HIDDEN WAYS
By F. F. VAN DE WATER

FOR THE lover of good detective fiction—the collector of chills, creeps and clues—here is the prize mystery of the season. A guttural voice was David Mallory's only major working clue to a carefully planned murder. Undaunted, David worked with Miss Agatha Paget, an amazingly keen old lady, and together they spun their amazing solution to one of New York's most cunningly contrived crimes. A surprise ending brings a breathless thriller to a dramatic close. You'll thrill to every chapter of Frederick Van de Water's great new story.

CHESTER, MD.

MORE THAN 1,200,000 telephone messages whisk along the wires of this company daily—as if by magic. But magic has nothing to do with it. Behind your fast and efficient telephone service are:

PEOPLE — more than 4,500 employees of the Chesapeake and Potomac Telephone Company, each doing his or her part to give you the best possible telephone service at the lowest possible cost.

EQUIPMENT — the manufacturing skill of the Western Electric Company which provides this company, as a member of the Bell System, with the finest telephone equipment made.

SCIENTIFIC RESEARCH — the results of years of continuous research by the Bell Telephone Laboratories which are reflected in every call you make.

Each is important, all are necessary in the furnishing of good telephone service.
