Dairymen Are At Odds Again

INTERSTATE ASSO. DIVIDED ON MILK POLICY

The Interstate Milk Producers Assocation is again a divided house, with the issue this time the policies of the State Milk Control Board.

Directors of the organization Saturday voted to ask Governor Pinchot to remove the three members of the board, and Monday the Allied Dairy Farmers' group attacked the move as a "last desperate measure to protect the dealers at the farmers' expense."

Ousting of the milk board will be sought at Harrisburg by a delegation representing the directors. The attack on the board's policies, said Benjamin H. Welty, Interstate president, will center on the recent order eliminating the basic-surplus plan of controlling each farmer's output and deciding the price paid him for his product.

By banning the basic surplus system the board has increased the farmers' milk checks 75 cents to $1 per 100 pounds," replied Daniel Buckley, secretary of the allied faction which last month lost it fight for control of interstate.

"The dealers are now compelled to pay the farmer according to the use to which they put his milk. No longer can they pay for milk at class 2 prices and sell it as class 1.

"Failing to influence the board by personal visits, officers of the Interstate are now turning on it in a last desperate measure to protect the dealers at the farmer's expense.

"The Allied is going to fight for the milk control board."

MORE "AMOS," AND "ANDY" NEEDED IN GOVERNMENT

One of the laugh-making gags of the famous "Andy 'n' Andy" radio team has been Andy's habit of going in for vast imaginative financial flights, in which he mutters, "One million, two million, five million," and so on, in figuring impossible profits on some fantastic scheme.

Many present-day plans presented to long-suffering citizens and taxpayers by high-pressure politicians, are reminiscent of Andy. The public officials talk of one billion, five billion, or ten billion dollars without regard for the sources from which the money is to come. They issue bonds—and hope that public treasuries will be able to meet them when they fall due. Like Andy, they look forward to a rosy future in which dollars will grow on trees, and budgetry difficulties will be a thing of the past.

It is easy for those who hold comfortable governmental jobs, and are spending money that belongs to someone else, to figure in millions and billions. But the people, like Andy's creditors, are becoming skeptical. They know that political extravagances mean that taxes must soar in the future—they are beginning to realize that means that businesses and individuals will have less money with which to build factories and homes and employ labor, and buy the articles commerce and agriculture must sell if they are to survive. They begin to understand that money is diverted from productive business when investors are afraid of extortionate taxes and hide their money in tax-free government bonds where it does nothing to keep the machinery of trade in motion.

Too many of us think of those billions as we think of the far planets—they seem to have nothing to do with us. We should think of them as barriers to employment, to industrial expansion, to recovery. It is a historical fact that excessively expensive government is the best ally of depression.

Yes! We do need more "Amos" and "Andy" in every division of Government.

NOTICE TO CREDITORS

Notice is hereby given that the undersigned has obtained from the Orphans' Court for Kent County letters Testamentary on the personal estate of

LEMUEL MARK,
late of said county, deceased.

All persons having claims against said deceased estate are hereby warned to exhibit the same, with the proper vouchers thereof, to the undersigned on or before the 7th day of January, 1935, otherwise they may by law be excluded from all benefit of said deceased's personal estate.

All persons indebted to said estate must settle at once.

Given under my hand this 3rd day of July, 1934.

ADDIE V. MARK,
Executrix.

C.W.KIBLER & SONS

LOCAL BOYS ARE AT CAMP WRIGHT

Camp Wright, on the Chesapeake Bay, near Matapeake, established several years ago through the generosity of the late DeCourcey W. Thom, of "Blakeford," Queen Anne's county, successfully completed the camping period for the girls, and on Wednesday opened the season for boys. The camp will officially close on August 3.

Rev. Mr. Wyllie, of St. Paul's, is assisting in the work of the camp.

The boys who went to camp last week were—Hiram K. Dudley, and Thomas H. Callahan, of Queenstown; Clarence Pindar, J. O. Pippin, Jr., Charles Kenley Day and Franklin Richard Day, of Centreville; Allen A. Harris and John Thomas Kibler, Jr., of Chestertown; Wm. Rodgers Wilson, 3rd and Alday Clements Wilson, of Ingleside; Richard Norton Foley, of Talbot county; WilliamM. Mallalieu and Wm. M. D. Roe, of Sudlersville.

Swimming, basketball, tennis archery, track, jumping and games of various sorts also handcraft and campcraft yere among the camp activities for the boys, while the girls will enjoy swimming, water sports, tennis, archery and their athletics suitable for girls.

A pleasant picnic was enjoyed Saturday afternoon sponsored by The Chestertown Ice Plant in honor of the ice cream recipe winners. The gathering took place on Mr. Julian Jones' lawn and no host nor hostess could have been more hospitable. Readings by Mrs. Clarence Fowler and music by H. G. Nicholson, Jr., and Charles Clift were features of the entertainment while fried chicken and ice cream were furnished in abundance.

Reduce Dues For Chamber Commerce

WILL CANCEL BACK DUES IN ORGANIZATION

A membership meeting of the Kent County Chamber of Commerce was held at headquarters on Monday evening, July 23. Letters notifying each member of a proposed change in the constitution and by-laws were sent out to and received by the members two weeks before the meeting in keeping with regulations governing a possible change in the constitution.

All dues were changed from $12 to $6 annually; the change to go into effect as of July 1, 1934, when the fiscal year begins.

It was further agreed to cancel all dues in arrears up to January 1, 1934. In other words, if a member was in arrears for a year or more all he would now be asked to pay would be $6.00 from January 1 to June 30 and $3.00 beginning July 1 and completing the year to December 31, 1934. Those who paid dues in full for 1934 under the former ruling will be carried through into half of next year.

Richard H. Collins and Wroth Stavely were appointed as a membership committee.

A cordial invitation is extended to all county people and particularly to the newcomers in Kent to join the organization and bring to it their ideas and energy to help Chestertown and Kent progress along substantial lines.

Dollar Wheat

(From The New York Herald-Tribune)

Wheat crossed the dollar mark for the third time in the last four years on Saturday, when December futures at Chicago touched $1.01½ and closed at $1.00⅝. It was in August, 1930, that wheat first broke through the dollar level on the down side, not to recross that mark until the speculative boom of the spring and summer of 1933. After that boom, which was based chiefly on the expectation of inflation, and which saw wheat rise to $1.28 a bushel, prices sagged again and there was no more "dollar wheat" until early June.

The rise in wheat during recent weeks has not been of the highly speculative type of a year ago. It has been based almost entirely on the extraordinary rapid change in the statistical picture of the crop in the last three months—a change accounted for by the unprecedented drought damage in the West and Southwest in April, May and June.

The winter wheat crop, if present estimates hold, will be the smallest, measured in total volume, since 1893; measured on a per capita basis, it will be the official esttmate was made, that covering the year 1849. The short wheat crop has been accompanied, however, by severe deterioration in the other breadstuffs, which is one reason why its impact has been felt so substantially in the market. Corn production is estimated at the lowest figure, with two exceptions, in forty years; production of oats threatens to be smaller than in any year since 1890, and the rye crop is shaping up as the smallest since 1874.

More important than historical comparisons, so far as the wheat crop is concerned, is the swift reduction that has been brought about in the burdensome surplus as a result of two successive short crops. The American carry-over of wheat a year ago was approximately 345,000 000 bushels. As disappearance during the last twelve months (including subsidized exports to the Orient) amounted to 638,000,000 bushels, or 110,000,000 bushels more than was actually produced, carry-over at the end of the present crop year should be brought down to around 235,000,000 bushels. If present estimates of the new crop hold and domestic requirements own to 610,000,000 bushels (the same as during the last year), another 126,000,000 bushels would be loped off the surplus which has depressed prices so severely for the last several years bringing the latter down to around 100,000,000 bushels, or no more than a safe and normal carry-over.

Letters To The Editor

Editor KENT NEWS,
Dear Sir:

Mr. Frank K. Roe, in his courteous article in last week's KENT NEWS, referring to the Christian Science propaganda in issue of May 12, entitled "The New Revelation," claiming Mrs. Eddy had the same authority as Jesus Christ as a divine teacher because of a special revelation, tells us that the article was "informative as to Christian Science", and that "facts were simple and reasonable, and should be readily grasped by any one with a reasonable mind."

Setting aside for later notice his intimation that my criticism of that article "may have created wrong impressions," permit the writer to assert that his statements were equally "informative" in that they showed Mrs. Eddy's claims to be a divine teacher because she had thousands of adherents, and her students practiced healing, proved absolutely nothing, since, unlike Jesus Christ, she gave no proof of being divinely authorized to make a "New Revelation" by working miracles, and also that others, like Joe Smith, the founder of Mormonism and it's thousands of disciples, and Mohammed with his millions, likewise claimed to have had a "New Revelation," and "A Key to the Scriptures."

While it is a freely admitted fact that "Christian Science is bringing healing to thousands," yet it is equally true that thousands of testimonials and proofs are in evidence of cures affected by Faith Healers and Dowieites, not to mention the far outnumbering thousands who testify to the healings by surgeous and regular medical practioners.

But, reader, there is a strange circumstance connected with Christian Science healing that differentiates it from all others. Prof. Hering, one of its most famous sponsors, says: "The Christian Scientist knows that in reality there is no sick man to treat." Mrs. Eddy denies the reality of a material body, the reality of disease or pain. They are all illusions of mortal mind." What a religion of inconsistencies! It denies that disease has any existence, and yet claims that it heals disease. If disease has no existence, there is, of course, nothing to heal. We are reminded of the incident of the Christian Scientist, who, meeting Johnny, inquired, "Well Johnny, how is your father?" "Father is sick, sir." "Oh, no, Johnny, your father is not sick. He only thinks he is." Meeting Johnny a few days later he made the same inquiry, and received the reply, "Father thinks he is dead, sir."

I thank Mr. Roe for calling attention to the only wrong impression I may have made in my criticism, and that, of course, unintentional I refer to the sentence; "Owners of Mrs. Eddy's Key To Health, we are told, are prohibited from even lending it." It was several years ago that we read that statement in connection with some Christian literature. Whether true at that time or not, we are now informed that it "can be obtained from most public libaries."

If so, we urge our readers to secure the loan of a copy from some library or Christian Science acquaintance, and read "it alongside the New Testament, especially the four gospels, and discover for yourselves how Christian Science flatly contradicts every teaching of the scriptures concerning the personality of God, the deity of Jesus Christ, the existence of sin, the need of salvation through faith in the blood atonement of the Saviour, and the resurrection of the body. If any fails to discover these denials, the writer will undertake to reveal them.

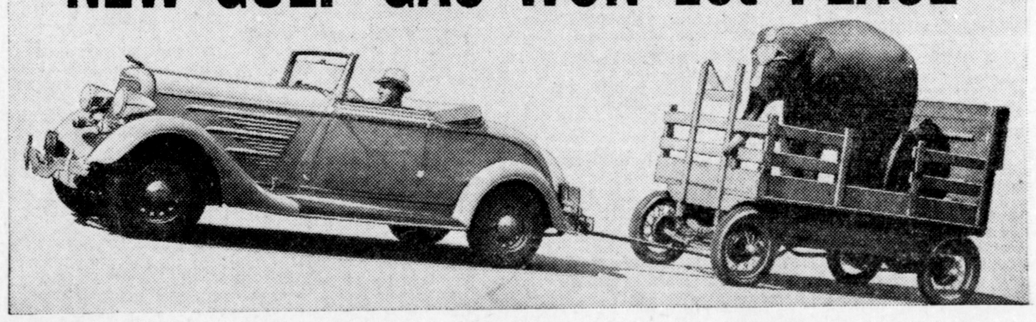
IN 10 OUT OF 15 POWER TESTS NEW GULF GAS WON 1st PLACE



LOADS LIKE THIS—on steep mountain grades tax the power of any gasoline. But in 10 out of 15 power tests Gulf won first honors. See chart below. (All tests certified by a Notary Public.)

RECENTLY, 33 gasolines competed in power tests made on famous American hills from Massachusetts to Georgia.

Object? To see which of various gasolines bought at local service stations in each test area could take a car and heavy load farthest up mountain grades before the motor stalled. The motor was kept in high gear.

Results? Gulf won more of these power tests than 32 other gasolines combined!

Study the chart below. Then drive to any Gulf station—and see for yourself that *there's more power in that Good Gulf Gasoline!*

© 1934, GULF REFINING CO., PITTSBURGH, PA.

EACH OF THE COMPETING GASOLINES is indicated on the chart by a letter—A to Z6. Note that Gulf gas was *uniformly best!* Other high-ranking gasolines varied widely in different tests.

HOW 33 GASOLINES RANKED (IN ALL TESTS TO DATE)

All gasolines tested, except a few "third grade" brands, sold for approximately the same price as That Good Gulf. Each brand is denoted by a letter.
