## HOW

HUMAN BODY REACTS TO ABSTINENCE FROM FOOD.—A human being can live without food for a relatively long time without injury to his body. When an organism fasts it merely subsists on the nutriment in its own tissues, Prof. Sergius Morgulis points out in Hygeia Magazine.

It is not uncommon for devotees of certain religious sects to abstain from nourishment for periods up to a month without their health being thereby undermined. In Japan there are temples to which pilgrims retire to pray and to fast for weeks on end, to purify their souls and to regain lost health. Terence McSwiney, the lord mayor of Cork, who starved himself to death a few years ago, made the longest fast on record, Professor Morgulis says. It is not entirely certain, however, whether the fast was complete, since it is not known to what extent his jailers may have resorted to forced feeding. Nevertheless the case illustrates dramatically the power of the human organism to survive lack of nourishment.

At first sight it seems reasonable to suppose that one could survive as long as his reserves held out. Strictly speaking, this is not true, however, because chemical changes take place in the body that cause an intoxication that in turn leads to death. Death from starvation, therefore, is not an exhaustion death, but death from severe intoxication.

"A good many people," said Uncle Eben, "goes aroun' lookin' foh sympathy when what they needs is dyspepshy medicine."—Washington Star.

**Gave Only Foreign News**

The first English news sheet was limited to foreign news. Domestic events were unnoticed.

**Little Frost in Australia**

Nearly one-half of Australia lies within the tropics and frost seldom occurs except in the great deserts of the interior.

Farmal Prices
REDUCED!

We have just received a big piece of power farming news—the McCormick-Deering FARMALL price has been cut $50, and we are at once passing the information on to our customers. The Harvester Company's announcement says:

"We are glad to be able to make a reduction in the FARMALL tractor price at this time because right now the farmer is seriously in need of anything that will help him to cut down his costs of crop production.

"Due to manufacturing economies and anticipated reductions in material costs, we were able to reduce prices on the McCormick-Deering implement lines, effective for the present season.

"Recently, by the same process, we lowered the price on the 10-20 McCormick-Deering tractor $40, and cut the 15-30 tractor price $75.

"Now, to complete our program of reductions, we announce a $50 cut in the price of the FARMALL.

"These price reductions, made during recent months, mean a saving to farmers of millions of dollars.

"As the original all-purpose tractor the McCormick-Deering FARMALL has won tremendous popularity. More than 100,000 FARMALLS have been built. Already this tractor has created a real revolution in farming. It is the best investment a farmer can make.

"The new price, $825 f. o. b. Chicago, is the lowest ever placed on the FARMALL."

You have probably seen the FARMALL Tractor at work. If not we will demonstrate it at any time, on any job. The FARMALL replaces 6 to 10 horses and 2 to 3 men. It plows 7 to 9 acres a day—double disks 18 to 25 acres—drills up to 45 acres—plants 24 to 46 acres—cultivates 33 to 50 acres and, in later cultivatings, 50 to 65 acre. It handles every farm power job, including row-crop operations. Put the best tractor power to work now—at the new FARMALL price!

If it isn't a McCORMICK-DEERING, it isn't a FARMALL

# ONLY 299 WHITE REPUBLICANS IN KENT COUNTY

The result of this year's registration shows that the Republican party of Kent county is composed of 2270 colored and 299 white Republicans. The Democratic party in Kent is composed of 4689 white women and men. This is the reason why we say every Democrat should vote the Democratic ticket from top to bottom. We cannot afford to do otherwise.

Counsel (in divorce case)—I ask that a recess be taken at this point, Your Honor.

Judge—On what grounds

Counsel — My client wishes to change her gown. She hasn't displayed half her costumes yet.

Mistress—But why did you leave your last place?

Cook—'Cos Mr. Groucher used to have such awful rows with his wife.

Mistress — What did they quarrel about?

Cook—The way the meals was cooked.

# SWARTHMORE TOPS SHOREMEN

Swarthmore's Little Quakers finally burst into the victory column Saturday by trouncing Washington College by a 33 to 6 score. Washington gained an early lead by taking advantage of a poor kick by Schembs Garnet, halfback, but Swarthmore unloosed a running and passing attack that netted a touchdown in the middle of the second quarter. Dellmuth kicked goal to give the Garnets a 7 to 6 half-time lead. Washington was out classed in the second half, being unable to solve Swarthmore's short passing-attack.

Schemb's kick in the first period traveled to the Swarthmore 25-yard Plummer carried the ball for two first downs and went over from the one-yard line. Dwyer was hurried on his attempted drop kick.

**Passes Scored In Second**

Swarthmore started a march in the second period from midfield. Atkiss and Sinclair running the ball to the 30-yard line. On the third down Dullmuth rifled a short pass to Atkiss, who had a clear field for the touchdown. Dullmuth's kick was straight and Swarthmore went ahead.

Tommissettis' 25-yard return of Plummer's put and Brown's interception of Robinson's pass paved the way for two scores in the third period, short passes being used to advantage following these plays. Dellmuth scored both touchdowns and was replaced by McCracken after playing a fine game. Late in the final quarter Schembs broke loose for a 54-yard run for a touchdown.

**Toss Intercepted**

McCracken intercepted Johnson's pass on Washington's 19-yard line and then took a pass from Tommassetti for the final score.

The lineup:

Washington — Gainor, le.; Dwyer lf; Binghurst, lg; Sherkey, c; Freeny, rg; Phillips, rt; Gamber, re; Robinson, qb; Dobkiss, lh; Usilton, rh; Plummer, fb.

Score by periods:

|---|---|---|---|---|---|
| Swarthmore | 0 | 7 | 13 | 13 | 33 |
| Washington | 6 | 0 | 0 | 0 | 6 |

# NEW BAG LIMIT FOR HUNTERS

Unless hunters go light on the trigger finger this year, Maryland's supply of water fowl, particularly wild ducks and geese, will be in grave danger of depletion, E. Lee LeCompte, State Game Warden, predicted yesterday.

More than strict observance of the new limit, which prohibits the hunter from bagging more than fifteen ducks and four geese per day, will be necessary to preserve breeding stock of wild fowl for the following year, Mr. LeCompte declared. The old bag limit was twenty-five ducks and eight geese.

The game warden blamed the drought for the reported decrease of wildfowl and said that if the State has more than half its usual share this season it will be only because the birds are attracted by the water of the bay in their migration southward. Ninety percent of the State's wildfowl come from the North where the drought has been especially severe, he explained.

Mr. LeCompte decried the use of automatic and pump guns and urged that hunters inject a little more sport rather than slaughter in their shooting. Recommendations prohibiting use of these types of weapons probably will be made to the advisory board of the United States Bureau of Biological Survey in December, the warden said.

DEMOCRATIC SLOGAN:

One thousand majority, or better in Kent County for Ritchie and the whole Democratic ticket on November Fourth.

**How to Press Flowers to Get Best Results**

Before mounting flowers they should be thoroughly pressed and dried. This may be accomplished by placing them between absorbent paper, such as blotting, covering each layer with another sheet of paper and placing some heavy books on top to press them well. Ironing with a hot iron hastens the drying but spoils the color and is not advised. The blotting paper must be changed every day until the flowers are dry. Flowers may also be preserved for a time by dipping them in candle wax or paraffin. The wax should be melted, not too hot, and the flowers dipped for a moment. The petals are covered with a thin film of wax which is transparent and prevents withering. If properly done the flowers will last about two months, preserving the scent also.

**How Watches Are Jeweled**

If a watch has 23 jewels, then the going band or center wheel and third wheel, the fourth wheel, the escape wheel, the lever and the balance have a hole jewel at each end of each arbor, making 14. The balance, the lever and the escape wheel have end stones as well, which make six more. Then there are three jewels in the escapement, which make 23. If the movement has 21 jewels, then the hole jewels of the going barrel have been omitted. If 19, the end stones of the escapement wheel have been omitted also. If the watch has only seven jewels, they usually consist of the three escapement jewels, two hole jewels, and two end stones for the balance arbor.

**How Forests Petrified**

So-called petrified forests are composed of the trunks and branches of trees which were petrified while buried and later exposed. Many of the petrified trees in the western states remain in their original upright position and rise to heights of 20 or 30 feet. It is believed that the growing trees were covered with volcanic ash and pumice ages ago. Continual rains and nature's chemistry did the rest. The silica-laden water trickled through the volcanic stratum and, particle by particle the minerals replaced the [illegible] matter of the [illegible]—Farmfinder Magazine.

**How Great Cemetery Began**

Hardly had the Lee family left Arlington when the federal troops took possession of the estate. A hospital was established, and when other available cemetery grounds no longer sufficed for the burial of the dead, the spacious grounds of Arlington were, by Quarter Master General Meigs, devoted to the purpose of a military cemetery. The first grave prepared was for a Confederate prisoner who had died in the hospital.
