You'll all say. Well we know,

American Fence!

The development of the American Fence, the years of experiment and hundreds of thousands of dollars that have been put into the work of perfecting machinery and producing the grade of special steel that makes AMERICAN FENCE what it is to-day, is a long story. The makers say:

We have succeeded in producing a composition in steel that is perfectly adapted for fencing making. We have been using this special steel long enough to know that it has increased many fold the value of American Fence to the user and firmly believe it to be as near perfection as can be obtained. Wire drawn from this steel, while hard is not brittle. It is stiff and springy, but pliable enough to be easily spliced. There is such a distinction as live steel and dead steel. Every wire in AMERICAN FENCE as now made is alive all the time, always ready for emergencies and absolutely reliable.

Galvanizing the Best.

We fully realize the great importance attaching to this part of the work, and we spare neither pains nor expense in an honest effort to have our galvanizing the best both as to quality and method of application.

We know beyond possibility of doubt that our galvanizing to-day is immeasureably better than in years past. We are now able to cover the steel more uniformly, make the galvanized coating more elastic, and on the whole furnish the best article in galvanizing that is possible to produce.

Our Stock of AMERICAN FENCE is now full and complete and we are prepared to furnish you with any style and quantity. REMEMBER that American Fence has stays six and twelve inches while on some makes of Field Fence the stays are as much as fourteen inches apart, and yet they cost as much money as American.

You can rest assured that when you get American you get the best.

Catalogue mailed on request.
