KENT'S SOILS CLASSIFIED

A valuable and welcome work has been begun in Kent county under the direction of the State and Federal Governments. The work is being done by H. B. Winant and John B. Bewley, both University of Maryland men. These men are making a survey of the soils and mapping the areas where each series is found. The work makes possible more definite crop and fertilizer recommendations. The nature of both the surface soils and the subsoils will be recorded. The classification of Kent's soils in the light of mature knowledge and nation wide experience in soil mapping is a forward step that should mean much to farm owners, operators and prospective buyers.

In The Language Of

AMOS 'N' ANDY

ARE YOU

"Regusted" with the "sit-shiation" in regard to the many distress signals you meet and have you reached a point where you want to "check and double check" before you choose a Bank.

A "check and double check" will reveal that you can't go wrong with a deposit in the

KENT COUNTY

SAVINGS BANK

Here is "Our Prop-o-lition". We will give you

4 PER CENT On Your Savings

According to Andy, Amos lacks business experience and "edication". But Amos has money in the bank on which he gets interest and his 'horse sense' philosophy causes him to question every "fool" proposition designed to get his money. He feels secure in the fact that he has his money and he GETS his pleasure from pride of possession.

Mr. Prospective Depositor be like "Amos" and put your money in this bank and let it remain.

Dairy Improvement Association Meets

A very enthusiastic meeting of the Kent Dairy Herd Improvement Association was held Wednesday night at the county agent's Office.

The officers of this up and coming young organization are Walter L. Walbert, President; Olin S. Davis, Vice-President; P. M. Brooks, Secretary-Treasurer; T. Ringfold Jones, S. W. Caldwell, J. I. Rigby, Directors; A. H. Bikle. Tester.

The discussion of the Herd Books reveal some exceptionally good cows also some boarders. The members realize that the record keeping is the only sure way to take the guess out of dairying. It reveals the efficiency of the man in supplying suitable feeds in adequate amounts and gives a definite check on his grain feeding practices. It reveals the cow's ability to respond to care, feed and management. It determines which cows should go to the butcher and which are of economic worth to the farmer. The production record shows which cows calves should be raised for herd replacements. The herd book furnishes a permanent place in which to record pertinent facts relating to pedigrees, breeding and freshening dates—disposal of offspring and, as the years pass, will prove the breeding merit of the sire. The Herd Record Books are therefore prized possession of interested dairymen. They will be treasured through the years as a means of recording and measuring progress in the development of the herd.

It appears that, at least, one bull owned by a member of the Association has been "prooved" by the Record Keeping. Seven daughters that were tested this year show they have inherited production ability. Many interesting, as well as practical, results are revealed. These most valuable lessons are being worked out by County Agent McVean and Mr. Bikle, the tester, and will be summarized in a report for the members. The report, when issued, will be most interesting and valuable to all dairymen.

The members of the Association are to be congratulated on their business acumen. The Kent Association is one of about 1100 scattered throughout the United States. These Associations show the possibilities in dairying. The United States average production in these associations is 60 per cent greater than the average United States cow produces—naturally such cows are far more profitable than "just cows."

The members of the Kent Associa- Scott Rosen, E. Thos. Massey, Samuel W. Caldwell, Wm. T. Anthony, T. Earl Nickerson, John Carvel Sutton, E. R. Pennington, Roger Harris, Walter T. Morris, Jr., Romie Morris, George Carroll, L. A. Sutton, J. Ivan Rigby, Walter T. Bramble, Walter Walbert, Weldon Walbert, Walter Moffett, A. Earle Nicholson, Wm. G. Smyth, M. P. Edwards, T. HOLLYWOOD FAD

The latest in feminine headgear is the new "Gypsy Cap," shown here on the pretty head of Irene Delroy, who has recently gone cinema from Broadway.—(Herbert Photos, N. Y.)

Broke, but Lucky

Most of us know from doleful experience what it means to be "broke." But did we profit by our experience? Often a man gains more wisdom from being "broke" than from years of handling large sums of money.—American Magazine.

Hope

Hope cures more grief than tears or prayers; it leads like a trusty guide through the deepest night.—American Magazine.

FOREIGN BIRD IS BIG PEST

Very often we receive complaints from residents of this State relative to the destruction of birdlife by the starling. The latest information on this subject comes from a resident of Baltimore County who states that the starlings are destroying birds nests on his property by throwing the eggs out also throwing the young birds from the nest at every opportunity. This gentleman has suggested as a remedy to try to interest the boy scouts for the purpose of destroying the starling. There is no law on the Statute books of Maryland protecting the starling and we solicit the co-operation of everyone in killing the starling in any manner possible and at any time. However, we are well aware that we have other species of birds which are much more destructive than the starling, namely: the crow and a number of species of hawks. We consider the crow one of the worst marauders that we have to contend with. They not only destroybirds' nests, kill young birds, catch and kill young rabbits, have been known to kill young chickens, but are one of the worst enemies to our black duck and blue-winged teal which propagate in our marsh by the thousand. The crow destroys every wild duck nest it can find and thousands upon thousands of wil duck eggs are broken and eaten annually by the black devil. Therefore, the Conservation Department would solicit the co-operation of the public in destroying the crow and the sharp-shinned and cooper hawks, in any manner and at any time.

They have received tales of the starling destroying the English sparrow and surely a great many of our residents would feel relieved of the sparrow which they claim to be a nuisance. There is no question but that the starling will attack practically all species of hole-nesting birds that it can master and evict them from their homes which it appropriates for its own use.

Origin of English Cities

Many English cities have sprung from the ham, or homestead, of some Saxon family, around which other houses were gradually built. Thus Birmingham is the home of the Birma family.

Uncle Eben

"De fact dat you hasn't broke no law nor spoke no scandal," said Uncle Eben, "ain' no comfort when de atmosphere of yoh neighborhood jes' natchelly gits filled up wif stray bullets."—Washington Star.

Time Checked by Stars

The Naval observatory at Washington, which furnishes the nation with its time, makes a check every night by observations of the stars.

JOHNSTON FAMILY REUNION

On Sunday, June 1st, the Johnston family held their tenth annual reunion at the home of Mr. and Mrs. S. Warren Johnston on the Sassafras River near Galena, Md. At one o'clock a full course dinner was served while late in the afternoon ice cream and cake was enjoyed by all. Relatives and a few invited guests were present from Brooklyn, N. Y., Philadelphia, Alden, Motron, Chester and Sharon Hill, Pa., Wilmington, Del., Middletown, Townsend, Del., Elkton, Chesapeake City, Cecilton, Sassafras, Golts and Galena, Md.

CAMELS

are made to smoke

FROM THE DAY the choice leaves of sun-mellowed Turkish and Domestic tobaccos are first selected for Camel Cigarettes, every step in their manufacture is headed toward just one goal—the making of a thoroughly enjoyable smoke.

Pleasure, found at its best in Camels, is the only reason for smoking. That's why Camels make no pretense of being anything but a smoke. Camel is a blend of exquisite smoothness, mild and mellow and marvelously fragrant. Have a Camel!

CHEVROLET

IT'S WISE TO CHOOSE A SIX

CHEVROLET'S

New Service Policy

wins nationwide approval

On January 1st of this year, the Chevrolet Motor Company announced a new service policy—the most liberal ever offered in connection with a low-priced automobile.

Immediately it was greeted with enthusiasm by Chevrolet buyers everywhere—because its many unusual features materially add to the economy and lasting satisfaction of Chevrolet ownership. Briefly, it provides—

—for free inspection and adjustment at the 500-mile mark, and free inspections every 1000 miles thereafter.

—for free replacement of any material—*including both parts and labor*—that may prove defective, within the terms of the standard warranty.

—that this replacement will be carried out by any Chevrolet dealer in the United States—regardless of where the owner may have traveled during the warranty period.

Backing this policy is one of the largest service organizations in the automotive industry—consisting of over 10,000 authorized Chevrolet dealer service stations in the United States alone. Come in! Learn all the *other* reasons why it's wise to choose a Chevrolet Six!
