Stop Mortality From Air Sac Infection!

BICILLIN®-SM

dibenzylethylenediamine dipenicillin G dihydrostreptomycin

Proved features:
- Death losses drop fast. Overnight results in most cases!
- Feed consumption increases almost immediately!
- Over 20 million birds treated successfully to date!

CONTAINS NO OIL

Bicillin-SM contains no oil, thus permits marketing of the bird immediately upon recovery. Acts effectively against a wide range of organisms.

FIGHTS ALL THE INFECTION

Bicillin-SM is the new fast-and-long-acting *double* antibiotic attack on germs involved in air sac infection. Wyeth's new salt of penicillin—BICILLIN—permits slow absorption of penicillin. The prolonged action of Bicillin-SM, consequently, reduces relapses which often follow air sac infection.

EASY TO USE

Just add boiled water (cooled) to the container to make 500 cc. of the solution. Treats up to 1,000 6 week old birds. Inject into the muscles of the thigh. Multiple-dose injection equipment available. Consult your dealer.

AVAILABLE FROM YOUR DEALER THROUGH ATLANTIC SUPPLY CO., BISHOPVILLE, MD. M. & D. SALES CO., INC., SNOW HILL, MD.
