Home Canning Made Easy

By GRACE VIALL GRAY
Household Science Institute.

9 CANNING POINTS

1. Have all equipment in readiness before canning is started.

Grace Viall Gray.

2. Pack products in jars or cans that will seal air tight. Spoilage in canned foods is frequently due to imperfect containers.

3. Pressure cookers are helpful in the canning of meat and all non-acid vegetables. The high pressure obtainable kills all spores, thus assuring perfect sterilization. Pressure cookers also save time and fuel.

4. If you live in the South, or in very high altitudes, or in the west coast states, get the time-tables for canning recommended by your state college. In these sections it is recommended not to use hot water for the canning of vegetables and meats but the pressure cooker.

OFFER $5,625 IN PRIZES IN NATIONAL CANNING CONTEST

To ward off a threatened surplus of farm products in many sections and to impress more housewives with the economy and healthfulness of home canned foods, a National Canning Contest is now under way to find the best jar of canned fruit, vegetables and meat in the country. Two hundred and twenty-two cash prizes totalling $5,625 have been hung up by the Sears-Roebuck Agricultural Foundation, including a grand sweepstakes prize of $1,250 for the best jar of canned food entered in the contest. Any woman or girl is eligible to enter the contest, but entries must be in not later than October 1, 1929. Further information on the contest and free jar and entry blanks for sending in entries may be had by writing to Anne Williams, director, National Canning Contest, 925 S. Homan Avenue, Chicago, Ill.

5. For exhibit and contest purposes always use glass jars.

6. Empty space in a jar will not lessen the keeping qualities of the food, but it detracts from the appearance and is a waste of jar space. However, if a glass jar has lost liquid during processing, do not open to refill.

7. To can fruit juices pasteurize for from 25 to 30 minutes at 160 to

170 degrees. Boiling fruit juice destroys the flavor.

8. Canning does not change poor products into good products so use good products to put into jars. And do not spoil good products by half-way methods of canning. Use the quickest, safest, and most efficient method of canning, which is the pressure cooker method.

9. Before storing canned products away in a cool dry airy place for winter use keep the jars under observation at room temperature for at least one week.

to talk and display Xmas goods.

This does not mean that you are to display a great lot of Xmas merchandise in October or November, but simply start with a few items and add to them each day or week as the season approaches. By mentioning a few new gift suggestions in each of your advertisements, you cover the entire line and every person is bound to see desirable articles for Xmas giving.

A small panel or section run in each of your store-news advertisements, with the heading: Xmas Gift Suggestions" and mentioning a few new and desirable Christmas items each week will not only create early Xmas shopping, but will be the means of keeping a lot of this business from going to the big mail-order houses.
