PHONE COMPANY WILL MAKE BIG IMPROVEMENTS

$3,000,000 Program Scheduled For Maryland

Approximately $3,000,000 will be spent in the immediate future in extending telephone plant facilities and improving the service in Maryland. This announcement by the Chesapeake and Potomac Telephone Company, following closely upon the establishment of new rates by the Public Service Commission, indicates clearly the stops the Company is taking to bring the service up to the highest standards of efficiency.

F. S. Whitman, division manager of the C. & P., said that the Company expects to spend $10,000,000 on improvements in the next three years. The new rates enable the Company to go ahead with a comprehensive program, he said, and projects totaling $3,000,000 have already been approved and operations started in many cases. A good deal now depends on the Company's ability to get the materials needed, but every possible effort is being made to secure them.

The construction schedule is a lengthy one. In Cumberland, the growing requirements of the city will be met by extensive additions to the underground and overhead cable systems. Cumberland's population has been jumping rapidly and it is expected to double within the next four years. To take care of the increased demand for telephone service, the Company's plant is now being enlarged by a pole line, 15,210 feet of overhead cable and approximately 7,800 feet of underground cable. Several other branch cable and pole lines will be needed later.

In Hagerstown, increased facilities will be provided by the installation of a new switchboard section and 500 additional subscriber lines, bringing the total number of lines which can be served up to 2,600. The present method of handling toll calls will be changed and improved, and audible ringing apparatus will be installed.

In Montgomery County, repairs will be made on the toll lines between Washington and Frederick, Gaithersburg and Damascus and Gaithersburg and Poolesville.

Some of the more important projects to be undertaken in and near Baltimore are building and equipping a new central office, equipping a school for student operators, new cables and extensions in various parts of the city and its suburbs, and the equipment of a new central office at St. Helena.

In addition to these, there are scores of operations to be undertaken in other parts of the State that are of lesser magnitude, but of first importance to the communities where the improvements will be made.
