To Travellers.

MARYLAND STEAMBOAT CO.

Daily Evening Line for Choptank River.

Commencing with Monday, March 31st, the splendid Steamers IDA and ENOCH PRATT will leave Baltimore from Pier 4, Light street, as follows:

The Steamer IDA at 3 P. M., every Tuesday, Thursday and Saturday, for Easton, Johnstons, Double Mills, Oxford, Clara's Point, Travers', Cambridge, Jamaica Point and Medford's. Returning, the Steamer IDA will leave Medford's at 1 P. M. every Monday, Wednesday and Friday, stopping at the landings named, leaving Cambridge at 5 P. M., Easton at 7 P. M. and Oxford at 10.30 P.M., arriving in Baltimore at 4 A.M.

The Steamer ENOCH PRATT at 3 P. M. every Monday, Wednesday and Friday for Easton, Double Mills, Oxford, Clara's Point, Cambridge, Jamaica Point, Medford's, Dover Bridge, Tower's, Potter's and Denton. Returning, the Steamer ENOCH PRATT will leave Denton at 12 o'clock noon, every Sunday, Tuesday and Thursday, stopping at the landings named, leaving Cambridge at 3 P. M., Easton 9 P. M., Oxford 10.30 P. M., arriving in Baltimore at 4 A. M.

Freight taken at low rates and carefully handled.

HOWARD B. ENSIGN, Prest.
Office 26 Light St., Baltimore.
R. B. DIXON, Agt. at Easton.

STEAMER OLIVE.

The Steamer OLIVE will resume her night route April 7th, 1884, as follows: Leave Baltimore, Pier 14 Light street, for St. Michaels, Tunis Mills, Claiborne and Kent Island Landings, every TUESDAY and THURSDAY at 4 P. M., and for St. Michaels, Tunis Mills and Claiborne every SATURDAYS at 10 P. M.

Returning, leave Shipping Creek at 2 P. M., Crab Alley Creek at 3.30 P. M., Claiborne 5 P. M., Tunis Mills at 6.30 P. M., and St. Michaels 9 P. M. every MONDAY, WEDNESDAY and FRIDAY.

☞ Freights for all the above points received Tuesdays, Thursdays and Saturdays until hour of sailing.

☞ Freight to all points, except St. Michaels, must be prepaid.

H. C. DODSON,
apr8-tf. General Agent.

St. Michaels and Miles River Ferry

TO BALTIMORE.

On and after Tuesday, April 15th, 1884, the iron steamer PILOT BOY will make a round trip from Baltimore to St. Michaels and Miles River Ferry, leaving Pier 15 Light St., on TUESDAYS and FRIDAYS at 7.30 A. M.; returning leave Miles River Ferry at 1 P. M., and St. Michaels at 1.45 P. M., arriving in Baltimore at 7 P. M. Fare each way 75 cents. Freight of all kinds carried at low rates. Stage connection with Easton 25 cents each way.

SPECIAL NOTICE.—The steamer Pilot Boy is an iron steamer, with first-class passenger accommodations, and good speed, and has been thoroughly overhauled the past winter. She will run on the above days until about the middle of June, when the Nelly White will be put on the route.

For further information, apply to
W. C. ELIASON, Manager,
Pier 11 Light-street, Baltimore.
J. E. Harrison, St. Michaels; S. Pippin, Easton; from whom tickets may be had.
Baltimore, April 15th, 1884.

Delaware & Chesapeake RAILWAY.

On and after Thursday, Mar 27, 1884, Sundays excepted, trains will run as follows:

I. N. MILLS, Supt.

Farmers and Merchants Packet Line.

The Schooner Mary Vickers, Clara M. Leonard and Annie M. Leonard.

The above boats are making weekly trips between Easton and Baltimore, and will do all kinds of freighting as cheap as any other line. Every effort will be made to give satisfaction. Our boats are new and built out of the very best material. Orders left with Messrs. G. E. Bowdoin & Co., Commission Merchants, corner of Bowley's Wharf and Pratt St., Baltimore, will be brought or taken at the lowest freight rates. All Grain stored in our Warehouses, in cases of fire will be owners risk. Agricultural Lime delived at the lowest prices. Feeling thankful for the past favors, we hope by strict attention to business, a continuance of the same.

C. R. LEONARD & BRO.
Office in same room with R. B. Dixon, on Dover street, Easton. [oct25,81.

A CARD.

To my Old Patrons and Friends on Miles, Choptank and Wye Rivers.

For the past 30 years I have diligently and faithfully, to the best of my ability endeavored to serve my customers to their entire satisfaction, and this is to inform them and the public generally, that notwithstanding the untrue report that I have sold out and quit, I am still in the boating business, and expect to remain in it, as long as the public sustains me. The

SCHOONER DEXTER

is in complete order, and I am prepared to freight the grain of my customers on Miles river, Wye river, or Choptank, as usual, and respectfully solicit a continuance of their business, ever grateful for past favors. Freights handled carefully and at prices as low as others. All orders promptly attended to.

The Public's Obedient Servant,
GREENBURY MARSHALL.

Orchilla Guano.

The Standard Fertilizer for Corn and Great Soil Enricher.

J. A. F. NEAL, Skipton,

AGENT FOR TALBOT COUNTY.

18 YEARS ON THE MARKET.

150 Tons sold in 1881. 3,000 Tons sold in 1883.

CASH PRICE $35.00 PER TON.

Actual Value of Orchilla Guano according to the analysis of

Dr. W. J. Gascoyne, of Virginia,	$41 12
Dr. W. H. Taylor, of Virginia,	44 19
Dr. C. W. Dabney, Jr., of N. C.,	43 97

Analysis of Orchilla Guano in Store for the Spring Sales of 1884.

No. 5 German street, Baltimore, October 25th, 1883.

Report of analysis of Fertilizer for Messrs. Wooldridge, Travers & Co. Sample of Orchilla Guano from cargo of Schooner L. Ehrman:

Moisture	18.50
Available Phos. Acid	15 81
Insoluble Phos. Acid	2 16
Phosphates of Lime	39 23

Dried will yield Bone Phosphate of Lime 45.35 per cent.

G. HENRY WILLIAMS.
Analytical Chemist.

The remarkable popularity of the Orchillas Guano has excited rivalry, and within the last year other natural guanos, in some respects resembling the Orchilla, have been placed upon the market, claiming to be as good as it has proved itself, to catch those in hunt of cheap fertilizers. These are given the names of various islands, or birds of southern waters, but their value is yet to be proved where they have not already proved worthless.

Now, the Orchilla has no controversy with these novelties. Its record is made; its value as a grain and grass producer and permanent enricher of the soil is established; and its popularity will endure and its sales increase when these worthless substitutes are forgotten. But while the imitation article is on the market, *farmers are warned to be upon their guard.*

HOW TO APPLY ORCHILLA.

As Orchilla is a reliable *soil enricher*, of course it is beneficial to *all* crops; but it is especially adapted to wheat, corn, oats, and the grasses. For *CORN* it is believed to have no equal among commercial manures. One of the best farmers in Maryland, who has used Orchilla for 18 years, and made his land rich with it, approves the following as one of the best plans of applying it to improve land:

1st year. In January or February, apply from 300 to 500 pounds to the acre, *broadcast*. In the spring plow and plant corn.

2nd year. Apply Orchilla early as before. In the spring sow oats. In the summer plow for fallow, apply Orchilla broadcast, and in the fall sow wheat, with clover or timothy during the fall or winter.

The Orchilla may be applied broadcast with most beneficial results on growing timothy or clover in the winter.

As the Orchilla is rich in phosphates, its benefits are lasting. If it does not produce satisfactory results on the first crop, they are sure to be developed in succeeding crops. Where perseveringly applied, it never fails to largely increase the crops and greatly enrich the land. As it possesses in a very high degree the property of attracting and retaining moisture, it never adds to the intensity of a dry season, like those mixtures containing a large quantity of sulphuric acid, which have a tendency to burn the crops.

Thorough tillage for corn is particularly recommended where the Orchilla is applied, for its fertilizing effects are sure to make the weeds grow, and they can only be kept down by vigorous tillage. Corn should be harrowed before it comes up, and the harrowing continued, and grass never allowed to appear. No application for corn is so popular, and a free application of Orchilla and thorough cultivation scarcely ever fails to double the crop.

Use it freely, and the increased value of the grass crops and the improvement of the land will more than pay for it, leaving the grain crops a clear profit to the farmer.

IT IS GOOD FOR ALL SOILS.

It may not act promptly on some soils, but *it is good food for all kinds of soil*, and it cannot be applied in liberal quantities without enriching the soil and improving the crops. Its wonderful effects on the farms of York county, Pa., and Harford county, Md., which for a number of years absorbed the entire importations, have become matters of history, and the constant demand for it in those counties, fully attest the satisfaction it has given. Under the magical influence of the Orchilla what was once the "York county Barrens" is now as luxuriant as a garden.

Wherever applied in other sections, its fertilizing properties have produced equally satisfactory results, and the orders now coming in justify the importers in estimating the sales for 1884 at 12,000 tons.

Remember it is a perfect manure in its natural state, and requires no mixture with other stuff to make it a fertilizer.

Wherever it has been tried on the lands of Talbot county, the results always have been wholly satisfactory, and some of our best farmers greatly prefer the Orchilla, ton for ton, to any of the high-priced fertilizers in the market.

TESTIMONIALS.

Mr. William S. Goslin, a well-known farmer of Federalsburg, Caroline county, has been using Orchilla Guano since 1876. It proved so satisfactory that he concluded to try its fertilizing effect upon worn-out land. Four years ago he bought a lot of 40 acres of dead poor land, near Federalsburg, at $2 75 per acre. He has been cultivating it since, with applications of Orchilla Guano, *and nothing else.* The *Federalsburg Courier* discloses the results in its issue of September 29th, 1883, after a visit to the cornfield by Mr. S. D. Gordon, the editor of that paper. The *Courier* says:

"We made a visit to the farm of Mr. W. S. Goslin last Saturday, and saw a 40 acre field of the largest corn we have seen since we have been in Caroline. The ears are extraordinarily large and each stalk contains two or three of them. Mr. Goslin expects to gather one hundred bushels per acre, and we do not think he will be disappointed. Three or four years ago this piece of land was only worth about $3 per acre, and would not produce ten bushels of corn to the acre. By thorough drainage and the use of Orchilla Guano, Mr. Goslin has made it equal to any other piece of land in the State. This goes to snow what a little outlay in the beginning will do to a piece of poor land. Mr. Goslin says he expects to make it produce 150 bushels to the acre next year."

Here is a piece of poor land made to produce *ten times as much* by the use of Orchilla as it produced before any was used on it. If all the farmers of Talbot would but use it to an extent to *double* their crop of corn, what a pile of money it would bring them. Remember, the winter is the time to apply broadcast for the corn crop. There should be no delay in buying it. Write to the agent at Skipton at once and order it. It can be delivered by steamer at your landing.

HEAR WHAT ANOTHER SAYS.

Mr. William Ayres, of Black Horse P. O., Harford county, Maryland, writes Nov. 23rd, 1883:

"I bought a poor farm here in 1877, on which the yield of CORN could not be made to exceed an average of *four barrels*. In January, 1878, I applied 500 pounds of Orchilla Guano to the acre, put it in corn in the spring, and in the fall gathered *nine barrels* of corn to the acre. I then put the same land in wheat, and reaped 25 bushels to the acre. I have continued to apply Orchilla every year until this time, and have increased the yield of corn to THIRTEEN BARRELS per acre."

By the use of Orchilla and nothing else, Mr. Ayres increased his corn crop in five years from 20 bushels per acre to 65 bushels per acre. Can anybody say that it will not pay to use Orchilla Guano on corn?

Mr. Ayres says that he has compared the results of the Orchilla with those produced by other fertilizers used by his neighbors, and "*always found the Orchilla far ahead.*"

MORE TESTIMONY OF THE SAME KIND.

Mr. Jacob Gross, of Jarrettsville, Harford county, Maryland, writes December 1st, 1882:

"I have written so often my high opinion of Orchilla Guano that I hardly know what to add now. The fact that I use it year after year, that so many of my neighbors are using it, and every succeeding year we all see our lands growing richer, and our crops increasing, so that every winter the only question we ask is not, shall we use Orchilla again? But *how much* shall we use this year? is better proof than anything I could write that Orchilla is just what we need and we want nothing else."

Mr. Gross further says, in a letter written June 20th, 1882:

"A gentleman came to see me a few days ago, to talk about Orchilla Guano. He said, 'Mr. Gross, I have read your letters, as published, about Orchilla Guano, and you spoke so highly of it, I am afraid you exaggerate.' 'Then,' said I, 'I won't say another word. Come out to my fields.' I took him all over my farm, and, as he looked at my growing crops, he said: 'Mr. Gross, you did not say a word too much; I never saw finer grain or grass. I am perfectly satisfied. I shall certainly use Orchilla'."

Mr. Gross further says: "If any farmer will just take Orchilla Guano and use it straight along, and not be frightened if his crop is ever light, and think it is the fault of the fertilizer, (for it takes a good many things besides a good fertilizer to make good crops,) but let him persevere with it, as I have done, and my word for it, he will make good crops enough to satisfy him, and *his land will become as rich as a garden.*"

Mr. Henry Schwartz, 211 West Baltimore street, Baltimore city, writes July 13th, 1883:

"During the last three years I have given Orchilla Guano a fair trial, on my farm near Govanstown, Baltimore county. I used it on corn, putting 300 pounds to the acre. I raised the finest kind of a crop, when the corn crop generally was a failure."

Dr. D. B. Ferguson, Club Hill, Baltimore county, Oct. 28th, 1883, writes: "I applied Orchilla Guano on my corn last spring, 400 pounds to the acre. I had a splendid crop, the best I ever grew on the field. I will use it next spring."

Mr. Levi Ferguson, of the same county, used Orchilla on his corn last spring, and writes that he made a "fine crop," and says he "will certainly continue to use it."

Mr. James B. Arres, of Whitehall, Baltimore county, says: "I regard Orchilla Guano *the best fertilizer used* in our section of the country. After eight years steady use I am satisfied it is a permanent improver of the soil, and the condition of my land proves it. I believe it far superior to animal bone or barnyard manure."

Farmers of Talbot, consider well this evidence of the great value of Orchilla Guano as a corn producing fertilizer, order liberally, double your crops, and permanently enrich your farms.

To the Farmers.

THE TALBOT COUNTY PAPER MILLS COMPANY will now contract for WHEAT STRAW, to be delivered at a convenient time hereafter. A little more care in stacking and ricking, will insure so much better keeping as to enable farmers to spare at least half of their straw, the cash for which would nearly pay for their phosphates. Apply to

R. B. DIXON,
jan26tf Treasurer.

POETRY.

LOVE'S HERITAGE.

BY WILLIAM M. BROOK.

Bend o'er me, blue as summer skies,
The azure splendor of thine eyes,
And smile with lips whose murmur tells,
Like lingering sound of far-off bells
O'er shining seas, that thou for me
Art skies and sound and summer sea!

Skies that contain the sun, and moon,
The stars, the birds, the winds of June
And tones that, swelling far and near,
Bear more than music in mine ear;
And sea, above whose changeless hue
Thes sun is bright, the sky is blue!

Art thou my star? Sweet Love, thou'rt more
Than all that ever twilight bore,
Art thou my song? Dear Love, from thee
The whole world takes it melody.
Art thou—nay! what can words impart
To tell one dream of what thou art!

Thou art my all; I know that Love
Reigns from the deepening dome above
In silver dew drops, that the earth
Receives with hushed and solemn mirth;
So thou—all seasons linked in one—
Art flower and bird and breeze and sun!

AGRICULTURAL.

A Cure for Stumbling.

A writer in the Pittsburgh Stockman gives the following as the cause and cure of this disagreeable habit:—

Some good horses are addicted to stumbling, walking or moving in a slow trot. A well-versed veterinarian states that there are two causes that would tend to produce this faulty action, one a general weakness in the muscular system, such as would be noticed in a tired horse; the other, a weakness of the exterior muscles of the leg, brought about by carrying too much weight on the toe. To effect a cure, he adds, lighten the weight of each front shoe about four ounces; have the toe of the shoe made of steel, instead of iron; it will wear longer; have it rounded off about the same as it would be when one-third worn out, in order to prevent tripping; allow one week's rest; have the legs showered for a few minutes at a time with cold water through a hose, in order to create a spray; then rub dry, briskly, from the chest down to the foot. Give walking exercise daily during this week, for about an hour twice a day. When you commence driving again, omit the slow jog, either walk or send him along at a sharp trot for a mile or two, then walk away, but do not speed for at least several weeks. By this means the habit of stumbling from either of the above causes will be pretty well overcome.

Marks of a Good Cow.

The medium-sized ones invariably produce the best results, and a heavy milker and large butter-maker is seldom fat, as the majority of the food she consumes is converted into milk and butter. The head should be fine, but bony, with small horns, large, mealy nose, and shapely ears. The base of the horns and the inside of the ears should be of a bright golden color. We have never yet seen an animal with horns and ears well colored (golden yellow) which failed to make a fine quality of butter and highly colored. It is an unmistakable sign. The body should be of good size, and the width and depth rapidly increase as it runs to the rear or hind quarters The milk veins should be large and prominent, and the udder need not necessarily be large, so it is not meaty; but is small when milked out. The teats should be of good size and only have a single hole in each.—We have seen quite a number with teats having two holes. The hair should be fine and soft to the touch as velvet or kid. In color it should be tinged deeply with yellow, especially on the shoulders and flank and along the back. Color of the hair is rather a secondary matter, though the best cows are generally yellow, fawn, gray or white, with dark marks edged with yellow. Black cows but seldom prove to be good general purpose ones, though, of course, there are exceptions frequently met with.

Farm Notes.

The average yield of corn per acre in 1883 was 23.1 bushels.

If your potatoes are inclined to rot, try a light sprinkling of air slacked lime.

Some one has said that the thorough tilling of the ground is equivalent to moving it 150 miles futher South.

Muslin full of stiffening matter bleaches better. Wash in clean water before laying cloths on the butter.

Really good butter is sometimes ruined by the use of inferior salt. The economy of purchasing mean salt is sheer waste.

It has been said that because cattle sometimes prefer impure water to pure drinking water no pains should be taken to supply them with pure water. The British Medical Journal explains to agriculturists that the reason for this fact is that cattle when given tank water are not kept properly supplied with rock salt. In their desire for saline food animals will drink the most impure fluids, and will even eat earth. The writer thinks it both injudicious and cruel to deprive cattle of salt, and thus compel them to seek it in refuse.

When a horse gets past his twelth or thirteenth year he is not usually profitable to keep. He may do a good deal of work after that date, but it will require more care and better feed to keep him in the best condition for work. Each year will also detract something from his value, and this must be deducted from the apparent profit on his labor.

A Life Doubly Assured.

A RESIDENT of Bangor, Maine, writing to C. N. Crittenton, New York, for a supply of HALE'S HONEY OF HOREHOUND AND TAR, mentions incidentally that three months ago a New England life insurance company refused to grant him a policy on the ground that he was consumptive. "But," he adds, "thanks to the healing properties of *that invaluable preparation*, my lungs are now perfectly sound, and I yesterday passed a medical examination without an objection, and insured my life for $5,000." Of druggists generally.

PIKE'S TOOTHACHE DROPS cure in one minute.

A PURE, radiant complexion is one of woman's greatest charms. It is attainable by the daily use of GLENN'S SULPHUR SOAP, which removes blemishes of the skin, cutaneur ailments of every description, and is an admirable disinfectant.

Preventive of Malarial Diseases.

OPINION OF EMINENT DR. H. R. WALTON, OF ANNAPOLIS, MD.

"COLDEN'S LIQUID BEEF TONIC is a most excellent preparation. It is, *par excellence*, superior to cod-liver oil or anything I have ever used in vitated or impaired constitutions, and extremely beneficial as a preventive of *malarial diseases.*" (Remember the name, COLDEN'S—*take no other.*) Of druggists generally.

OF LONG EXPERIENCE.

I would respectfully inform my friends and the public generally, that I am now better prepared to furnish everything in the furniture line, than I have been in the past.

My ware-house contains 3500 square feet of flooring, which is at all times covered with stock pertaining to my business, and which will be sold as cheap or cheaper than can be bought here or elsewhere.

Having no other trade or profession, I am in the business for life, health permitting, and do not intend to be undersold or excelled in any particular pertaining to my business.

Myself and son Harry will give our personal attention to the business, and I recommend him as capable to attend to all business in my absence.

REPAIRING

done neatly and with dispatch. Stock of

PICTURE FRAMES

always on hand made to order. Thanking you very kindly for your patronage in the past, I earnestly solicit a continuance in the future.

Undertaking a Specialty.

I shall continue to give the undertaking department of my business my special attention, and having had thirty odd years experience in the business, I feel sure I can give satisfaction in the attention of all funerals entrusted to my care.

I have one of the best hearses and keep in stock everything necessary to furnish the best funeral.

Corpses preserved in ice when requested Remember my prices shall be as low as the very lowest. Respectfully,

JOHN MASON.
