FEDERALSBURG

Prospective Bride Is Showered

Miss Rachel Webster of Hurlock, whose marriage to Mr. B. C. Willis, principal of Federalsburg, will take place on Saturday was the recipient of two "showers" here recently.

The first shower "fell" last Saturday afternoon at the home of Miss Webster's cousin, Mary Davis with about twenty of her friends. Arriving, the guests were soon enmeshed in a cobweb and after disentangling themselves, found at the end of the threads, boxes bearing numbers for partners, with whom they seated themselves. Upon opening the boxes, they found articles to be sewn or embroidered for the bride's home. Later a delicious luncheon was served, at the end of which a tea wagon, bearing a mamoth wedding cake, was wheeled in for the bride to cut. The cutting proved difficult but when finally accomplished the cake opened and disclosed a "shower" of useful gifts. The "overflow" filled a large basket.

On Tuesday afternoon of this week, Miss Webster's aunt, Mrs. O. N. Spicer entertained about thirty friends for the same guest of honor. On this occasion the bride-elect was served with a folder containing rhymed advice as to the culinary art and announcing a "shower bouquet." Suddenly the strains of the wedding march sounded and the hostess entered bearing a huge bridal bouquet, which she presented. Upon examination the "flowers" proved to be such articles as are used in the kitchen cleverly disguised as blossoms. An express wagon piled with gifts and a hamper full were also presented. After these were observed amid much merriment the guests entered a contest in which guessing the contents of "grandmother's kitchen" engaged them.

Later refreshments of ice cream with chocolate sauce, cake, nuts and salted nuts were served.

The January meeting of the Parent Teacher Association was held Monday, January 12, at the high school with a small attendance due to the highly unfavorable weather. It was reported that the new see saws constructed, by the Manual Training Department, would be ready to be erected at the end of the month. Mr. Willis, principal, announced that the new metal flag pole would be placed as soon as the weather permitted. The walls of the auditorium presented an improved appearance, having recently been tinted at the expense of the P. T. A. After a discussion of ways and means to raise funds for the janitor's salery, it was voted that this topic be discussed with representatives of other associations in the county at the coming meeting. It is hoped that this plan may materialize to the advantage of all concerned.

Miss Louella Hackett, of Federalsburg, was married on January 10th, to Mr. Edward Frase, of near town, by Rev. L. Geiger, of Prtston. The newly married people will reside on a farm near here.

The annual exhibts of the Domestic Science and Manual Training Departments of the high school will be held at the school next Monday night. Miss Louise Nuttle and Mr. Victor Fritz are the instructors, respectively, of these departments.

The annual banquet of the Odd Fellows Lodge of Federaslburg will be held at the Masonic Temple on Friday evening, January 25.

The annual indoor festival of the Swarthmore Chautauqua will take place here on February 11, 12 and 13 at the temple.

Rev. B. F. Cambell, of Altoona, Pa., the envangelist, who has been conducting services for two weeks at Union M. E. church, left Monday for other fields, after a campaign of interest and unlift to many. Special services directed by the pastor, Rev. F. C. MacSorley, are being continued this week. Evangelistic services are also in progress at Christ M. P. church with Rev. Howard O. Keen, of Baltimore, in charge this week.

Under the direction of the State Bureau of Child Hygiene, a baby clinic will be held here on Tuesday, January 27, at 10 a. m. at the temple, when sick or undernourished babies may be examined without cost.

Prof. I. V. Truitt, of the University of Maryland, lectured on the oyster. His talk was most instructive and interesting.

Mrs. J. W. Stowell, accompanied by her brother, Mr. J. H. Noble, left in her car last Saturday en route to Florida to visit a sister here. They were accompanied also by Mrs. F. T. Brooks and her brother, Mr. Clyde Wilson, who will visit with a sister at Tampa.

Mrs. Lena Jefferson left Tuesday of this week for Dover, Del., where she expects to spend the remainder of the winter with her daughter, Mrs. R. C. Handy.

Mrs. Orlando McClure has accepted a position with the J. W. Stowell Printing Company here.

Florida, Land of Gold for Them

Helen Baird, widow of Brooklyn, N. Y., struggled for years in feeding her family of three. Now she comes into a fortune of $2,000,000—gold for land purchased by her grand-dad, John Baird, now dead, but 35 years ago a poor Brooklyn policeman. Old John Baird was ashamed to tell the family he had purchased the Florida land. A recent search for title revealed the fact, then the heirs were located. Below, the Baird children.

CLASS PLANS BAKE FOR SATURDAY, FEBRUARY 7

The Willing Workers class of the M. P. Sunday school met at the home of Mrs. M. E. Wilson on Monday evening. A report of the Christmas work showed that many sick ones had been given flowers or fruit, and that some work had been done among the poor.

Plans were laid to hold a bake on Saturday February 7 at 10:30 the place to be announced later. At this time besides the usual cakes and rolls delicious mincemeat and salad will be for sale. It would be well to reserve as early as possible your order for this mince meat, as several orders for it have been placed already. Either Mrs. Boone Beauchamp or Mrs. Clarence Roe will receive orders.

Mrs. Wilson served coffee and dainty sandwiches and after a delightful evening, the class adjourned to meet with Mrs. Flowers in February.

FIELD SERVICE CLUB MET IN MILFORD

The Field Service Club of the Equitable Life Insurance Society, comprising the managerial and agency forces of that company on the Peninsula, held its monthly meeting at the Hotel Windsor Milford, January 16. C. J. Holzmueller of Milford, the president, presided with J. Lester Scotten of Dover as secretary.

There was a large attendance includingf J. B. Warren, Jr. of Wilmington, the agency manager. Addresses on the business outlook for the year were made by practically all of those present, and it was the opinion that conditions are good for a record-breaking showing. The fact that the Equitable wrote more life insurance in Delaware last year than any other company was the keynote of the meeting.

In addition to those named above, those present were: T. C. Collins, Milford; E. A. Simon, Seaford; W. B. Derrickson, Selbyville; C. D. Holzmueller, Milford; W. Harry Lewis, George W. Plummer, and John Price Hyatt, Wilmington; J. M. Barnes, Newark; W. E. Tilghman, Dover; W. B. Parker, Denton; R. H. Morris, Easton, and Ralph Purnell, Salisbury.

Following the meeting the club held a dinner at the hotel. The next meeting, in the middle of February, will be held at Easton, it being the purpose to hold the sessions at different points on the Peninsula.

BOYS, GET BUSY

Several weeks ago an offer was made in these columns to the boys of every section of the United States, offering prizes for the best drawings of "Old Pop" who is showing each week in our comic strip. One boy, Kenneth Fooks, has sent in a drawing and we are waiting for others to try their hands at it. See the papers for the announcements.

ANNOUNCEMENT

Mr. John L. Nichols, of Denton, announces the marriage of his daughter, Miss Pauline, to Mr. J. Elmer Quillen, Tuesday evening, January 6 at 7:3$, by Rev. Nadal Jones, Denton.

Shower for Mr. and Mrs. Butler

The young people of Denton gave Mr. and Mrs. George Butler a kitchen shower on Wednesday evening, January 14. One of the features of the evening was the second marriage of the young couple, Mr. Harry Pickering performing the ceremony. The wedding march was played by Mrs. James on a mouth organ. Delicious refreshments were served.

WEEKLY INDUSTRIAL REVIEW

To obtain results that are worthwhile in a community, to do work that is followed by a constantly increasing return of prosperity and growth to a community to do work that makes it possible for other people to live more contentedly and easier in your home community, is a much more difficult accomplishment than making money, but the object is more worth while.

* * *

Cumberland—Potomac Edison Company places in service new transmission line between this city and Williamsport.

Maryland farmers realized $5,000,000 more on corn, wheat and oat crops in 1924 than preceeding year.

Conowingo—Site to be decided for construction of dam in Susquehanna river near here.

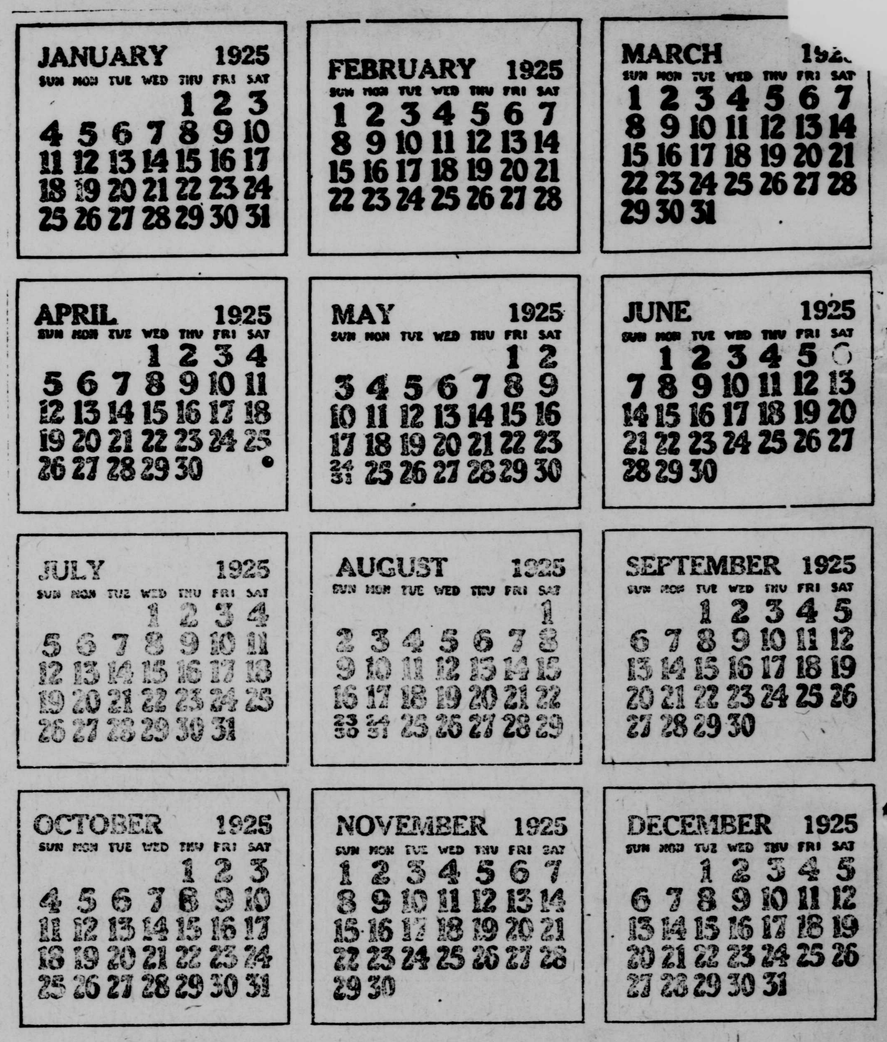
Baltimore—$1,500,000 to be expended for street paving this year.

Westminster—Newark Shoe Company to establish factory here.

Baltimore—Twenty-six two-story buildings to be erected at cost of $75,000.

Taneytown—New fire truck placed in use.

Baltimore—St. James Catholic church to build $50,000 addition to school building.



The 1925 national building program estimated at over five billion dollars.

Federal Court declares Wisconsin minimum wage law inapplicable to adult women, and restrains state from enforcing its provisions.

While cattle generally have responded slowly to general price improvement, hides show a decided gain, with market firm and leather quotations strong. Tanners are in better position than at any time since the war.

National steel output is still gaining and prices are up.

During the years 1921-1923, inclusive, state and local taxes increased nearly 15 per cent. while federal taxes decreased more than 27 per cent.

A democracy will survive on a basis of equality and equal taxation, not by building up special privileges and tax exemptions for a few.

DO YOU WORK UNDER ARTIFICIAL LIGHT

If you do, this message is written especially for you. Artificial lighting is often the cause of those tired, burning, aching eyes.

One cannot always remedy his working conditions, but we can relieve your eyestrain with properly fitted glasses.

Do not delay getting relief for those tired eyes.

Impression

When you invest in printed matter it is with the idea of achieving some end. Naturally you wish to make a favorable impression....Good printing is essential, as you well know....Quite often, however, the inexperienced are imposed upon and send out poorly composed and poorly printed matter which defeats its own ends.

Good printing includes proper selection of type, careful and accurate composition; intelligent selection of papers, and experienced and painstaking printing. We feel qualified to solicit your printing work upon promises of such workmanship. No matter what your job may be, we have the type and experience to give you a high class product. Letter Heads; Envelopes; Bill Heads; Invitations; Announcements; Booklets and Magazine Work. Come in, or phone us if you desire help in layout and planning your next job.

THE HUMAN MACHINE

Your body in normal condition is a perfect machine. As long as each part maintains a proper relation to every other part, and is supplied with abundant nerve power, the result of its activities cannot be other than that of Health. But if there is a mechanical interference with the transmission of power from the brain to the various organs of the body, there is dis-ease in the organs so affected.

THE ART OF CHIROPRACTIC
(Ki-Ro-Prak-Tic)

demonstrates that this interference is due to subluxations (displacement of the bones of the backbone) which compress the nerves and disturb the nerve energy, and by an original and adequate means of adjusting, corrects the cause so the human machine will produce health—not dis-ease.

You want to be well—you want your loved ones to be well. Don't deny yourself the help which Chiropractic offers. Come in and let me explain.
