Our Peach Tree Guano! Our Peach Tree Guano!

The most successful growers of peaches are using fertilizers upon their orchards, and they believe it is necessary that the tree must be fed to produce yearly crops. A large crop one season necessarily reduces the quantity of fruit the next, without you supply to the tree what the fruit takes from it. A properly prepared and low cost Fertilizer is cheaper than fruit, therefore you must make a good profit if you feed your trees. Peach trees should not have applied to them any fertilizer containing sulphuric acid. Nearly all the Peach Tree Fertilizers are made with this objectionable article. Our Peach Tree Guano does not contain one lb. of sulphuric acid, and the wonderful results from its use prove our claim that it is the most successful Peach Tree Food upon the market. Ask the gentlemen mentioned below their opinion of these goods. Dr. John J. Black, New Castle, Del., author of the celebrated work upon the peach, pear and quince, says: "I think the condition of my trees warrants me in saying the application of your tree Fertilizer to them has been of advantage."

BETTERTON, Md., Jan. 12, 1887.

MESSRS. C. W. KENNARD & CO.—Gentlemen:—In the Spring of 1885 and the Spring of '86 I used your "Special Tree Guano" with very satisfactory results. My crop was nice both years. The summer of 1886 my crop was large and fine and what was very peculiar my peaches did not rot on the trees, which I attribute to your fertilizer. HENRY H. McVAY.

WORTON STATION, March 4, 1887.

MESSRS. C. W. KENNARD & CO.—Gentlemen:—I used one ton of your "Peach Tree Guano" last Spring on our peach orchard with the most surprising results. The orchard is sixteen years old, and as the trees had not borne any peaches up to last year for over seven years, I advised Mr. Porter to let me cut it down, but we did not do so I am glad to say. We had a nice crop last year; the peaches were nicely colored and of fine size, We made three pickings from the trees; we counted the peaches in one basket and it contained only fifty-two peaches. I measured one, it was 10½ inches in circumference. The *Kent News* contained an account of the basket containing the fifty-two. For a large number of our peaches we got one dollar per basket, and the basket returned at the station. Another strange thing was; that the orchard kept its foliage longer and greener than any orchard I saw last fall. I certainly cannot help recommending your Peach Tree Phosphate, and advise all growers to use it. P. H. GEARS.

BETTERTON, Md., Jan. 12th, 1887.

MESSRS. C. W. KENNARD & CO.—Gentlemen:—We have used your 'Special Peach Tree Guano' with wonderful success on old peach trees, and in our nursery, the most remarkable result was on our June budded trees; we gave them an application when we budded in June, and where we made the heaviest application our trees were over five feet high in the following October.—Where we only used a small quantity the trees were about two and a-half feet high, an increase in size of one hundred per cent. We truly believe your "Peach Tree Guano" the best article made for peach trees, and the lowest priced; shall need more next spring. We will be pleased to answer any questions regarding its worth, and advise all nurserymen and peach-growers to use it.

Very respectfully,
H. H. McVAY,
J. T. VANDEGRIFT,
Nurserymen.
