When you must stop QUICK You *CAN* on Concrete

You're driving on a residential street. Suddenly, from behind a parked car, a boy cycles into your path. Seeing you, he swerves—too sharply—and falls. Your heart jumps as you slam on the brakes. Will you be able to stop in time?

Your chances will be much better if you're driving on concrete. Concrete's gritty texture grips your tires firmly, permitting you to stop fast, without skidding, even in wet weather.

That's one reason why fewer accidents occur on concrete. When you must stop quick, concrete often makes the difference between life and death. So insist on concrete pavement for all your streets.

For a real bargain — get a real truck!

SURE, you can save a few dollars now on a truck price-tagged slightly less than a GMC. But if you want a bargain that will still be a bargain after years of hard truck-work, ask these questions *before* you buy:

Does the truck give you a GMC's 105 H.P.? That's up to 19% *more* power than comparable sixes. It hustles a GMC's top loads up tough pulls—without engine strain.

Does it have a GMC's 8.0 to 1 super-high-compression? That gives you quicker getaways — more drive — better mileage. All on regular gas.

Does it offer a GMC's engine-sparing Truck Hydra-Matic*? With it, you say good-bye to gearshift wrestling. No more clutch repairs. Maintenance costs shrink.

Does it have the extra protection of a GMC's self-energizing brakes? The extra comfort of a GMC's "Six-Footer" cab? The handling ease of a GMC's ball-bearing steering action?

If all the answers are "yes," you have a *real* bargain—a GMC. And there are 19 handsome ½- to 1-ton models to choose from. How can you lose?

**Standard equipment on Package Delivery chassis; optional at moderate extra cost on all others.*
