Unanimity of feeling, and harmonious action are the characteristics of the day. In every department this spirit of the kindest and most gentle feelings that can exist in a community are felt, giving a cheering ray of hope, to those whose paramount interest it is to ensure stability of our young and interesting Republic

I have again handed Mr Ruggwurm a list of Medicines now wanting in the Colony, with only slight differences from the one sent by the Trafalgar. My receiving medicines but once a year renders it necessary that the quantities should be larger than heretofore.

I have also to request that I may be supplied with Paxtons, Anatomy with plates, for the use of a young man (named Fletcher) who commenced the study of Medicine about nine mos. ago. Or should it be difficult to procure above work, please send Anatomical Plates with full explanations.

I hope my brother who visited the States with Dr Hall was honored by ~~an~~ your acquaintance. His object in going you were doubtless apprized of, and I am highly gratified that one to whom I am so nearly related should be among the first, who set out to attain a branch of knowledge calculated to be of vast importance on the coast of Africa

With my best, and most sincere wishes for the promotion of the cause, so nobly espoused by yourself, and of all those the one most likely to effect the promotion of the sons of Africa

I remain Dear Sir

Your obedt Servt
