COUNTY AGENT'S NOTES

During these peculiar times when grain farming here in Kent County returns but a small profit or a loss, I believe every farmer should make a speciality of some feature of his farming operations. Dairying, hogs, poultry, seed wheat and seed corn offer opportunities to specialize. To illustrate the effectiveness of this proposition, I wish to cite the following:

Josiah Massey, Chestertown, Md., received a small quantity of Mammoth Red Seed Wheat from the Maryland Experiment Station a few years ago. Mr. Massey makes a speciality of caring for his seed wheat and corn. This week Mr. Massey just finished selling his entire wheat crop of over 2000 bushels of Mammoth Red Wheat for seed purposes, which brought him about $1,000 more than the market price of his wheat. Mr. Massey's see wheat specialty paid him $1,000 this year. What does your pay?

T. W. Addington is making a specialty of Reid's Yellow Dent Seed Corn. He secured some very good and expensive seed from the Middle West for a starter. The other day, I measured a small plot of corn in one corner of Mr. Addington's garden and measured the corn husked off the same plot. I found the yield to be at the rate of 97 bushels per acre.

Wilbur Morris,Jr., near Melitota, is raising one of the finest Pure Bred Duroc Gilts in Kent County this year. Drop in and ask Wilbur to show her to you.

As County Agent, I secured from the Maryland Experiment Station 1½ bushels of Improved Currell's Prolific Seed Wheat for each of the following Kent County farmers: Wm. S. Collins, Thomas G. Wroth, P. A. M. Brooks, George D. Lofland, Harry Nichols and Lewin U. Skirven. The same quantity of Improved Mammoth Red was secured for M. P. Edwards, R. D. Hoopes, Walter Walbert, Lewin Skirven, Wm. A. Bell and Dr. H. P. Copeland. These will be demonstrations of improved seed wheat.

Metcalfe Bros. cleaned 15,000 bushels of seed wheat for Kent county farmers at their Kennedyville plant. This will materially help with improving wheat crops.

FARM SEEDS
