THE MARYLAND

Agricultural College,

COLLEGE PARK, MD.

MARYLAND'S SCHOOL OF TECHNOLOGY.
SIX COURSES OF INSTRUCTION.
Leading to the Professional Degree of "B. S."
AGRICULTURAL, CIVIL ENGINEERING
MECHANICAL,
HORTICULTURAL, SCIENTIFIC, CHEMICAL.

Trains for a life's work.
Position assured to those who have worked with a will.

Each Department supplied with the most modern and approved apparatus. Practical work emphasized in all departments. Graduates qualified to enter at once upon life's work. Boarding department supplied with all modern improvements: bath room, steam heat and electricity.

New buildings with modern improvements. Location unsurpassed for health. Tuition, books, heat, light, laundry, board, medical attendance, annual deposit, chemical and athletic fees, all included in an annual charge of $200, payable quarterly in advance. Daily visit by physician in charge. Sanatarium for isolation of any patient with contageous disease.

Catalogue giving full particulars sent on application. Attention is called to short course of ten weeks in Agriculture Write for particulars.

TERM COMMENCES THURSDAY, SEPTEMBER 30th. Early application necessary for admittance.

R. W. SILVESTER, PRESIDENT,
College Park, Maryland.

REMOVAL NOTICE!

A. LEVINE

Watchmaker, Jeweler and Optician

Begs to announce to his patrons and the public generally that he will remove this week to the S. F. Smith store room, opposite the Voshell House and one door below Bartleys's big furniture store.

Wishing all a most joyous Christmas season and a happy and prosperous New Year, I am

Respectfully,
A. LEVINE,
Watchmaker, Jeweler and Optician

A Heavy Load to Carry.

Along with dyspepsia comes nervousness and general ill-health. Why? Because a disordered stomach does not permit the food to be properly digested, and its products assimilated by the system. The blood is charged with poisons which come from this disordered digestion, and in turn the nerves are not fed on good, red blood, and we see symptoms of nervousness, sleeplessness and general breakdown. It is not head work, nor over physical exertion that does it, but poor stomach work. With poor, thin blood the body is not protected against the attack of germs of grip, bronchitis and consumption. Fortify the body at once with Dr. Pierce's Golden Medical Discovery—a rare combination of native medicinal roots without a particle of alcohol or dangerous habit-forming drugs,

A little book of extracts, from prominent medical authorities extolling every ingredient contained in Dr. Pierce's Golden Medical Discovery will be mailed *free* to any address on request by postal card or letter. Address Dr. R. V. Pierce, Buffalo, N. Y.

Many years of active practice convinced Dr. Pierce of the value of many native roots as medicinal agents and he went to great expense, both in time and in money, to perfect his own peculiar processes for rendering them both efficient and safe for tonic, alterative and rebuilding agents.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of its ingredients. The publication of the *names of the ingredients* on the wrapper of every bottle sold, gives full assurance of its non-alcoholic character and removes all objection to the use of an unknown or secret remedy. It is not a patent medicine nor a secret one either. This fact puts it *in a class all by itself*, bearing as it does upon every bottle wrapper The Badge of Honesty, in the full list of its ingredients.

The "Golden Medical Discovery" cures, weak stomach, indigestion, or dyspepsia, torpid liver and biliousness, ulceration of stomach and bowles and all catarrhal affections no matter what parts or organs may be affected with it. Dr. Pierce's Pleasant Pellets are the original little liver pills, first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Much imitated but never equaled. Sugar-coated and easy to take as candy. One to three a dose.

QUES'ION?

It's a question with some

WHERE TO BUY CLOTHING.

But if you will compare carefully price and quality you'll soon learn that we are considerably lower on everything we handle, from a 5c pair of stockings to the best grade Suit. A fine line of medium weights left, will be closed low. FALL HATS ready.

Respectfully,

TO SHOW STATE'S PLANTS.

Maryland to Have Horticultural Exhibit at Jamestown.

In the rooms of the Maryland Commission to the Jamestown Exposition in the Fidelity Building yesterday a meeting of the executive committee was held to consider the matter of an appropriation for a horticultural and floricultural exhibit at Jamestown. Those present were Capt. Frederick M. Colston (chairman, Mr. Douglas H. Thomas, Mr. Reuben Foster and Mr. Lynn R. Meekins (secretary). The secretary's desk was decorated with a magnificent cluster of dahlias, taken to the meeting by Mr. Richard Vincent, of White-Marsh, who is the largest grower of dahlias in the world, and who recently captured first honors in New York.

Mr. Charles A Counciiman, member of the Maryland Commission, presented the cause of the horticulturists. He was followed by Messrs. E. P. Cohill, president Maryland State Horticultural Society; W. Irving Walker, vice-president Maryland State Horticultural Society and Pennsylvania Horticultural Society; Thomas B. Symons, secretary Maryland State Horticultural Society; Joseph R. Owens, treasurer Maryland Agricultural College; Richard Vincent, vice-president Maryland State Horticultural Society for Baltimore county; Capt. R. W. Silvester president of the Maryland Agricultural College, and H. J. Patterson, director Maryland Experiment Station.

It was shown that the horticultural interests of Maryland amount to $15,000,000 a year and that they are steadily increasing. For instance, Maryland now produces the finest apples in the world and ships large quantites of them to the West. Western capital is being invested in Maryland orchards. There is an increase in the price of land. All the speakers said that this was the most propitious time to show what great work was being done in the State.

Captian Colston and the other members of the executive committee admitted the importance of the exhibit and promised to do all they could within the limits of their appropriation. Captain Colston explained that as much as $10,000 could not be appropriated without running the risk of a deficit and that, he was sure, the committee would not consent to do. He expressed deep regret that the Legislature had not made the full appropriation of $100,000. It was decided to do all that could be done. The matter will be finally decided at an adjourned meeting, at which Governor Warfield will be present.

Telgerams were received from Senator McCulloh Brown, of Garrett county, and Mr. Orlando Harrison, of Berlin. Mr. Harrison in his message said:

"The horticultural interest of Maryland represnts more than one fourth of our State's crop values. It is doing more to develop resources than all others. I beg of you to be liberal."

A BALTIMORE CHINESE BID.

To Secure Coolie Labor For Construction of Panama Canal.

Washington, Sept. 20.—The Wah Nee Lee Hing Company, of Baltimore, was one of the four bidders at the Isthmain Canal Commission to-day for furnishing 2500 Chinese laborers for work on the Panama canal. The other bidders the American Chinese Contracting Company of Engelwood, N. J.; the International Contracting Company of Washinton, D. C., and Joel Julian Ruben of Washington, D. C.

The bidders were given the right to increase the number at the rate of not to exceed 2000 a month up to a total of 15,000. Under the terms of the invitation the successful bidder is to defray all expenses and to submit his proposition merely on the basis of the hourly wage which the Commission is to pay for services rendered. Proposals were received at varying rates, with varying conditions, so the Commission is not at this time in a position to decide which is most advantageous. One bidder submitted a stright proposition of 10 cents an hour for common laborers for any number of laborers. Others bid different prices, with qualifications, and others bid on a sliding scale—that is, a decreaing price as the number of laborers increases.

The bid of the Baltimore concern was 11 cents an hour, with a sliding-scale prosposition added.

Vessel Abandoned.

The schooner Wm. McKenney, at one time one of the finest and fastest vessels of her class that entered the port of Baltimore, has been abondened. The vessel was built in 1876 for Capt. M. M. Larrimore, of Centreville Landing, and was later purchased by Capt. Daniel Friel, of Queenstown, who used her for carrying grain.

FOR BOTH

One disease of thinness in children is scrofula; in adults, consumption. Both have poor blood; both need more fat. These diseases thrive on leanness. Fat is the best means of overcoming them; cod liver oil makes the best and healthiest fat and

SCOTT'S EMULSION

is the easiest and most effective form of cod liver oil. Here's a natural order of things that shows why Scott's Emulsion is of so much value in all cases of scrofula and consumption. More fat, more weight, more nourishment, that's why.

Women in Australian Politics.

"A Queensland man told me," says Charles Edward Russell in "Soldiers of the Common Good," in Everybody's Magazine for October, "that he doubted if in his part of the country they could have achieved much if it had not been for the women. Every avenue of employment was absolutely in the hands of the entrenched governing classes, and every man that agitated for election reform was not only discharged but blacklisted and boycotted. He found it impossible then to obtain emplyment anywhere; no man dared to hire him.

"George Ryland was blacklisted for five years. They would not let him plow nor chop wood nor drive horses. It looked like a hopeless fight against a power so great and so arbitrary. Often the men were discouraged, but the women, never; they had more pluck than the men. The savage injustice had stirred their utmost resentment; one and all they urged their husbands to keep on and never to yield. In many cases wives assumed the burden of supporting the family. Some turned dressmakers and some cooks. One family that I know lived four years on a weekly income of between $3 and $4 earned with her needle by the wife and mother. The husband tramped Queensland looking in vain for work. With such a spirit among the women the situation could not long continue. A body of voters grew up not of the Labor element but painfully convinced that existing conditions were wrong. These united with the few Labor men that had the franchise, the 'better' element was outvoted and overturned, the suffrage was reformed, the Labor Party swept into possession of the Queensland State government, and holds that government to-day."

Seeding Wheat.

The preparation of the soil for wheat is as important a matter as the selection of the seed, a fine seed being the foundation of success in giving the plants advantage of growth at the start. Not only must the land be plowed deep, the drainage looked after and the seed carefulley drilled in, but the seed bed for the wheat must be carefully prepared before the drill is used. If the seed is drilled in deep, where the soil is fine, the wheat will be less liable to being thrown out in the winter, and where the land is drained there will be fewer plants winter killed.

Land that has been in clover and followed with corn is suitable, for the reason that the thorough cultivation required by corn keeps down the weeds and grass. It is not an easy matter to kill weeds after the wheat is up. If the land is plowed in summer, the weeds allowed to start and a weeder, harrow or cultivator then used, as often as required until the seed is planted, the land will be cleaned.

In drilling the seed, the practice is to apply the fertilizer with the seed, but the broadcast method is also preferred by some, as fertilizer is then more evenly distributed. If stable manure is used it should be well rotted, spread uniformly and then worked into the soil with a harrow. Such preparation mingles the manure with the soil and does much to give the crop uniformity of growth. It should not be overlooked that there are depressions in most fields and water often remains longer on such places than anywhere else, which necessitates drainage, but if this cannot be done, the deep plowing should be practiced, which assists materially in allowing the surplus moisture to pass downward.—Agricultural Epitomist.

Some people look for work with the same enthusiasm that they would look for a needle in a haystack.

A. LEVINE,

THE BEST OF EVERYTHING

For Everybody!

We have the right things for every person, the right price for every purse.
A Beautiful Assortment of Pleasing Gifts, perfectly adapted to the wants and requirements of our friends and patrons.
Everything fresh and sparkling with the brightest new goods of the season.

Washington College,

Chestertown, Md.

One Hundred and Twenty-Fifth Session Begins September 19, 1906.

The college offers four courses of study—Classical, Latin-Scientific, Scientific, each leading to the degree of Bachelor of Arts; and Normal, leading to the Normal diploma which entitles the holder to teach in any county of the State without examination.

Sub-Freshman and Sub-Normal classes are maintained for the benefit of those who desire a thorough preparation.

In the Collegiate Department the elective system enables each student to select the studies suited to his particular needs.

Students are provided with good board and comfortable, well furnished quarters. The buildings are equipped with every modern convenience—steam heat, electric lights, baths. Here students may pursue their studies in a highly moral community amid beautiful and healthful surroundings, under careful supervision of health and habits, at very low rates.

Some of the Best Crops of Wheat

Grown in the State were from

Wilbur W. Hubbard's Standard one Fertilizers

Last year we made for Dr. Isaac Barber, the ex-Congressman and Mr. G. M. Wingard, the machinist of Easton, a lot of fertilizer that contained 1400 lbs. of Dissolved Animal Bone, 400 lbs. of Bone Tankings, 200 lbs. of Muriate of Potash. Total, 2000 lbs. Dr. Barber we have not heard from, but the following is what Mr. Wingard has to say:

Easton, Md., Aug. 1st, 1906.
WILBUR W. HUBBARD, Esq., Chestertown, Md.—Dear Sir—That goods you made for me last fall certainly gave satisfaction. In the spring our wheat looked like other people's. We feared that we would only have half a crop, although as I told you when I got you to make this goods for us, I believed in a good goods and use less per acre and only used 200 lbs. on 100 acres, and threshed a few days ago from 66 acres 27 bushels per acre, from 30 acres 29½ bus.: from four acres 40 bus. per acre, and it was nice wheat, and I therefore believe it paid me better to use 10 tons of that goods than it would 20 tons of a cheap fertilizer, and my clover is splendid and ab a foot high.
Respectfully,
G. M. WING
Machinist, Ea
