Patent Horizontal Wind-Mill.

THE subscriber offers to the gentlemen farmers and others of Maryland, and the other states, an invention, which for utility has not been exceeded by any piece of mechanism which this or perhaps the last century can boast of. It is a peculiarly, though simply, constructed *horizontal* Wind-Mill, adapted to the grinding of all sorts of grain, and at the same time threshing out wheat and rice, fanning them and pounding the latter, powdering plaster of Paris, cutting tobacco, &c. &c. Its aptitude to all those various and useful purposes, will be more easily and justly estimated by a view of the machine itself, than from any description that can be given here. —A model of this wind-mill can be viewed on Federal Hill, where it is kept for the convenience of shewing it in operation, by applying to Mr. Marche, No. 4, south Gay-street, by whom also the terms will be made known for the model only to erect a mill by, or for the patent right for a whole state; or by

A CARD.

H. O. HEBERT (from Philadelphia) solicits the attention of the citizens of Baltimore in general, and invalids in particular, to his "*Air Pump Vapour Bath*," a machine constructed on true philosophical principles, the efficacy of which in gout, rheumatism, palsy, contractions and enlargements of joints, withered and enlarged limbs, cutaneous and many other diseases, both chronic and acute, can be testified by many respectable persons who have had recourse to it.

This machine comprehends and combines the application of fomentation and the cupping glass, two of the most powerful external applications for the removal of disease, and that on a plan more extensive than was ever before known.

As many persons who have never seen the apparatus might be deterred from using it, either from the reports of prejudiced persons, or fear, they are respectfully assured that its application is not attended with either pain or inconvenience—It possesses all the good effects of warm bathing, without its attendant consequences, debility and relaxation; on the contrary, it invigorates and strengthens the whole system, but particularly the part to which the machine is applied. Persons desirous of further information respecting the nature and effects of this machine, will please to apply to the proprietor, at No. 3, East-street, near the assembly room.

N. B. "The Air Pump Vapour Bath" is particularly adapted for the removal of all obstructions occasioned by violent colds, which are the forerunners of consumptions, &c.

Complaints peculiarly incident to females, which too generally baffle the remedies hitherto applied, and to which they frequently fall victims in the prime of life, are readily and effectually removed by the application of this machine.

An Iron Mine.

A PERSON, now residing in this city, who has for many years been engaged in the superintendance of iron works, and has had an opportunity of examining the ores of that metal, melted at many furnaces in this state, Virginia and Pennsylvania, and comparing the advantages of situations for carrying on that business—some years ago made a discovery of a bank of ore, which for the quality, quantity, situation, and every other requisite for pursuing the business to greater profit than any other he is acquainted with, or he believes exists. A desire of turning this discovery to his own emolument, at some period, by the erection of works on the spot, has hitherto prevented him from making a disclosure; but having now relinquished the design of engaging in such a business, on account of a bad state of health and other circumstances, he deems it improper to let what appears to him so valuable a discovery be lost; he will therefore make the situation known, and point out its advantages, with every other information he is possessed of respecting it, to any gentleman who may be disposed to make the enquiry, for a consideration far below what the expences he has already incurred, and the trouble and time he has devoted to it, might entitle him to demand. Enquire at this office.

N. B. The same person is also in possession of a curious, simple and more accurate method than any yet made public, of calculating land surveys, which he would communcate on reasonable terms. Also, of a case in law, which would exercise the genius, and might turn to the advantage of any gentleman of that profession.
