FEMININE TOPICS

Shabby leather will be greatly improved in appearance by rubbing it over with white of egg that has been beaten to a froth.

—

Novelty voiles are being used for undergarments. Voile can now be had in cross-bar effects, stripes, checks and drawnwork, in many dainty colors.

—

A jaquette of crepe de chine has bands of printed knitted fabric as a border.

—

To clean iron rust from water pails and dippers, squeeze lemon juice in them and let them stand for a few hours. If rust is not entirely gone, rub the lemon juice thoroughly over them.

—

It is not a sign of stinginess to count your change when it is handed to you in the store, but just common sense. But it is downright lack of consideration not to count your change until after you have left the cashier's window and then to return to complain.

—

A weak solution of vinegar and water will remove finger marks from polished furniture. Then rub with the usual furniture polish.

—

Pretty gay furniture coverings of chintz, cretonne or printed linen will transform a gloomly dark toned living room into a delightfully cool and refreshing summer room.

—

Before starting on a hiking trip, soak your feet in warm water to which a good handfull of ordinary salt has been added. Dry thoroughly, then rub the soles and heels with mentholated spirits and dust with boracic powder. This will prevent the feet from becomming hot and uncomfortable. Should there be a tendency to blistered heels, moisten a cake of soap and rub it over the inside of the heel of the stocking, and inside the heel of the shoe.

—

"Eggs backed in cheese sause," is a good luncheon or supper dish, and, served with tomato salad, bread and butter, makes a well-balanced meal. Hard boil eight eggs and slice them. In a buttered baking dish put a layer of white sauce, a layer of egg, and one of grated cheese. Repeat until dish is full, having cheese on top. Too long cooking will toughen the egg whites.

—

This is rather a novel way to cook fresh cod steaks. Rub with a cut lemon, sprinkle with sale and pepper and rap in greased paper. Place in top part of double boiler and steam for an hour. Place on hot dish, remove paper, and serve with the liquid that flows from the fish. Garnish with parsley and lemon.

—

Designers in Paris say that dyed sable squirrel is going to be used as a trimming for fall and winter suits and one- piece dresses.

—

Another remedy for scorch which is recommended is bread crumbs, not too stale, rubbed over the fresh scorch, which is said will cause the brown stain to disappear.

—

Blue serge is one of the popular materials being used for dresses and suits in Paris.

—

When several people are taking a trip together, a common purse would do away with a lot of trouble and confusion. Each morning every member of the party puts in a special sum and all common expenses paid from this, as carfares, lunches, fees and other items. Personal expenditures or extras should be taken from the individual purses.

—

The hand-knitted handkerchief bracelet should match the embroidery on the sport frock with which you wear it, or perhaps the sweater, or bathing suit. This means that you will have to make several.

—

An attractive peach pie is made by filling a previously backed pastry shell with the halves of large juicy peaches. Put a spoonful of meringue in the cavity of each peach and brown delicately. Chill.

—

To make the outside of roast pork crisp and brown, salt should be rubbed on it before cooking.

—

Some of the imported fall hats are in tricornes and upturned brim shapes.

—

To make "hot cheese sandwiches" cut the bread a little thicker than usual and trim off the outer brown crust. Cut Americen cheese in thin slices and place between two slices of bread. Have ready one cup of milk to which has been added a beaten egg. Dip the sandwiches in this, but do not let them remain long enough to get softened. Fry until a golden brown in butter and serve hot with a spoonful of currant jelly on eash.

—

The flowing embroidered veil is agin being used to trim haes. As before it is thrown over the hat and drapped from the side and back.

—

One-half cup of evaporated milk and one-half cup of water will about equal ane cup of cow's milk. When used in cooking, the undiluted evaporated milk is almost as good as cream.

—

Anentirely new fabric for blouses has made its appearance. It is a woven material that looks much like a silver mesh.

—

Many women are wearing the spun glass bracelets, and it is now rumored that they are very smart with bathing costumes. Eight and ten are being worn at a time.

STANDARDIZATION OF FARM IMPLEMENTS WOULD HELP

During the coming year Maryland will take the place of a crusader in behalf of the standardization and simplification of farm machinery, if C. Bosley Littig, of Baltimore, long a champion of the cause, has his way.

Losses in time and money are the result of complicated and varied types of farm machines designed to do the same kind of work, according to Mr. Littig, and this fact has long been recognized by leaders of agricultural thought and by practical farmers.

Mr. Littig does not pretend to be the pioneer in the cause for a number of years he has interested himself in bringing the problem of complex agricultural machinery to the attention of farmers, manufacturers and the public. The standardization f farm machinery was much discussed during the period of the war, when prices were high and when every moment of the farmer's time was directed to supplying the food requirements of the world. The agitation accomplished little, however, because of the unsettled conditions.

The present need for lower production costs on the farm in the face of falling markets for agricultural products, should give the project new life in the opinion of Mr. Littig. The need for economical production on the farm is apparent and Mr. Littig has found by investigations during the past six years that practically every farm paper and agricultural college agress that standardization of farm machinery would favor economical production.

The movement has made progress. The American Society of Engieers has been working along this line for a number of years and has much valuable work in progress. In 1922 the Maryland Legislature passed a joint resolution asking the federal government to undertake an inquiry of farm machinery manufacture with a view toward its standardization. An amendment of similar import was attached to the General Agricultural Appropriation bill in Congress. but was cut out in conference, not on account of opposition, but because it was thought such an amendment might jeopardize passage of the bill.

Some of the largest machinery manufacturing companies have recognized the importance of standardization, according to Mr. Littig, and have applied its principles to spark plugs and similar parts of power machinery. While this is a valuable step forward, the present and more imperative need is for the standardization of nuts, bolts, threads, mowing knives, wheels, axles and other interchangeable parts of ordinary farm machines, in the judgement of Mr. Littig. If the farmer could use parts of old machines, for repairs or secure from repair agencies parts that would fit almost any standard machine of a given type an enormous amount of time and expense would be saved, he argues.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions.

HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health.

Sold by druggists for over 40 Years.

HARDING MEMORIAL STAMP APPROVED BY COOLIDGE

Washington, Aug. 15 (Special) .—President Collidge today approved the issue of a memorial 2-cent stamp in honor of President Harding, which the Postoffice Department will put on sale within the next 30 days. The stamp will be black. Postmaster-General New took three designs, bearing engravings of the late President, to the White House, but neither he nor the President could determine their preference. Mr. New will make the selection.

So far as it is known no black memorial stamp has been issued in this country. The new stamp will be continued indefinitely, but will not replace the 2-cent Washington stamp in general use.

Twenty-five thousand bushels of the early apple crop from the orchards of the Delaware Apple Company, at Bridgeville, have been sold for $40,000, it was reported at a meeting of the directors in the Hotel du Point, Wilmington, last Saturday. Joshiah Marvel, prominent attorney, is president of the company.

The company has 75,000 apple trees in orchards near Bridgeville. This year'scrop will total approximately 75,000 bushels, it is predicted.

ORPHANS COURT

At the regular session of the Orphans Court Tuesday, Judges West, Harper and Shawn were present and the following business was transacted.

The last will and testament of John L. Faulkner, deceased, filed in this court by John W. Faulkner, custodian after having been duly proven was admitted to probate. The executor named in the will qualified by filing an approved bond, notice to creditors ordered and Robert Jarrell, Jr., and B. Ross Duling were named as appraisers

John W. Altfather, administrator of Daniel Altfather, deceased, filed an account of sales of the personal estate, a sperate debts list and an interest account, his first and final administration account and distribution.

Effie L. Hignutt, administratrix of Charles W. Andrews, deceased, filed inventory and appraisement of the personal property and an order to sell was granted.

Elizabeth F. Bradley, guardian of James T. Moore, minor, filed her third guardianship account for which she received proper allowance.

I. Hubbard, administrator of George W. Moore, deceased, filed an interest account, his first and final administration account and distribution.

In the matter of the estate of Mildred Morris, minor, on petition and order of court, Maty B. Morris, guardian was authorized and empowered to pay over a certain sum of money deposited in the Federalsburg bank of the Eastern Shore Trust Company, she being now of full legal age.

She Did Her Best

A pretty girl became engaged to a poor young man who went West in order to make a home for her. The other day a gril friend said to her: "Are your thoughts always faithful to that gallant young fellow who is toiling so hard for you out there in Idaho?" "Oh, dear, yes," exclaimed the pretty girl. "When other chaps kiss me, I always close my eyes and try to think it's poor darling George."

Flywheels - and gasoline - twenty years ago

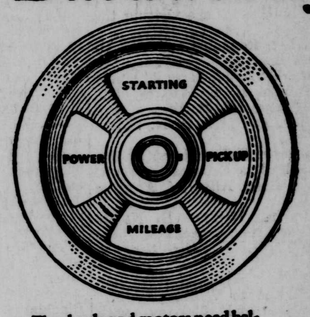
Remember the big flywheels on the old one and two cylinder cars? They depended a lot on the weight of the flywheel to make up for poor balance in the motor. And with the highly volatile, therefore wasteful, gasoline of those days people had all kinds of trouble taking the hills—sometimes even in getting started.

"Standard" Gasoline today, like the finest of cars, is a scientifically balanced product. Balanced to give you maximum power as well as instant starting—long, economical mileage as well as snappy pick-ups in traffic and at the crossroads—smooth, even running always, at lowest throttle or wide open.

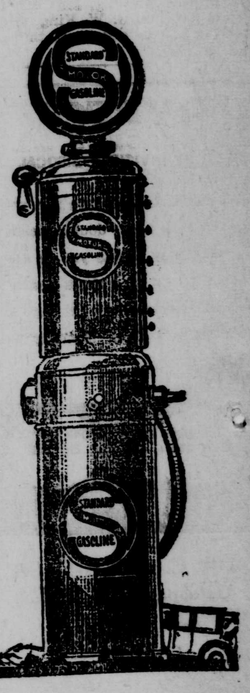
It's the all-round excellence of "Standard", the Balanced Gasoline, that makes it the most satisfactory motor fuel you can buy today. It is always easy to get, at those familiar S.O. filling pumps.

STANDARD OIL COMPANY
(New Jersey)

Balanced!



Flywheels and motors need balance to make the best use of power. "Gas" for your car must be balanced to make *power itself* ample, flexible and cheap.



Made right here in Maryland, at Baltimore, Sold at hundreds of pumps that bear this mark.

"STANDARD"
The Balanced Gasoline
