Strength of parts where occasional strains come. 5. Wearing qualities and protection of driving parts. 6. Reputation of manufacturer, insuring efficient repair service. Satisfied American farmers find these essentials in International manure spreaders.

International spreaders have, besides, many features that grew out of long field experience. Study the steel construction in frame, wheels, and driving mechanism; the easily-removable beater; the differentials in rear axles, insuring even spreading while turning corners; the reversible worm and gear; low, easily-loaded box; and many others.

International spreaders are of all styles and sizes, high and low, endless and reverse apron. Write for illustrated catalogues, and when we send them we will tell you where you may see the spreaders.
