Governor McKeldin's Disarming Gesture

It would be hard to imagine a commision more aptly chosen than the one which Governor McKeldin has just appointed to "advise" the Tidewater Fisheries Commission. It consists of two highly competent marine biologist, two enlightened and respected oyster planters and packers, a State senator whose interest in bay conservation is well known, and a layman active in various phases of conservation work. The appointment of this commission is a disarming gesture.

Why do we call it "disarming?" Because bay conservation does not need a really first-rate commission of advisers, with its function strictly liited to giving good advice, half as uch as it needs a really first-rate Tidewater Fisheries Commission with full authority to administer bay conservation.

The present Tidewater Fisheries Commission consists of three paid members. A move is a foot to replace this paid three-man commission by an unpaid five-an commission, on the ground that only in this way we can the temptation to load commission with politicians-wanting-a-job be eliminated.

The purpose of the new commission of "advisers" is—and we say it more in sorrow than in anger—no more than a device to take the sting out of the present campaign to substitute an unpaid, nonpolitical fisheries commission for a paid, political fisheries commission.

"Jim Crow" Will Bow Out Friday, June 1

"Jim Crow" on the State's Chesapeake Bay feries will bow out on June 1.

Governor McKeldin assured that last Monday night by putting his signature to a General Assembly Act repealing Maryland's law calling for segregation of races on intrasttae steamboats and rairoads.

Enacted in the early 1900's the act has been enforced only on the state's ferry system in recent years.

Regular efforts had been made to get "Jim Crow" off the books for more than twenty years, but it was not until this year that the perenial repealer gained approval of both houses of the legislature.

A group of the state's Negro leaders stood behind the Governor as he ceremoniously used three pens to sign the repealer.

Local Opposition To Sandy Point Park

If local opposition was successful in keeping out of the state budget a $350,000 appropriation to complete the state park at Sandy Point, Anne Arundel County will lose kick-back revenues of $15,000 a year or more.

The board of directors of the Annapolis and Anne Arundel Chamber.

Mr. Gosch said that the letter opposing the appropriations was requested by Senator Phipps.

John P. Trimer, director of the State Department of Information, estimated the loss to the county to be at least $15,000 a year.

Church Notices

WYE PARISH
Rev. Harvie A. Zuckerman, Rector

April 8, 1951

Do It Electrically
with
INFRARED
Lamps

With infrared lamps you can conveniently direct clean, safe, penetrating heat to the spot where it will do the most good. Here are a few of the many practical applications at home and on the farm.

- Brood baby chicks. Lamps give constant heat and light without fire hazards.
- Brood baby pigs. Save all the pigs farrowed in each litter; keep them warm safely in a corner away from the sow.
- Brood baby lambs. Keep them warm and dry right in their own brooder. No more carrying them to the kitchen.
- Dry stockings, infants' clothes, new glue jobs or freshly painted surfaces.
- Relieve localized pain such as arthritis, sinus pain and aching muscles.
- Start your car or tractor easily. Warm it up by directing a beam of heat to the carburetor or crankcase.
- Keep your hands warm with a "spotlight" of infrared heat when working in a cold milkhouse or workshop.
- Thaw frozen pipes, especially the [illegible] are hard to get at—like elbows.

Infrared lamps can be moved from job to job as the need arises.

For further information about the use of Infrared Lamps write
