PHANS COURT

regular session of the Court
ay there were present their
Judges West, Harper and
d the following business was
l:

absence of the court, the
of Wills granted letters of
ation on the personal estate
Wright, deceased, to Roger
Bond filed and approved,
creditors ordered and Ed-
ight and Howard Wright
ed as appraisers.

K. Smith and Ira Smith, ex-
f Joseph F. Smith, deceased,
additional inventory which
oved by the court.

oone, administratrix of the
estate of William E. Boone,
filed her first and final ad-
on account which was ap-
the court.

H. Jones and Gertrude Cra-
utors of William A. Corbin,
filed releases from Effie
Wilbert Wroten, Mary Dell
hen Wroten, Mollie Pretty-
nie E. Cavendar, Elizabeth
Carroll Gray, Annie Case,
pkins, Frank Corbin, Mary
Hopkins, Gertrude Andrew,
re Miller, Jr., Ezekiel E.
rtrude Cranor, Sarepta Cra-
k Neal, Fannie Willin, Sarah

Roland Miller, minor, and dis-

Rash, administrator of the
state of John Rash, de-
ed an inventory and ap-
of the personal property
er to sell was granted.

ication letters of admini-
the personal estate of Alva
eceased, were granted Cora
d A. Webster Todd. Bond
pproved, notice to creditors
d Ernest Williamson and
. Deen were named as ap-

atter of the estate of Mabel
ired Clark, Adaline Clark,
rk and Celesta Clark, mi-
etition and order of court,
Clark and Albert S. Handy,
were authorized and em-
withdraw from the Fed-
Bank of the Eastern Shore
e used for the maintenance
rt of their wards.

oyal Sons Banquet

5 men, members and guests
yal Sons Class of the M. P.
chool, enjoyed a "get-to-
nquet Tuesday night in the
hool room. A supper which
n's" affair, was served, af-
there were several speeches.
Blake, president of the class
the value and work of the
s, and gave a cordial invi-
the guests to join the class.

Address Junior Order

H. Junghman, of Washing-
., will address the Caroline
No. 175, Jr. O. U. A. M., on
day evening, January 16.
ss will be of value to the
as he is the medical exami-
e beneficiary degree. All
re urged to attend.

SCHOOL ATTENDANCE REPORT FOR DECEMBER

Twenty-one of the couny schools reached the 90 per cent mark in attendance for the month of December. Three white and two colored schools have not yet reported, including Concord, Hubbards, Choptank, Dover Road and Tuckahoe.

Nichols, 100 per cent
Williston, 99 per cent
Caroline High, 98 per cent
Laurel Grove, 96 per cent
Barcus, 95 per cent
Ridgely High, 95 per cent
Camp Grove, 95 per cent
Hickman, 96 per cent
Greensboro High, 94 per cent
Gareys, 9 per cent
Bee Tree, 93 per cent
Denton Primary, 93 per cent
Chestnut Grove, 93 per cent
Whitely's, 93 per cent
Preston Elementary, 92 per cent
American Corner, 92 per cent
Denton Grammar, 92 per cent
Greensboro Elementary, 90 per cent
Preston High, 90 per cent
Smithville, 90 per cent

Colored Schools

Denton Secondary, 100 per cent

The attendance banners are awarded to Nichols Rural, Denton primary and Greensboro colored.

BURRSVILLE

Mrs. Ida Garrett went to the Milford Hospital on Friday.

Mr. and Mrs. Johnnie Baker and children and Mr. and Mrs. Crester Baker, Mr. Floyd Baker and Marian Stafford were the guests of Mr. and Mrs. T. R. Benson and family recently.

Mr. and Mrs. Elmer Trice and Miss Florence were the guests of Mr. and Mrs. George Wyatt recently.

Miss Edith Simpson is visiting her mother, Mrs. Margaret Simpson.

Mrs. Margaret Brubaker is visiting her parents, Mr. and Mrs. George Wyatt.

Mr. John Chance and daughters Loleta and Catherine were the guests of Mrs. Will Greenly recently.

Mr. and Mrs. Jack Stevens and family of Frederica were the guests of Mr. and Mrs. C. N. Fountain recently.

Miss Elizabeth Fountain has returned home after a visit with her sister, Mrs. Harland Blades.

Revival services are in progress at Union M. P. Church with very much success. The preaching is by the pastor. Rev. Betts.

Miss Edith Fountain is visiting her sister, Mrs. David Ellwanger, of Greenwood, Del.

Mrs. Viola Harris of Philadelphia is visiting her parents, Mr. and Mrs. J. E. Morgan and family.

Mr. John Smith and daughter Levia were the guests of Mr. and Mrs. Alda Robinson of Mastens Corner, Sunday.

Mrs. Houston Thawley and Elsie Jester have been recent guests of Mrs. Harvey Collison.

Mr. and Mrs. James B. Breeding entertained Rev. and Mrs. Jump and son Billy. Mr. and Mrs. Charles Butler and children, and Mrs. Florence Robinson and son Ollie for supper Sunday.

Mrs. William Satterfield is improving at this writing.

Miss Edna Wyatt was the guest of Miss Victoria Betts on Sunday.

Mr. Charles Chance was the guest of his sister, Mrs. Enos Cleaves, on Sunday.

Miss Lucy Pearson was the guest of Miss Edna Maloney Sunday.

Miss May Hopkins has returned home after visiting her aunt, Mrs. Edward Hopkins.

Mrs. Margaret Simpson and daughter, Miss Edith Simpson and Allen Runions visited Mrs. Raughley on Sunday.

Mr. and Mrs. Clayton Layton and son Leland were the guests of the latter's parents, Mr. and Mrs. J. E. Morgan, Sunday.

A business meeting was held at the Peoples' International Holiness church Friday evening.

Mr. and Mrs. Norman Outten were the guests of Rev. and Mrs. W. Forest on Sunday.

Mr. and Mrs. Clarence Voss visited Mr. and Mrs. William Satterfield on Sunday.

Mr. and Mrs. Henry Stafford entertained on Sunday Mr. and Mrs. Otis Stafford and son Clayton.

"EACH CITIZEN A GUARDIAN OF LAW"

The good citizen is under obligations to assist in the enforcement of the prohibition law and is in a sense a guardian of all our laws. To me there is a great invisible government back of all the institutions of government. It is the spirit of America. It is our American idealism. It is our American militant righteousness. It is our progressive civilization and there is something emanating from this invisible power to the hearts of all true Americans, an invisible influence that reaches each citizen and makes him a defender of all those laws which have to do with the welfare of our country and the well-being of our countrymen.

—Federal Prohibition Commissioner, Roy A. Haynes.

Limited Quantity of Free Seeds

Senator Weller has sent The American Union a limited quantity of vegetable seeds for spring planting. These may be had free at the office. As the supply is not large, we would suggest that those who really want the seeds make application for them at once.

Painting Court House

Mr. Boone Beauchamp, painter and decorator, is redecorating the woodwork and walls of the offices and halls in the Court House at the direction of the County Commissioners. The work already done makes a big improvement in the looks of the building.

DR. J. O. KNOTT TO ADDRESS LYCEUM

Dr. J. O. Knott, of Washington, D. C., who will fill the next number of the Lyceum Course for the season at Denton, comes to us not only with the highest Chautauqua and Lyceum record, but endorsed enthusiastically by the Speakers' Bureau of the National Council for Limitation of Armament.

This organization, of which Dr. Paul M. Pearson, of the Swarthmore Chautauqua, is a member, has urged Dr. Knott to speak on the Washington Armament Conference. His subject will be "What the World is Talking About."

We quote from a letter to Professor Norsted from Mrs. Edward Lawrence Hunt, director of the Speakers' Bureau, National Counsil for the Limitation of Armaments:

"To the High School boys and girls, we older people should leave a legacy of peace. It was unity won the war, it will be unity that will win a world of peace based on international justice. I hope all the mothers and fathers will hear Dr. Knott's speech as well as those who in a very few yars will have this wonderful nation of ours in their keeping."

FLUSHING WITH KEROSENE OF DOUBTFUL VALVE

The practice of flushing the working parts of an internal combustion engine with kerosene after draining it of old crank case oil has become so common as to be almost universal, but recently several authorities have come forward expressing their doubt as to the value of the practice.

The objections which have been brought forward to it are as follows:

First, a certain amount of kerosene is likely to become entrapped in natural pockets and troughs which are formed through details of the engine design, and when new oil is put in it will be diluted by the kerosene caught in these pockets.

Second, many engines which have circulating pumps above the crank case for the lubricating system required that the pumps be primed with lubricating oil to insure immediate circulation of the oil on starting. When kerosene is employed, it is not effective as a priming and it is difficult to start circulation

Third, many operators will turn the engine for a few minutes with a starter in order to make the flushing thorough. The effect of this on the engine is very bad indeed

Fourth, it is claimed by some that the gritty abrasive particles which collect in the crank case are more readily disturbed and circulated when kerosene is used for flushing than otherwise. Naturally, the result of this cannot be good.

The frequent chang of crank case oil is undoubtedly a strong factor in improving the performance of an engine and in adding to its life but care should be used as to the method employed in making the change.

POSTOFFICE DEPARTMENT LARGEST INSTITUTION OF ITS KIND IN THE WORLD

Washington, Jan. 10.—Declining that the United States postal service is the largest distinctive business the world, Postmaster General Hays gives some remarkable figures concerning that department. According to the data which he furnishes, the postal service has 326,000 employes. It serves 110,000,000 customers. It spends $600,000,000 annually, and the annual turnover of business is more than $3,000,000,000. In every hour of the 244, 1,400,000 letters are mailed, or more than 12,000,000,000 letters a year.

To carry this mail over 14,000,000,000 postage stamps and 1,125,000,000 postal cards are sold annually. The money order department sells each year more than 150,000,000 money orders, in an aggregate sum exceeding $1,500,000,000.

The parcel post division of the postoffice department is the largest express company in the world, carrying over 2,500,000,000 packages a year. The postal savings department is the largest postal savings bank in the world, having over 500,000 individual depositors.

The dead letter office handles 19,000,000 undelivered letters a year, practically all of which are due to the neglect of the public in properly addressing them.

Every day, 43,000 rural mail carriers start on their journey, serving 6,500,000 families and travelling 1,170,000 miles before they return to their offices.

The postoffice department in handling mail consumes 800,000 miles of twine a year, enough to girdle the earth 30 times; 1,2000,000 lead pencils and 25,000 quarts of mucilage.

HENDERSON

Mr. and Mrs. S. C. Johnson are now visiting friends and relatives of Wilmington.

Miss Olivia Coffin of Denton spent the week end with her aunt, Mrs. Frank Gough.

Mr. and Mrs. Montague and children spent Sunday with their parents, Mr. and Mrs. G. W. Moore of near Kenton, Del.

Mr. and Mrs. C. D. Sharpless were entertained at the home of Mr. and Mrs. George Carrow on Saturday evening last.

The Laides Aid met at the home of Mrs. Joseph Harris, on Wednesday afternoon last. It will meet at the home of Mrs. John Pritchett next month.

TO LECTURE ON TRANSPORTATION

Honorable Harry Covington will address a meeting in the Court House this evening (Thursday) on the beginning of the Eastern Shore Transportation Company, what it is, when it is expected to start, and how it will affect the people of this particular section.

Everybody is cordially invited to attend. The meeting will open at 8 o'clock.

GREENSBORO

Mr. W. A. Thornton is on the sick list this week.

Smith Edwards is improving from a case of scarlet fever.

Miss Anna Betson is spending a few days with her mother here.

Mrs. E. M. Noble entertained the card club Wednesday afternoon.

Miss Ethel Jackson is the guest of Mrs. William Jarrell, near Ridgely.

Mrs. Alvah Dabson is spending a few days in Philadelphia this week.

Mrs. James Thawley will entertain the Ladies Aid this evening (Thursday).

The young folks enjoyed skating on Pippin's pond the latter part of last week.

Mr. and Mrs. Arch Mitchell, of Burlington, N. J., were visitors here this week.

Miss Annie Baggs was a guest of Mrs. William Diggins at Queen Anne Tuesday.

Mrs. T. C. Curry, of Bridgeville, Del., is visiting her mother, Mrs. Lydia Dabson.

Mrs. Bessie Mitchell, Miss Grace Jarman and Mrs. Nelson Bishop are one the sick list.

Mr. and Mrs. Henry Weaver moved from their farm near town, to a farm near Camden, Del.

Mr. and Mrs. T. P. Green and Mr. and Mrs. L. Irving Jones spent Sunday with relatives in Denton.

Miss Elsie V. Ward, of near here, visited Miss Blanche Allcorn in Wilmington a few days last week.

Mrs. Milton H. Roe, who has been spending several weeks in Baltimore, has returned to her home here.

The Rev. Mr. Melvin G. Morris, left here Tuesday to conduct a funeral at Lonaconing, Western Maryland.

Miss Margaret Christian, of Philadelphia, is the guest of Mrs. Charles L. Jarrell, Jr., at his farm near town.

Mr. John S. Dickinson, of New York City, was the week-end guest of Mrs. D. A. Lobstein and daughter.

Mr. R. G. Adams is relieving A. G. Smith at the depot here while he is attending the legislature at Annapolis.

The Guild of the Church of the Holy Trinity will hold a bake in Mrs. Langrell's Ice Cream parlor Saturday at 1 o'clock.

Mr. and Mrs. Swepson J. Richter, of White Sulphur Springs, W. Va., are guests of Mr. and Mrs. Howard R. Pritchett.

Mrs. Anthony, of near White's Church, Del., has been visiting her parents, Mr. and Mrs. Charles Travis, Church street.

Mrs. Temple Smith was the guest of her parents, Mr. and Mrs. A. A. Christian, in Philadelphia, the latter part of last week.

Mrs. Maggie Jarrell, of Chestertown, is spending some time at the home of Mr. and Mrs. Charles L. Jarrell, Sr., on Railroad avenue.

The 100-foot smoke stack at the Greensboro Milling Company's plant was blown to the ground by the high wind Wednesday morning.

The ground was broken last week by the Rev. Melvin G. Morris and excavation begun for the new $25,000 Greensboro Baptist Church.

The Rev. Melvin G. Morris will preach the following sermons at the Baptist Tabernacle next Sunday: At 10:30, "God's Salt," and at 7:30, "Dr. Jeykle and Mr. Hyde."

Mr. and Mrs. Claud Conner, of near town, entertained Sunday Mr. and Mrs. Noble Bickling, and little daughter, of Goldsboro, and Mr. and Mrs. Earl Deaner and son Russell.

Mr. J. H. Junghman, of Washington, medical examiner for the beneficiary degree for the Jr. O. U. A. M., will be in Greensboro next Wednesday and visit Council No. 191 in the evening All members are cordially invited to be present.

Mrs. J. A. Leach entertained her Sunday School class Tuesday evening.

Messrs. H. L. Cohee and Warren VanSant motored to Galena Sunday where Mr. VanSant's brother was burned out early Sunday morning. The family was forced to leave the burning house in their night attire. Mr. VanSant's mother, who was living with her son there returned here with her son.

S. S. Elects Officers

At the annual election of the Sunday School of the M. E. Church held recently, the following officers were named for the ensuing year: J. Ed Willis, superintendent; R. B. Rawlings, assistant; Charles Jackson, secretary; Miss Ethel Jackson, treasurer; Ralph Sharp, Joseph Bernard and Samuel Bilbrough, librarians; Mrs. O. D. Zacharias, junior superintendent; Miss Lena Lewis, primary superintendent; Mrs. J. H. Jordan, beginners superintendent; Mrs. James Thawley, cradle roll; Miss Louise Swann, organist, and Mrs. Alice Wing, assistant.

Installation of Officers

At their regular communication on Tuesday evening, Temple Lodge No. 128, F. and A. M., installed the recently elected officers for 1922, as follows:

F. Baynard, W. M.; J. H. Pastorfield, S. W.; J. F. Wright, J. W.; William Murphy, Secretary and H. Clay Hobbs, Treasurer.

WORST STORM IN 20 YEARS SWEEPS ATLANTIC COAST

The worst storm in over twenty years struck the Atlantic Coast yesterday and for 24 hours played havoc with everything. A gale of wind and lashing rain accompanied it, with more or less snow and sleet. Accidents are reported from all over the state. Wires were blown down and poles broken by the force of the wind. People were swept from their feet and thrown about, while at sea the storm lashed the waves to fury, tearing boats from their moorings, and tying up shipping generally.

It is said that had there been more snow the storm would have equalled the famous blizzard of '98. As it was, the hurricane frag was raised on the Custom House in Baltimore for the first time in 19 years.

The Problem of Soil Nitrogen

There is no question but that the nitrogen problem is one of the biggest of the many which the farmer has to face when it comes to the soil fertilty of his place. Every year of cropping with nonleguminous crops sees a reduction in the nitrogen returned through manures put back on the land.

The Purdue experiment station has demonstrated that on land in wheat continously for thirty-two years, the loss of nitrogen has averaged forty-two pounds per acre per year, a total of right around a fourth of the entire original supply of nitrogen. In this time the actual loss of this valuable plant food has been over a third greater than was actually removed by the crop itself. Furthermore, it is pointed out that more nitrogen is lost with corn than with wheat, due both to the added loss incident to cultivation, and to the nature of the crop itself.

The natural and inevitable conclusion is that more attention will have to be paid to nitrogen fixing crops, the legumes.This would double advantage now. Instead of seeing how much grain can be raised, and how much nitrogen can be sold off in cheap corn or other crops, this is the time to build for the future by putting in a large acreage of clover and other legumes.

It is estimated that only a tenth of the cultivated land in the middlewest is in legumes. This is not a big enough proportion, right now. Futher, a direct return can be had with crops on clover land.

In an Indiana experiment made to determine the value of clover, a corn-wheat-clover rotation was compared with corn-wheat-timothy. The corn yielded 6.5 bushels more with the clover, and the wheat 3.6 bushels more under the same conditions. This may not appeal to you right now with prices where they are, but remember, prices are not always going to be down. It pays to have good land always, and it pays big to have productive land when the big crop means big returns.—Successful Farming.

BRITISH HEALTH OFFICER ON PROHIBITION IN AMERICA

Sir Arthur Newsholme, late principal medical officer to the Local Government Board of London, has been in America for the last two years. At the Royal Society of Medicine he has given the results of his study of the prohivition law and the Journal of the American Medical Associaton summarizes his statements. The results of the first year of prohibition, he said, were only partial; but although it was still easy for the millionaire visitor to the United States to get intoxicating drinks, it was yet a fact that for the vast majority of the population alcoholic drinks had become unobtainable or were too expensive for frequent indulgence. There were 150,000 physicians in the United States, and every one of them had to take out a permit to enable him to prescribe alcohol. Four out of every five had not taken out the permit, and in twenty-four out of the forty-eight states not a single physician had taken out one. As the results of prohibition, there was evidence of increased prosperity and the diversion of large sums to the purchase of better clothing, etc. Rescue work in the large cities had been largely replaced by preventive work. Drunkenness and admission to hospitals for acute alcoholism showed remarkable declines, and although alcoholism was often but one part of a mesh of evil circumstances, the short cut toward the removal of the evil which prohivition provided promised to be successful in diminishing not only disease, but also poverty and crime. He regarded as fantastic the fears that prohibition would lead to a similar ban on smoking. A country would never give a majority vote for the abolition of a personal habit unless that was associated with serious national evils. The case for compulsion was that moral suasion acted slowwly, and meanwhile the multitudes of innocent people continued to suffer, and the community suffered in pocket and efficiency. Whetrh prohibition would endure the test f enforcement in America remained to be seen, but his view was that the American public will endorse the actien taken and will insist on its continuance and extension. Sir Alfred Pearce Gould, wwho presided, speaking as surgeon, said the one thing which lay at the root of the justification of prohibition was the great physiologic fact of the influence of alcohol on the human body. He believed that anything which thwarted or lessened the power and development of the body could be rightfully prohibited.

Though Christmas is over, our stationery department is still doing business. Bring in your Christmas paper and have it monogrammed.

FARMERS' CO-OPERATION HELD TO BE NECESSARY

Dr. A. F. Woods, of U. of M. Wins Applause When He Addresses Convention.

GROUPS TO BUY JOINTLY

Co-operative buying and selling must be practiced by Maryland farmers before they can hope to get the best possible results from their farms, speaker yesterday told more than 500 farmers gathered here. They are from all parts of the state, come to attend the annual convention of the Maryland Agricultural Society and its seven affiliated organizations.

The convention, which is being held at the Southern Hotel, was opened by an address of welcome by Mayor Broening, after separate meetings of the affiliated organizations had been held in the morning.

In an address delivered before the general meeting Dr. F. A. Woods, the president of the University of Maryland, declared the great problem confronting the farmers of Maryland today is agricultural organization and marketing.

Says Farmers Have Been Too Busy

Farmers in the past have been so busy learning how to produce and meet the difficulties of farming, he said, that they have turned over to other people the most important business of the farm—selling the products. This means, he added, that farmers now must organize thoroughly to take care of this highly important part of the work. Explaining that some mistakes might be made at first, he cautioned the farmers not to give up.

"About 20 per cent of the energy we have invested in crops," he said, "has been lost to us because we have neglected the marketing of our products.

"We are starting co-operative buying now. When farmers buy individually their credit is unknown and the firm from which they buy charges for the risk. Under co-operative buying however we can say to the firm that we will send a check with the order and then we will buy in great quantities."

Dr. Woods said no other state is so well organized for helping the farmer. The extension service, he explained, is in touch with every farm home in Maryland, while the county agent also performs valuable service. Problems facing the farmer are solved at the experiment station, he added, ways for fighting diseases being worked out, among other things. This service alone, he declared, saves $14,000,000 a year in Maryland, more than is spent on the entire Department of Agriculture.

Interested In Marketing

Not only is the farmer interested in the proper marketing of his goods, but is interested in creating a market, declared A. S. Goldsborough, of the Merchants and Manufacturers Association. The great distribution problem of the farmer now, he added, is not confined to the state or nation but is international.

Business men throughout the country, Mr. Goldsborough said, shiver when they realize that the purchasing power of the farmers has decreased enormously during the last 18 months as a result of the falling prices of grains and other farm products. He explained that this was brought about largely by the inability of Europe to purchase raw materials from the United States and advised the farmers to urge Congress to grant a loan to Europe so manufactures could be resumed.

Following the adress of welcome by Mayor Broening, a response was made by D. R. Sloan of Lonaconing, Md. T. B. Symons, secretary-treasurer of the society, then delivered his annual report after which D. G. Harry, president, made his report for last year.

Committees Are Named.

President Harry appointed the following committees: Legislation, J. H. Kunkel, Cecil County; R. S. Snader, Carroll County, and Orlando Harrison, Worcester County; agricultural program, H. J. Patterson, Prince George's County; J. W. Heaps, Harford County, F. B. Matthews, Charles County, L. S. Patterson, Carroll County and J. R. Arringdale, Talbot County; auditing, Richard Vincent, Baltimore County, Dr. S. A. Nichols, Howard County, and E. E. Nock, Worcester County; resolutions, C. G. Welder, Somerset County, J. E. Patten, Dorchester County, D. S. Pearce, Baltimore County, J. W. Henderson, Montgomery County and F. P. Bomberger, Prince George's County; co-operative buying and selling, D. S. Pearce, Baltimore County, J. R. Selby, Howard County, Mr. Patten, Mr. Henderson and G. H. Stevenson, Washington; membership, Mr. Henderson, D. S. Pearce, Baltimore County; H. E. Nelson, Talbot County, W. G. Bishop, Charles County and Mr. Heaps.

Steps were taken by the Maryland Crop Improvement Association toward reviving the Maryland Hay and Grain Show and the annual Maryland Week. A committee was appointed to consider the scheme.

Separate meetings were also held by the Maryland Sheep Growers' Association, Maryland State Horticultural Society, Maryland Vegetable Growers' Association and Maryland Beekeepers' Association.

MOVING OR MOVED?

If any of our patrons have been unfortunate enough to have had to move this year will you kindly notify this office so that we may see to it that your paper is sent to the proper address. We thank you.
