NEWSY TIDINGS FROM OUR BOYS

The "News" Will Be Glad To Mention Any Items of Interest You May Send About Your Soldier Lad

Mrs. Ida Blyman has received the following interesting letter from one of her boys in France:

I am one of the happiest felows in France and this is the happiest letter I have ever written since I have been over here. Here is where I begin to tell you about it. I have asked lots of different ones what division the 60th Infantry was in and no one knew until about a week oga I asked a lieutenant where it was and he told me it was in the 5th division. Yesterday about 4.30 I walked out on the street and saw a company passing. I asked a fellow what outfit. He told me it was the 61st Infantry. I asked for the 60th and they said it had gone ahead. I did not think I could ever catch them so I strated back to our company. I met a fellow I knew on my way back. I was telling him about it. He told me to get on a truck, I might catch them. I hurried back and got my overcoat, belt and pistol. They were serving supper. I got a little in my hands and forced it down. I did not half eat it and got on my way. I walked, jumped on a truck and ran. I did that several different times until I got up with the Headquarter Co. of the 60th Infantry.

They were in a town and I waited over half hour for them to come in. I got tired of waiting for them so I went looking for them again. I got in a wagon and rode nearly a mile down the road and I saw a bunch of fellows in a field. I went in and asked for the company he is in. They said way down the field, asking as I went. I said he was my brother and he told some fellows to show me where he was. When I got down to where he was I called him and he wanted to know what I wanted. I told him to come and see and you talk about two proud tickled boys, we were two. I stayed with him nearly two hours and would liked to have stayed longer but our outfit is expecting to move anytime stopping to get back. It was eleven o'clock when I got back. I had about fifteen letters from different ones and I gave them to him and he gave me four he had. I am satisfied now that I know he is all right. I have never heard from him. He said he wrote to me when I was at 116th Field Signal Corp. I never got it. All I ever knew was what you told me and by the time a letter got from him to you and from you to me it is nearly two months gone by. I do hope and pray that we will soon meet again.

Yesterday I got myself an overcoat and when I met him he was talking about being chilly so I gave it to him. He did not want to take it but I told him I could get another one. I am not sure I can get one but the Doe boys need them worse than we do. Bill is well and happy. I will close with love, from your happiest boy in France.

What is the difference between an OCULIST and an OPTOMETRIST?

The Oculist treats diseased eyes and fits glasses according to the laws of optics. The Optometrist uses the same means for detecting any disease, but does not treat, but refers to the Oculist or family Physician. The Optometrist fits glasses according to the laws of optics just the same as the Oculist, but with out drugs or drops.

SWIFT & COMPANY U.S.A.

No Mystery in Meat

Some things are so simple that they have to be explained again and again. When things are obvious, people keep looking for mysteries behind them.

So it is with the packing business. The mere *size* of Swift & Company confuses many. Because their imaginations are not geared up to scale, they believe there must be magic in it somewhere—some weird power.

Swift & Company is just like any other manufacturing business run by human beings like yourself; it takes in raw material on the one hand and turns out a finished product on the other.

Swift & Company keeps down the "spread," or the expense absorbed between raw and finished material, to as low a figure as possible. (If it *didn't* it would be put out of business by others who do.)

How much Swift & Company pays for the raw material, and how much it gets for the finished product, depends upon conditions which Swift & Company does not control.

It depends entirely upon how much people want the finished product, and how much raw material there is available to make it from.

The profits of Swift & Company amount to less than one cent per pound on all meats and by-products—less than one-fourth of a cent on beef.
