WIFE WANTS HUBBY WHIPPED

Magistrate Pohlhaus Wednesday threatened to send Stanley Matthews, twenty-five, 1447 Mount Royal ave. Baltimore, an auto salesman, to the whipping post when Matthews appeared before him on the charge of assaulting and choking his wife.

Mrs. Ernestine Matthews, the wife testified that she and her husband continually quarreled. Matthews, she added, had a "nasty temper."

Last night, she stated, her husband returned home late. He choked her during a quarrel.

"What do you want me to do to him—send him to jail or to the whipping post?" Magistrate Pohlhaus asked her.

"I guess he needs a whipping," Mrs. Matthews replied.

Matthews testified he was forced to attend sales meetings and frequently did not get home until midnight. His wife, he said, caused the quarrels by accusing him of going about with other women.

"I'll dismiss the charge this time," the magistrate said, "but if you ever come before me again on a charge like this I will send you to the whipping post."

The magistrate then sent the couple to see the Prisonars' Aid Society to patch up their troubles.

These parties are Kent countians and well known in Chestertown.

THE NEW FORD CAR

FRAME

The frame of the new Ford car is heavy and strong with three cross members, and is tapered to meet body requirements.

SPRING

The transverse, semi elliptic springs on the new Ford car have been designed and built to give exceptionally easy riding qualities to the car. They are built of the finest spring steel. The leaves are wide and following the most modern practice, are thin, giving the required flexibility so essential to easy riding qualties. These leaves are in varying sizes and built up to give just the proper spring action to each body type in conjunction with hydraulic shock absorbers. This gives the car smooth riding at all speeds and over all kinds of roads, the spring acts independently when the car is driven over paved roads where the surface is smooth, the shock absorbers come into action and takes up the shocks of the rough roads or when ever bumps are incountered.

WHEELS

The new Ford car is equipped with steel spoke wheels, with drip center rims, this equipment includes a spare wheel. These are of Ford design and are noted for their high quality and durability. The steel spokes, one-quarter inch in diameter, are welded to the hub shell and rim. The drop center rim has two advantages. First, it adds strength to the wheel. Secondly, it grealty facilicalates changing of tires. The hub shel, carrying the weight of the wheel, fits over the brake drum, to which it is bolted, and it may be removed as a unit without disturbing the brake adjustment. There are 30 spokes in the wheel, and each spoke is set at a certain angle in relation to the other one, giving it both a bracing and pulling function. In this way the road shocks are distributed equally over all. None of the outer spokes of the wheels cross, which makes it easy to clean.

IT PAYS TO
FERTILIZE A CORN CROP

Did you know, it pays to feed your Corn better than most any other crop, particularly with our regular Corn Fertilizer, that is especially adapted to its growth and maturity.

One of the requisites is to apply a sufficient quantity say: 350 lbs. to the acre, which is the amount used by the most successful Corn growers.

All of the County Agents and agronomists over the Country are now advocating the use of fertilizers on your Corn, as it not only increases the yield from 15 to 20 bushels more than the unfertilized, but also improves the quality, in that one user claims, he has now 50% more merchantable corn, than he used to have, before he commenced using fertilizer.

I know of one man, who bet his Son, it would not pay to use fertilizer, as he never had, they each put in a field, the young man fed his and the old man lost his bet, TRY IT.

For Tomatoes

Use Our Peerless Tomato Fertilizer, this has been on the market for years and many of the most successful Tomato Growers, will use no other.

We had one customer, who grew 19 tons to the acre a few years ago, with our goods and we will be pleased to supply you.
