An appreciative audience gathered last Sabbath at Thawley Church at eleven o'clock to witness the children's day exercises by the children. The pieces were well spoken and the singing showed these scholars had practiced them, selections rendered many times. The pastor gave a short address requesting a liberal contribution to missions after which an offering amounting to $33.57 was received.

Piney Methodist Protestant Church held its children's day service last Sunday at 3 p. m. Long before the hour people arrived at the church and by the time set the church was filled. Never before have the children excelled the program rendered and every one present thoroughly enjoyed several recitations as well as the singing. The sum of $14.82 was contributed toward Foreign Missions.

Ames Sunday School located at Hobbs presented to a filled church their program for children's day last Sunday evening at eight o'clock. The pieces were well rendered and appreciated by all present. A wind which reached cyclonic proportiens visited this vicinity Sunday afternoon about 4 o'clock, and left destruction in its wake. The worst of the storm only struck a norrow streak through the community. Trees were blown down in Greensboro and some of the streets were blocked for a time. John R. Meekins, one of our butchers suffered the heaviest loss from the storm when the barn on this property, which is located on Maple Avenue extended, was blown against the back of his house with such force that the building was moved several inches on its foundation. The barn when it struck the house was completly upside down and badly wrecked. The dwelling was very badly damaged, plaster being all cracked, chimneys broken off and the whole frame work loosened up by the terrific force of the barn against it. A large number of young chickens were killed when the barn turned over. Mr. and Mrs. Meekins were away from home at the time. Mr. Meekins only purchased the property a few weeks ago and as he did not have any storm insurance on the property his loss will amount to several thousand dollars.

The barn of Mr. Wesley, former postmaster, on Academy street, was practically destroyed when it was moved several feet off its foundation. The roofs on the barns of the Standard Oil Company at the depot and that of Warren VanSant in town were badly damaged.

A porch was partly wrecked near the depot when a large tree was blown over on it. During the storm when Howard R. Pritchett started to move his Ford sedan a large limb fell on the top of the machine and damaged it to some extent. Some shanties near the F. P. Roe Company canning plant are reported to have been blown several feet by the gale. Several outbuildings on nearby farms were turned over.

Davidson Bishop, about 12 years old, son of Mr. and Mrs. Nelson Bishop, was caught in the wind and rain while visiting his uncle in Delaware and was nearly exhausted when he reached the house.

But little ran accompanied the wind here, but in other sections a great downpour came with the storm. Hail was reported in several sections of the shore.

The storm left the town in darkness and the churches of the town used oil lamps to begin their evening services with, but the electric service was soon restored.

Another electric storm came Sunday night and was accompained by a heavy rain.

Sunday's wind storm was about the heaviest which ever visited this community.

PENNSYLVANIA RAILROAD ISSUES AN ATTRACTIVE SEASHORE FOLDER

With a view to familiarize the pub lic with the attractive features and the development of the many Seashore pleasure resorts located along the New Jersey Coast, the Passenger Department of the Pennsylvania Railroad has just issued a profusely illusted 192-page folder, describing in detail the varied facilities and advantages of all vacation Seashore resorts from Long Branch to Cape May.

The folder is a highly artistic specimen of printing and is illustrated with a number of large half-tones, made from original photographs. The text has been carefully written with fidelity to detail, and the folder will prove an illuminating presentation of the attractions of the New Jersey Coast and its facilities for a week-end trip or a pleasurable vacation.

Those who have enjoyed a summer outing at Atlantic City, Asbury Park, Ocean City, Wildwood, Cape May, or any of the other New Jersey Seashore resorts, and those who read this folder will doubtless appreciate the fact that no vacation is wholly complete without a dip in the briny deep.

A free copy of this attarctive folder may be had upon request of D. N. Bell, Passenger Traffic Manager, Pennsylvania Railroad, Broad Street Station, Philadelphia, Pa.

KILL THE CUT WORMS!

Cut worms are present this year in large numbers and are doing considerable damage to both corn and tomatoes. About the only known way of checking the damage of this pest is by using a poisoned bait. The bait may be prepared as follows:

Wheat bran, 50 pounds
Paris green, or crude arsenic, 2 lbs
Blackstrop molasses, 2 quarts
Water, 2 to 4 quarts or more if needed.

Mix thoroughly together in a dry state the poison and the bran, then add the dilute molasses and stir vigorously until thoroughly mixed. Distribute this bait over the infested field broadcast, taking care to sprinkle it sparingly around each hill. In case bran cannot be readily obtained, middlings or alfalfa meal may be successfully substituted.

It is often advantageous to allow the mash thus obtained to sand for several hours before using it, as this seems to result in greater effectiveness.

In fields known to be infested, the distribution of this bait should be started as soon as the corn begins to appear above ground so that the cut worms may be eliminated as quickly as possible. During the early spring months cut worms do most of their feeding at night and burrow into the soil to the depth of an inch or two during the day, so that the bait will usually be more effective if applied during the late afternoon or early evening hours.

CAUTION—Poisoned baits should be distributed thinly. Prevent domestic animals, including fowls, from eating it. Arsenic and Paris green are poisonous to animals.
