WHAT THE KIDNEYS DO.

Their Unceasing Work Keeps Us Strong And Healthy.

All the blood in the body passes through the kidneys once every three minutes. The kidneys filter the blood. They work day and night. When healthy they remove about 500 grains of impure matter daily, when unhealthy some part of this impure matter is left in the blood. This brings on many diseases and symptons—pain in the back, headache, nervousness, hot, dry skin, rheumatism, gout, gravel, disorders of the eyesight and hearing, dizziness, irregular heart, debility, drowsiness, dropsy, deposits in the urine, etc. But if you keep the filters right you will have no trouble with your kidneys.

George H. Gardner, living on Front street, Chestertown, Md., says: "Doan's Kidney Pills have proven very beneficial to me and I heartily recommend them to other sufferers of kidney complaint. For several years I endured a great deal of misery from a distressing aching across my back and had pains through my loins, so severe that it really felt as if a knife were being thrust into my back. Noticing that the secretions were disordered, and deciding to try a kidney remedy, I procured a box of Doan's Kidney Pills at M. A. Toulson's drug store. I began using them as directed, they gave me relief from the first and at last affected a complete cure. I do not hesitate to recommend them as a good medicine for the kidneys."

How To Gain Flesh

Persons have been known to gain a *pound a day* by taking an ounce of *Scott's Emulsion*. It is strange, but it often happens.

Somehow the ounce produces the pound; it seems to start the digestive machinery going properly, so that the patient is able to digest and absorb his ordinary food which he could not do before, and that is the way the gain is made.

A certain amount of flesh is necessary for health; if you have not got it you can get it by taking

POTASH

Lodged Grain Means Lost Profits

The wheat grows up, heads out, and then falls down—so much grain *not* harvested—so much labor lost and capital wasted—just so much more profit you might have had. The trouble was—unbalanced fertilizer, with too little Potash.

Potash makes strong stalks and prevents lodging.

Use a *complete* fertilizer, with at least 6 per cent. of Potash, but if your dealer does not keep it, then add 15 pounds of Muriate of Potash to each 100 pounds of fertilizer.

Send for our pamphlets containing facts about soil, crops, manures and fertilizers. Mailed FREE.
