ECIALTY FRUIT FARMING.

In a recent address Hon. A. J. Lovejoy, of Illinois, gave this instance of success in fruit farming which came under his own observation. He says: "Adjoining our farm in Winnebago County, Ill., are a young couple living on a place containing but twelve acres of tillable land. It was a hard proposition to make a living unless some specialty was taken up, and two or three years after this young man concluded to make a change in his farm methods and become a specialist. He took up the growing of small fruits. Last year he received from one acre of strawberries more money than some men receive from an 80-acre farm. I also have an acquaintance who lives in another county in this State, who owns a 30-acre fruit farm, growing all the varieties of small fruits, as well as other kinds. This man makes more clear money than any farmers farming in a general way 500 to 1000 acres. I know of no man who from the same effort makes more money or takes life easier. He spends only the summer season on the farm. After the fruit crop is marketed he goes to his home in the city, and when the cold weather of winter comes on he, with his family, goes to Florida."

WHAT HOGS SHOULD BE BRED FOR.

In his official report the secretary of the jury of awards on swine at the Louisiana Purchase Exposition made the following statement "The ultimate aim of swine husbandry is meat production, consequently pure breed swine to be of direct financial benefit to the farmer and stockman, should also be strong in desirable market type and quality. In too many instances we find breed, quality and market quality widely different. Heavy shoulders, pendulous flabby hams and blubber covered backs and sides may be pleasing to the eye, and add to the graceful finished outline of the live animal, but they do not conduce to profit in the smoke-house or pork cellar or to the packer."

DIG OUT THE MILK PAIL.

Of course everybody washes their milk pails and cans and pitchers, but not every one digs out the deposit that forms in the corners and under overhanging rims. Yet these deposits contain an assortment of the germs that have grown in the previous batches of milk. They are like chunks of yeast and start up souring in the milk in the same way that yeast makes bread ferment. Even though the germs are scalded to death new ones soon fall on the deposit and then conditions are as bad as ever. Cleanliness of every hidden corner is the only condition that is safe.

HOW TO GET ALFALFA STARTED.

Early attempts with alfalfa are likely to prove a failure unless the peculiar requirements of the young plants are thoroughly understood and the many pitfalls guarded against. It is best to start with a small patch—an acre or less—and to make from four to eight subdivisions and give each a different treatment as regards fertilizer, lime, method of seeding, etc. In this way the experience which would otherwise require a number of seasons to procure can be obtained at the end of the first year.

He Got It Fixed.

The following story, illustrative of the red tape that used to prevail in a certain department of the federal government at Washington, is told by an official who began his service there in the humble capacity of clerk:

"Shortly after entering upon the discharge of my duties," said the official, "I witnessed a scene in the division to which I had been assigned that astonished me to a degree. One day an elderly clerk whose desk was near mine suddenly rose from his seat, dragged his chair to a fireplace, and, seizing a poker, attacked the offending piece of furniture with what appeared to be maniacal fury. When he had broken a leg off the chair his passion seemed to be exhausted. He flung the damaged chair into a corner of the room, and, getting another chair, calmly resumed his work just as if nothing had occurred.

"When the time came to leave the the office that afternoon, I ventured to ask a fellow-clerk, who had been a witness of the scene, what it meant. 'Is that clerk,' I inquired, 'subject to attacks of that kind?'

"The clerk questioned smiled indulgently. 'Oh,' he explained, 'there was nothing the matter with him. You see, one of the castors had come off his chair. This department will not replace castors—it repairs nothing less serious than a broken leg. So Blank broke one of the legs and now he will be able to get the castor put on again."—Success Magazine.

Modes for Motorists.

It is suggestive of how swift is the evolution of fashions at the present time that even in such an exclusive department of clothing as that of modes for the motor there seems to be always some change to record.

The chief point worthy of note at the moment seems to be the general waning of the popularity of leather for coats, the general conclusion being that it is too reminiscent of the chauffeur. Apart from this, there is also the question of the way in which it shows the dirt, and, although it is, of course, quite possible to have such a coat cleaned, this is an extensive and expensive business.

As a lining, however, leather is more to be desired than ever it was, and in this capacity it is very much used. Under such circumstances it is possible to employ the most delicate tones, and champagne, pale blue, and the palest green are among the shades most frequently employed.

The outer part of the coats thus lined is tweed, either self-colored, which perhaps looks smarter, or in the mixtures in which green is the dominant color; in fact, there is every sign that this is to be a green season. —Philadelphia Record.

Fifteen or twenty lions suddenly raided the town of Chorumo, in British Central Africa, the other evening at dusk and killed and ate eleven persons. The other inhabitants fled in their canoes, and the lions prowled through deserted streets.

old at Any Time of the Year, Especially in Hot Weather, is Very Depressing to the System. Peruna is an Unequaled Tonic For Such Cases. Read What Some Say About It.

Hon. W. H. Kelbaugh, Ex-Member of the Legislature, 204 9th street, N. E., Washington, D. C., writes:

"You can use my name and word at all times for Peruna as a medicine and tonic unequaled. I have tried it for a stubborn cold and badly run down system. I tried all sorts of other medicines and paid several expensive doctor bills. Peruna cured me, strengthened me more than ever, and saved me money."

Mrs. Clara Litterst, Seafield, Ind., says: "Last fall I took a severe cold. I took Peruna, began to improve and kept on so until I was able to do my work."

Libby's Food Products

enable you to make *good* meals out of "hurry" meals.

Libby's Food Products are ready to serve when you get them, yet are cooked as carefully and as well as you could do it in your own kitchen.

Ox Tongue, Dried Beef, Boned Chicken, Deviled Ham, Veal Loaf—these are but a few of the many kinds your dealer keeps.

Try for luncheon or supper tomorrow, some sliced Chicken Loaf.

Libby's Chicken Loaf

Smithdeal's

Is the oldest and first business college in Va. to own its building—a fine one. No vacations. Ladies and Gentlemen. Bookkeeping, Shorthand, Penmanship, Typewriting, Telegraphy, &c. Three first taught by mail also. "Leading business college south of the Potomac river."—Phila. Stenographer. Address, C. M. SMITHDEAL, President, Richmond, Va.

BOTH IN THE SAME BOAT.

At a recent dinner which was attended by a number of clergymen President Buckham, of the University of Vermont, told the following of Bishop Hall, of the Episcopal Diocese of Vermont, in response to some good-natured chaff about the liberal views of the Congregational Church and the case with which almost anybody could join it.

He said he had heard of a negro who had many times applied for membership in St. Paul's Church, at Burlington, but had not been able to satisfy the
p that his state of mind entitled
to admission. The negro had been
sed to pray that his spiritual con-
n might improve.
ter doing so he made a new appli-
n. The Bishop said to him:
'Well, 'Rastus, have you prayed as I
you to?"
s, indeedy, suh; I done prayed an'
done tole de Lawd I wants to jine St.
aul's Chur-an' de Lawd he say to
e:
'Good luck, 'Rastus, I been tryin' to
e dat church fo' 20 years mahse'f.'"—

FOR AND ABOUT WOMEN

GIRL PRIZE WINNER.

Though only seven years old, Miss Dorothy Kauffman, daughter of Abraham Kauffman, 1525 Jefferson avenue, is already the winner of two prizes for her singing. At the Avenue's amateur performance the audience judged her winner of the gold eagle, and a year ago in the same theatre she won a gold watch.—Detroit Free Press.

SANDALS FOR CHILDREN.

The children's feet should be comfortably shod, and generally are so, with the varying styles and shapes that now abound at low prices as well as in the more expensive grades. The presence of little sandals in the household where there are children may spare the mother the necessity of refusing the small folk the pleasure of going barefoot, for they protect the feet while allowing perfect freedom and coolness.

TO HOLD UP TOPS OF GLOVES.

Glove elastics for holding up the tops of long party gloves are among the season's novelties. Made up of fine Valenciennes lace with a bit of dainty ribbon flower embroidery through the centre or of spangled lace to match the gowns, they are pretty if not particularly chic.

The idea, says the New York Sun, savors too much of the shirt sleeve elastic of masculine use to be generally accepted by fastidious women, though.

MME. CURIE SUCCEEDS HUSBAND

It seems probable that Mme. Curie will succeed her husband as professor of physics in the Sorbonne. This chair was specially created for M. Curie two years ago, and his wife, by reason of her valuable collaboration in the research that led to the discovery of radium, was appointed his chief laboratory assistant. Now that the question has arisen of appointing a successor to M. Cure, his widow is quite seriously spoken of as the person best fitted, not only by intimate knowledge of his methods and work, but also by her own scientific attainments, to succeed him.—New York Tribune.

BRUSSELS LACE BIT.

All women love lace.

It is treasured whether it is designed to wear or to keep hidden away in a chest.

No collection is complete without some of the charming dentelles made in or near the capital of Belgium, and no lace is more fashionable for very fine wear. Despite the vogue of Irish crochet there's no diminution in the Brussels cult.

Here reproduced is a dainty and favorite motif. It is the rose, and it is as exquisite in flower as in foliage. Those who have seen busy fingers and bobbins fly in its making will be doubly interested in this reminder.

WOMEN ARE CLUB'S TABOO.

So numerous are bachelors in Winchfield, England, that in 1904 it was decided to form a "Bachelor's Friendly Society." It now has thirty-nine members, each over the age of twenty-eight years. Members, when being enrolled, pay a fee of twelve cents, and for non-attendance at meetings, which are held every Wednesday evening, a fine of six cents is imposed.

Any member seen by another talking to or walking with a young woman is fined as follows: For talking, four cents; for walking, six cents. These fines are allowed to accumulate during the twelve months, and are then used to defray the expenses of the annual excursion.

BOYS HAVE BETTER TASTE.

"If the public schools ever add to their curriculum the making of boquets the boys will take much higher honors than the girls," said a perplexed teacher. "I used to wonder why it was that all the employes in a florist's establishment were men. Having no other explanation to fall back on I concluded that the preference was due to their superior physical strength, but I know now that it was because they have better taste in the arrangement of flowers. With all her supposed inherent talent in the matter of home adornment there isn't one girl in a thousand who can make a lot of flowers up into a decent boquet without coaching, while on the other hand the boy who cannot put them together in artistic style is rare."

RETURN OF FOULARD.

One of the most satisfactory items of news which reaches us from Paris is that foulard is coming back to favor. The beautiful satin foulards, which wear so well and look so fresh and smart as long as there are "two threads to hang together," will once again take their rightful place among the dress materials, in addition to the pretty little spotted and figured silk foulards, which provide capital morning wear on warm days. We may also look for a great season of voile, and a number of Paris dressmakers have been busily engaged in evolving light gowns of this material for the Nice carnival, which, in addition to the quantities of lace and embroidery used in their construction, are supplemented with fancy braids of all descriptions.

AMIABLE GIRLS.

The most lovable girls in the world are those with a sunny disposition. A few people like the quiet, thoughtful girl; others like the girl who is perpetually vivacious and bubbling over with spirits. But every one likes the girl with the cheerful, sunny disposition. Girls of this character are never extravagantly boisterous or dismally quiet; they have a pleasant smile for every one. They never seem troubled or worried, their voice is low and musical, and their smile—be they pretty or not—is always sweet.

The only trouble that "the sunny-tempered girl has is the outcome of her popularity. Every one wants to talk to her, and be in her company. Young men are attracted to her without effort on her part, for her character shows itself so plainly in her actions that young men are so delighted

REBUKING A LITERARY SNOB.

Constant Reader was boasting of his pertinacity. "Huh," we sneered, "can you read the gas meter?" Abashed, he turned to Veritas for comfort.—New York Sun.

A RUSHING BUSINESS.

Hewitt—"That fellow does his business on tick."

Jewett—"Is that so?"

Hewitt—"Yes, he's a telegraph operator."—New York Press.

AMBITION.

Knicker—"Wouldn't you like to wake up some morning to find yourself famous?"

Subbubs—"I'd rather sleep till I had missed every blamed train to the city."—New York Sun.

JUST LIKE A WOMAN.

The Man—"I am surprised to see you reading a historical novel. Don't you find it rather dull?"

The Maid—"Oh, no. You see, there is so much in it one can skip." —Columbus Dispatch.

HOW?

O. N. Marrgin—"Oh, your father says I'm a bad egg, does he? Strange he didn't discover that fact until I lost all my money in Wall Street."

Friend—"Well, you can't tell a bad egg until it's broke."—New York Herald.

AUTO EAR.

Village Constable (to man who has been knocked down by passing motor-cyclist)—"You didn't see the number, but could you swear to the man?"

Villager—"I did; but I don't think 'e 'eard me"—Punch.

DIVISION OF LABOR.

Knicker—"An English writer says she thinks in the country and writes in town."

Bocker—"Same way with us; my wife thinks at the sea and I write a check in the city."—New York Sun.

SUCH IS LIFE.

"Cupid is a poor shipping clerk," announced the man who is given to serious reflections."

"What do you mean?"

"So many people who were made for each other get consigned to a different address."

INDIGESTION.

Teacher—"There's a voice inside of you called conscience, and it talks to you continuously."

Johnny—"I've often heard a rumblin' in me, an' never knew what it was before."

CONSOLATION.

Mr. Hussel—"The doctor says if I don't take a little rest and not work so hard I'll be dead in a year."

Mrs. Hussel—"Yes? What a consolation it must be to you to know that your life's insured."—Philadelphia Ledger.

ONE ADVANTAGE.

City Man (carpingly)—"Whew, but it's hot! I am told that the mercury frequently stands at 110 in the shade here."

Farmer Summerboard (cheeringly)—"Well, you don't hafter stay in the shade, ye know."—Puck.

VITAL QUESTION.

"Let me tell you how to keep the house on $10 a week," began the local economist.

"Nonsense," replied the practical man. "The house don't eat. Tell me how to keep my family on $10 a week and I will listen to you."—Chicago News.

MORE POWER TO THEIR ELBOWS

Knicker—"What is your son doing?"

Bocker—"Rolled up his sleeves and gone to work."

Knicker—"And your daughter?"

Bocker—"Rolled up her sleeves and gone to play."—New York Sun.

REDEEMING FEATURE.

"Why," exclaimed the visitor who was being shown over the house, "this picture is by one of the old masters."

"Well, maybe it is," replied Mrs. Neuritch, apologetically, "but I am sure the frame is quite new."—Columbus Dispatch.

REVISING.

Cervantes was revising the proof sheets of "Don Quixote."

"Because," he explained, "my publishers can't afford to hire a knight editor."

Then, remembering that he had to be his own horse editor as well, he corrected a typographical error in the name of Rozinante.—Chicago Tribune.

Peanut Club is Formed.

The peculiar initiation of a new club formed by several popular young women of Lorain, O., consists in the initiate being required to roll a peanut from Dexter street to the loop, North Broadway, a distance of two miles. The club is known as the Peanut Club, and the feat has so far been performed by the following young women: Lena Gorsage, Delia Cervenka, Pauline Hildebrand, Elsie Ashbolt and Pearl Gorsage. The peanut route is through the central section of the city.

DAZED WITH PAIN.

The Sufferings of a Citizen of Olympia, Wash.

L. S. Gorham, of 516 East 4th St., Olympia, Wash., says: "Six years ago I got wet and took cold, and was soon flat in bed, suffering tortures with my back. Every movement caused an agonizing pain, and the persistency of it exhausted me, so that for a time I was dazed and stupid. On the advice of a friend I began using Doan's Kidney Pills, and soon noticed a change for the better. The kidney secretions had been disordered and irregular, and contained a heavy sediment, but in a week's time the urine was clear and natural again and the passages regular. Gradually the aching and soreness left my back and then the lameness. I used six boxes to make sure of a cure, and the trouble has never returned."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

WHEN IN DOUBT.

C. M. S. McLellan, author of the strong and successful drama, "Leah Kieschna," has pronounced views against war.

"If the men who caused war were the men who fought," he said one day, "I should admit war's logic. But this is not the case. On the contrary, the men who cause a war never fight in it—never risk their lives, or endure hardship, or suffer loss.

"It is the nation's young men who must fight. These young men, without any reason of profit or glory, die or return home with an empty trouser leg, and the profit and the glory all go to a lot of high officials—a lot of noncombatants who never struck a blow.

"The common soldier, on the whole, is treated like the culprit in a Mogador prison.

"This culprit, convicted of slander, was sentenced to the bastinado. Twenty lashes were ordered. Two men were appointed to do the work.

"The culprit, weeping, was bound down. The two men, rolling up their sleeves, took sticks in their hands, and with knit brows began to rain the 20 lashes on the culprit's flesh.

"But half way through they lost count.

"'This is 10,' said the first.

"'No; its 13,' said the second.

"'I'm sure the last stroke made 10,' the first insisted.

"'Nonsense. It made 13,' declared the second.

"They argued for some moments, the prisoner listening anxiously, and then, finding it impossible to settle the question, they agreed it would be best to start all over again."—Chicago Inter Ocean.

THE FATHER'S ANSWER.

An anecdote is told of Richard Seddon, the late premier of New Zealand. He was very active in sending troops to the assistance of Great Britain in the South African War. On one occasion he was taunted by the opposition member with his readiness to sacrifice the lives of the colony's manhood.

"You are ready enough to send our sons and brothers to be shot at, but—" was the opening of a taunt by his opponent, when the Premier broke in:

"Sir, this morning I signed a commission for my own son. He will be shot at, too, and I have dared him to come back without a wound."—Chicago Inter Ocean.

WORLDS FOR EXPLORERS

Notwithstanding the rapid advance of exploration in various parts of the globe a recent estimate by a member of the American Geographical Society shows that no less than 20,000,000 square miles of the earth's surface yet remains unexplored.

The largest unexplored area is in Africa, 6,500,000 square miles, but even North America contains 1,500,000 square miles of virgin territory. It is surprising to learn that there is three times as much land awaiting the foot of the pioneer in North American as in South American.

EFFECTIVE.

"Bumgesser has retired from business, hasn't he?"

"Well, there's been a separation, but it was just the other way."

"How?"

"He quit advertising, and the business did the rest."—Cleveland Leader.

MODERN INGENUITY.

The manufacturers of glucose honey show as much ingenuity in putting the corpse of a bee in each jar as is shown by the canners of catfish in putting bits of salmon backbone in the cans.—Atlanta Constitution.

To Wash Glassware.

Much of the imitation cut glassware may be made to look almost like the genuine article if washed in the following manner: Make a strong suds of Ivory Soap and immerse the piece of glassware in it. Rub vigorously with a soft brush, dip up and down in the suds and do not dry but let drain. This will give a beautiful sparkle. —Eleanor R. Parker.

NOT MUCH THERE.

"Yes," said Mrs. Starvem, "he's a millionaire now and they say he rose from practically nothing."

"Yes?" remarked the sarcartic boarder, "that's what I rose from—at the breakfast table this morning."—Philadelphia Press.

FITS, St. Vitus' Dance: Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. H. R. Kline, Ld., 931 Arch St., Phila., Pa.

A good many young men will hang this summer—on front gates.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle

Quite often the man who is swift and a good guesser distances the slow but sure chap.

HEAD COVERED WITH HUMOR.

Bothered With Itching For a Long Time—Kentucky Lady Now Completely Well—Cured by Cuticura.

"After using Cuticura Soap, Ointment, and Pills, I am very glad to say I am entirely relieved of that itching humor of the head and scalp which I was bothered with quite a length of time. I did not use the Cuticura Remedies more than three times before I began to get better, and now I am completely well. I suffered with that humor on my head, and found no relief until I took the Cuticura Remedies. I think I used several cakes of Cuticura Soap, three boxes of Ointment, and two vials of Pills. I am doing all I can to publish the Cuticura Remedies, for they have done me good, and I know they will do others the same. Mrs. Mattie Jackson, Mortonsville, Ky., June 12, 1905."

Few men believe in an everlasting fire and brimstone punishment—except for their neighbors.

HOW TO PREVENT COUGHING.

Coughing is the worst thing for a cough, and in most instances of cough there is more coughing than is necessary to subserve the purpose of the cough—i. e., to remove offending material.

The following directions will help one minimize coughing in all instances, while in the milder cases it may stop the cough altogether after a little perseverance: When tempted to cough take a deep breath, filling, if possible, every air cell, holding it until the warming, soothing effect comes or so long as is reasonable, and mark the mollifying result on the cough, which, even when the latter seems unavoidable, will often be found under control.

Repeat if necessary. The explanation of this is that there is a liberation of nitrogen in the air cells which has a quieting, sedative effect on the irritated mucous memberane.—*National Magazine.*

GOOD GUESS.

Senator Hale, apropos of an awkward remark, said: "It reminds me of the conversation of two women at a reception. They were strangers to each other. After a moment's desultory talk, the first said, rather querulously: 'I don't know what's the matter with that tall, blond man over there. He was so attentive a while ago, but he won't look at me now.' 'Perhaps,' said the other, 'he saw me come in. He's my husband, you know.'"—New York Tribune.

IT'S MERIT IS PROVED

RECORD OF A GREAT MEDICINE

A Prominent Cincinnati Woman Tells How Lydia E. Pinkham's Vegetable Compound Completely Cured Her.

The great good Lydia E. Pinkham's Vegetable Compound is doing among the women of America is attracting the attention of many of our leading scientists, and thinking people generally.

The following letter is only one of many thousands which are on file in the Pinkham office, and go to prove beyond question that Lydia E. Pinkham's Vegetable Compound must be a remedy of great merit, otherwise it could not produce such marvelous results among sick and ailing women.

Dear Mrs. Pinkham:—

"About nine months ago I was a great sufferer with female trouble, which caused me severe pain, extreme nervousness and frequent headaches, from which the doctor failed to relieve me. I tried Lydia E. Pinkham's Vegetable Compound, and within a short time felt better, and after taking five bottles of it I was entirely cured. I therefore heartily recommend your Compound as a splendid female tonic. It makes the monthly periods regular and without pain; and what a blessing it is to find such a remedy after so many doctors fail to help you. I am pleased to recommend it to all suffering women."—Mrs. Sara Wilson, 31 East 3d Street, Cincinnati, Ohio.

If you have suppressed or painful periods, weakness of the stomach, indigestion, bloating, pelvic catarrh, nervous prostration, dizziness, faintness, "don't-care" and "want-to-be-left-alone" feeling, excitability, backache or the blues, these are sure indications of female weakness, or some derangement of the organs. In such cases there is one tried and true remedy —Lydia E. Pinkham's Vegetable Compound.

You Cannot

CURE

all inflamed, ulcerated and catarrhal conditions of the mucous membrane such as **nasal catarrh, uterine catarrh caused by feminine ills, sore throat, sore mouth or inflamed eyes** by simply dosing the stomach.

But you surely **can cure** these stubborn affections by local treatment with

Paxtine Toilet Antiseptic

which destroys the disease germs, checks discharges, stops pain, and heals the inflammation and soreness.

Paxtine represents the most successful local treatment for **feminine ills** ever produced. Thousands of women testify to this fact. 50 cents at druggists.
