cooper and Mrs. Belle Smith, while Miss Mabel L. Stephenson, District Agent of Home Economics for the Eastern Shore and Miss Hettie I. Newnam, County Demonstration Agent for Queen Anne's had charge of the domestic science department and gave demonstration in canning, drying and the making and baking of yeast and quick breads and sugarless cakes. A great many labor-saving devices for the home were on exhibition. The farm and garden products department were in charge of County Agent L. L. Burrell, who gave them his untiring attention.
