Plan Tour For Farmers To Chicago World Fair Soon

McVean Says Wheat Plan Will Continue. Cattle Control Program Underway

Authorities Advise Farmers To Save All Their Hay

Following the example of the successful tour to Chicago's World Fair last year, in which nearly twenty Kent countians joined, a similar tour is arranged for Maryland farmers by the Maryland Farm Bureau and the Extension Service.

Low rates will prevail as last year. Choice of two tours is available—one sponsored by the Maryland Farm Bureau goes August 17-21; the other sponsored by Lelaware Granges and Extension Service is a few days earlier, August 12-15. Both tours are mentioned so that people may choose the one most convenient for them. The Maryland Tour plan allows of three days at the Fair, while the Delaware Tour covers two days at the Fair. It is probable that extra time at the Fair will be granted by the railroads conducting the Tours, provided, of course, the tourist pays for the extra lodging and meals.

The Century of Progress Exposition is a wonderful display—highly educational, interesting and stimulating. No one can hope to see one fifth of the sights in two or three days, but you can see an "eveful" of the exhibits that interest you most. Those who went last vear want to go again this year. Anyone who can make this tour owes it to him or herself to do so. Doubtless there will be no other Exposition available to this generation to compare with the Chicago Show.

Your County Agent will have full information and will help with your applications.

Cattle Disease Control Program Under Way — Voluntary Plan Offers Dairy Relief.

One step toward improvement in the dairy situation is getting under way as the result of very recent action by Congress. The Act provides funds for the completion of T. B. eradication and an attack on Bang's Disease as contagious abortion is technically known.

The tuberculosis situation in Kent is so well in hand that main interest in this county will be in the attack on Bang's disease.

Details of the plan will be available at the County Agent's office. In general the plan is similar to that for T. B. eradication. A blood test is used to classify cows into positive and negative groups. Positive reactors are destroyed as are tuberculosis reactors. Owners will receive indemities as in tuberculosis and in like amount, $20 a head for grade animals and $50 for purebreeds and whatever salvage value results from the slaughter of the animals; provided, that the total of both indemity and salvage may not exceed the appraised value of the individual animal. Herds that are clean or as they "clean up" will be accredited as with tuberculosis.

Gang's disease is present in many Kent herds. It lowers production and profit very materially. Many farmers are "cow poor" since they have enlarged their herds due to the low price for cows on the market. Such farmers have cut down on feed so as to keep milk production at former level. The plan offers opportunity for farmers to clean up their herds, to remove the reacting cows at full value—to remove the source of loss, to reduce the cow population materially and to make it possible to produce milk more economically through better feeding and through increased production from the smaller number of cows kept. The plan is worthy of careful consideration as a health measure.

The plan is entirely voluntary. Doubtless it will apveal to many. The plan is very successful for those who will follow it carefully. Not every one will enroll nor will every one be 100 per cent. efficient in following the plan. Cattle sold for inter-state trade are in many States required to have passed the blood test before they can be shipped. For details see the County Agent.

Save All Your Hay Is Advice Of Specialist.

Maryland farmers are likely to profit by saving just as much as possible of the unusually large hay crop in the State this year, in the opinion of F. W. Oldenburg, specialist in agranamy for the University of Maryland Extension Service. He states that instances have come to his attention in which farmers are considering leaving a portion of their hay crop unharvested due to the fact that all the facilities on their farms ordinarily used for storing hay are occupied.

Mr. Oldenburg points to the fact that the hay crop is exceptionally short in large sections of the country and the demand for feed to care for livestock is almost certain to be very great. Already, he says, hay is selling at high prices and he believes that the prices will increase.

It is the advice of this specialist that all the hay in Maryland this year that is fit for food should be harvested and stored in the best manner that conditions on individual farms will permit. In his opinion there will be demand for it at attractive prices.

Wheat Plan Continues

"The AAA announces that the Wheat Production Control plan will be continued practically unchanged next year," states County Agent McVean.

The benefit payments per bushel will remain at twenty-nine cents to the farmer while the processing tax remains at thirty cents per bushel.

The percentage cut in acreage will be no more than 15 per cent. and may be less depending on the outcome of the Inter-National Wheat Conference. Definite announcement will be made in August.

Each day it becomes more and more apparent that the holders of a wheat contract is fortunate. It is true that some people contend that Nature's control measure is more efficient than the AAA plan. That may be true, but Nature's plan is far harsher and more severe than the AAA plan. Certainly it is better to distribute the production control over the whole county than to have the entire crop in large sections destroyed by nature. It is hard for us to realize and appreciate the effects of Nature's ruthless reduction on women and children to say nothing of the loss of terms, etc. Possibly, also we do not appreciate how much the "crop income" insurance feature of the AAA control plan will mean to the drought sufferers. Certainly the sufferers will look upon the benefit payments as a God send. Twenty-nine cents per bushel on fifty four per cent. of the average crop (1930-31 and 32 crops in some cases and 1928-32 crops in others) means millions of dollars of income to neutralize Nature's ruthless production control plan. Cooperative team work in reduction as in other effort is powerful, gentle, efficient and constructive.

Capt. Harry Newnam, commander of the ferry steamer Express, of the Tolchester Company's fleet, has tendered his resignation to the company officials after a service of 25 years with the company. He is a brother of James B. Newnam, of Chestertown. Capt. Hall has been appointed commander of the Express, which is making daily round trips between Baltimore and Tolchester Beach to handle the automobile troffic.

ORDINANCE NO. 60
Passed by the Mayor and Council of Chestertown, Maryland, on the 2nd Day of July, 1934.

It shall be unlawful for any person to drive a Truck from the corner of High Street through Front Street to Maple Avenue except to load or unload said Truck. Any violation of this Ordinance the offender upon conviction shall pay a fine of not less than Five (5.00) Dollars and the costs of prosecution, such fine and costs to be collected as provided by Law.

MAYOR AND COUNCIL OF CHESTERTOWN
By C. N. Satterfield, Mayor.
Thos. D. Bowers, Clerk.

PRIMARY SET FOR SEPTEMBER 12TH

TWO PARTIES AGREE ON THIS DATE

The primary election will be held in Maryland this year on Wednesday September 12, Defenders day, in accordance with an agreement signed Tuesday by J. Enos Ray chairman of the Democratic State Central Committee and Galen L. Tait, chairman of the Republican Stat Central Committee.

The agreement averts the fixing of the primary day on the second Monday of September, which, with the Tuesday succeeding, are Jewish religious holidays. Under the law the chairmen of the two committees have the right to select a date between the eighth and fifteenth of September. otherwise the election must be held on the second Manday of the month.

Mr. Ray is seriously ill in Sibley Hospital, Washington, D. C.

Oakley Valiant, son of W. K. Valiant of the Metropolitan Insurance Company, sailed from New York this week on a large steamer as cadet. He expects to be away all summer and to go as far as Panama Canal and maybe further. Oakley graduated at Chestertown Righ School and procured his position through his uncle who is in the service of the Panama Canal Co.

If weather for the 40 days starting Sunday, St. Swithin's Day, be of a similar kind, this part of the country is to experience some odd weather. St. Swithin's Day weather, according to legend, determines the type of weather for the following 40 days.

The thermometer went up to 93 Sunday, and then declined to 70 by midnight. after a storm of wind only.

Rev. Frank White Delivers Sermon In Park Sunday

Rev. C. L. Atwater Speaks Next Sunday

"The Wounds in the Hands of Jesus" was the topic of the sermon delivered by the Rev. Frank White, pastor of the Chestertown Methodist Episcopal Church at the Community Services held last Sunday evening in the park. The meaning of those wounds to us was the thought developed by the Reverend White in his sermon. Wounds speak of battle, he said, with a challenge to the church to continue to be militant. They are proof of God's love for us, with the exhortation that we love one another. They are inspirations for our worship, melting our hearts to tenderness as we consider that He was wounded for us. They point us to the heart of life. The self-denying, self-sacrificing spirit revealed in its fuliness on the Cross, he said, is the secret of all truly successful living.

The Firemen's Band rendered several selections under Prof. Van Petten's direction among which was Martin Luther's hymn arranged for quintette by W. R. McMenamin, who played with Dr. S. Holt Wright, Dodd Hadaway, Emlie Moore and Earle Capel.

The meeting next Sunday night, July 22, will be in charge of the Rev. C. L. Atwater, rector of Emmanuel Protestant Episcopal Church, who will deliver the sermon. The Chestertown Volunteer Fire Company Band will play during the services which begin at 7 P. M. and last for one hour.

CHEVROLET

520,000 IN SIX MONTHS

A Record Breaking Demand has sent Chevrolet production to its highest total in four years.

Since January 1st, Chevrolet has produced more than half a million cars and trucks. This tremendous total has broken all Chevrolet records for the last four years. And here is the reason behind it: No other manufacturer has so much to offer as Chevrolet.

Chevrolet is the only low-priced car to give you patented Knee-Action, and only *patented Knee-Action* gives you *shock-proof steering* combined with the new jolt-proof gliding ride. Chevrolet alone in its field provides *Fisher bodies with genuine No Draft Ventilation*—the safest and most comfortable bodies built today. No low-priced car but Chevrolet has safe, sure, *cable-controlled brakes, the sturdy Y-K frame,* and a dozen and one other important features. Do you wonder that the trend is to Chevrolet?

Let these features guide you when you buy your low-priced car. Don't accept anything less than all of them. And let yourself be guided by Chevrolet's popularity. As everyone knows, every buyer of a product is a recommendation, and Chevrolet can show you hundreds of thousands of them in only six short months!
