How Old Is Anne.

The New York World recently published the following problem which has puzzled many and created one of the greatest sensations of the day:

Mary is 24 years old. Mary is twice as old as Ann was when Mary was as old as Ann is now. How old is Ann?

Here are two of the many different answers:

When Mary was 16 Ann was 8; 16 plus 8 equals Mary,s present age-8 plus 8 16 equals Anne's present age

Ann is eighteen years old When Mary was eighteen years old Ann was twelve; therefore Mary is twice as old as Ann was when Mary was eighteen
