Church Notices

Rev. Harvie A. Zuckerman, Rector

January 20, 1952
Second Sunday after Epiphany

11:00 A.M. Morning Prayer and Sermon, Old Wye Church, WyeMills After Service Coffee Hour. All welcome.

7:30 P.M. Evening Prayer and Sermon, St. Luke's Chapel ,Queenstown

Wednesdays at 11:30, in Old Wye Church, Meditation and School of Prayer, followed by Holy Communion at 12.

Old Wye Church and VestryHouse open to visitors by appointment. Rector's address: Wye Mills, Md. ,phone Queenstown 3301.

Fisheries Commission Complete Survey

An annual survey of the condition of representative Maryland oyster bars has been made every fall for a number of years. At that season the surviving spat-fall or set of the year can be determined and changes in population resulting from harvesting operations or varying natural conditions can be avaluated. The results of the earlier surveys have indicated little more than whther the coming harvest might be expected to be good or bad and an evaluation of the season's set and future supply in the form of undersize oysters. The realization of the need for more specific and wide spread observations coupled with an increased availability of trained personnel have made possible in recent years the gathering of data concerning the proportion of oysters by size classifications, the spat fall per bushel of bar material, the presence and abundance of oyster enemies, the prevailing water conditions, and other pertinent information.'

A survey was made this year during the period October 8-23, which included 141 samples from representative areas of the Bay, Choptank River, Tangier Sound and the Potomac River. All samples except those in the Little Choptank and Honga rivers were taken by dredges operated from a large diesel powered scow captained by an experienced dredger.Dredgers were of the reg lar commercial type licensed forBay use and were varied as to bar style (mud dredge, stone dredge, rock dredge, etc.,) in accordance with the best judgment of the persons skilled in the operation of this type of gear. This procedure was designed to produce the best possible catches of oysters from the bars examined. Personnel of the Department of Research and Education, the FAWS laboratory at Annapolis, and of the Department of Tidewater Fisheries cooperated in making the examinations.

The method of sampling usualy consisted of locating the charted bars by means of a sounding pole or suitable land marks. Several dredge samples then were brought on deck from different portions of the bar. A half bushel measure was filed with material from the bar just as it came on deck, with the exception of rocks or stones which were first culled out. Usually one or two shovels of material from each dredge lick were mixed in the sample .Occassionally several such samples were taken from the same bar when it represnted a large area or appeared to be digerent in composition on diffrent portions of its area. It should be emphasized that no attempt was made to determine the total quantity of oysters present on the bar. Only the productive areas of the bar were sampled and in many cases these represented but a small prcentage of the acreage as shown on the charts of the Yates survey.

NOTICE TO CREDITORS

NOTICE is hereby given that the undersigned has obtained from the Orphans' Court for Quen Anne's County letters Testamentary on the personal estate of

CLAYTON T. CANN

late of said county, deceased. All persons having claims against said deceased's estate are hereby warned to exhibit the same, with the proper vouchers thereof, to the undersigned on or before the 14th day of July, 1952, otherwise they may by law be excluded from all benefit of said deceased's personal estate.

All persons indebted to this estate must setle a once .

Given under my hand this 7th day of January, 1952.

LILLIAN SHOCKLEY CANN
Executrix of the estate of
Clayton T. Cann, deceased.

Date: January 7, 1952.

BELL
Sales and Service

Chester, Md. Phone Stevensville 2762

Down the Line with Johnny Bell

In an emergency

When trouble strikes, people turn instinctively to the telephone. It's the "safety-line" that brings aid quickly. That's why a good party-line neighbor always gives up the line to others in emergencies. He knows that his thoughtfulness may mean the difference between life and death. Consideration for others on the line makes service so much better for everyone.

Making short work of a shortage

Like many businesses these days, Western Electric, supply unit of the Bell System, is faced with shortages in many critical materials. To save scarce aluminum, they tried a transparent plastic called polystyrene in the front covers of some telephone central office equipment. It works even better than aluminum because it enables telephone maintenance men to examine the interior without exposing delicate equipment to dust particles. The ability of telephone people to overcome obstacles like this is one big reason why your telephone service is so high in quality, yet low in cost.

January is a good month to —

Go to a basketball game with the kids. . . . Cut fen posts. . . . Begin the year right with a good set o . . . File income tax returns—cheerfully year's records to see where costs can fertilizer and take deliv on it Befor ing. . . . Attend the ersity of Herdsman Short Co . . . Ex ing—read the seed washers. . . . Order sp ery and order repair . . . Build pig brooders
