BOVINE TUB. ERADICATION

(Continued from Page 1)

third and the owner loses one third. Whatever money is received from the butcher is divided among all three. If for example the Butcher allows $15 for the animal, the farmers total Indemnity will be $55.,etc. Registered stock are appraised as high as $150, and the same proportional allowances are made as for grades, the farmer in this case receiving a minimum indemnity of $100.

To receive this indemnity, the owners must have their Tubercular cattle shipped to the nearest town carried out. For Caroline county Baltimore, Md., is the nearest and cheapest point to ship to. In badly infected herds the premises are usually infected, and therefore disinfection is necessary. The services of a Government Disinfecter, may be secured in serious cases to superintend the disinfection, but in all cases the owner must supply the disinfectant.

A complete record is kept of the Post Mortem reports of all animals slaughtered under Federal Supervision, and these reports are available at all times to owners. This report shows the extent each animal was diseased, and of course checks up the results of the Tuberculin Test.

From the foregoing article it should be evident to all concerned, that every Cow in the United States, and elsewhere for that matter should be tuberculin tested. All Dairymen are therefore urged to give this matter very careful consideration, talk it over with your neighbors, educators, and county Agriculture agents, and then co-operate with the State and Government, submit your herd to the test, and advise others to do so too.

Some States, Counties, and Communities compel the test, but it is apparant to all, that by far the best way, is by the Voluntary Co-operation of the dairyman. Make your application for the test, either through the County Agent, Mr. Collins Thomas, at Denton, or Direct to the U. S. Bureau Of Animal Industry, 825 Fidelity,Bldg, Baltimore, Md. Then fill out the application blank sent you after carefully reading it, and I shall be very happy to apply the test as soon as possible. The inspectors only require that you have the cows tied up and restrained, the inoculation and observation only taking a few minutes. The transportation of the veterinarian is divided up between the farmers making the testing in the various areas.

ARTHUR H. BRYAN, VMD.,B Sc.
Veterinary inspector, U. S. Bureau of Animal Industry, Baltimore, Md.

Nuttle.

The subject under discussion was "Education," a phase of which, "What Can Be Done Toward Standardizing the Rural Schols," was taken up, also the matter of the furtherance of the hot school lunches.

The question of the Federation tax was voted upon.

Following the business, delicious refreshments were served and the club adjourned till the next meeting, announcment of which will be given later.

UTILITY S. C. WHITE LEGHORN

Baby Chicks

from birds selected for health, vigor, conformation and production.

Satisfied customers repeat their orders, viz—"Send me 1000 chicks, April hatch, as I have not had such chicks as I purchased from you three years ago. Wish I had used my own judgment and ordered your chicks in 1920 and 1921, instead of buying cheaper stock."

Write for prices.
