WATER FACILITIES

ANNAPOLIS & EASTPORT

Gravity system of water works, owned by city (Annapolis Water Co.), built in 1879 at which time most of the water pipes were laid. In 1927 a 1,000,000 gallon standpipe was built, located on sheet 18, and 12" and 14" water pipes laid in the business section. Water supply from springs, streams and artesian wells, 2 reservoirs about 4 miles west of city, filled by 1 Nordberg cross-compound pump and 1 R. D. Woods triple expansion pump, 5,000,000 gallons per day combined capacity, 1 DeLaval electric pump, capacity 1,000 gallons per minute. Also electric pump combined capacity 6,000,000 gallons per day. To have 2 more electric pumps to be installed summer of 1930. Standpipe 1,750,000 gallons capacity, base of which is 53' elevation. Average daily consumption 1,300,000 gallons including Eastport, 25 miles of water pipes, 4" to 16", 102 hydrants, exclusive of those in Naval Academy. Pressure 40 lbs. per square inch. U. S. Naval Academy has independent water works (artesian wells).
