HOW TO GET MEN AND *Please Them*

Mary Alice Bachmann is a popular hostess—and a smart one. Here she tells of some of the little things that help make a girl popular

"Do you want to get your party off to a good start? Hear the room ring with laughter? See friendly handshakes? Then here's an easy way to add fun to your party . . . to score high with the men . . . to 'go over big' as a hostess.

"Men warm quickly to the party if there's plenty of that Mellow Dry Gunther's Ale on hand. But they like to share their enjoyment too.

"Invite them over to your table for a friendly glass. Let them know you can pick a real man's ale . . . that you're 'hep' to what men like! Show them you belong.

"Be one of the gang. Be a good sport. Join in the fun. Because that's the way to get men and please them."

Gunther's Ale *makes Warm Friends*

MODERN T. B. PROGRAM IN MARYLAND

Christmas Seals Enable Tuberculosis Association To Carry On Activities

Christmas Seals enable the Maryland Tuberculosis Association to carry on a modern program against tuberculosis. This program covers free clinics, X-rays, tuberculin testing, medical research, preventorium, rehabilitation and health education.

Tuberculosis is contagious; therefore, it is important to find those who have the disease so they can be cured, and will not infect others. In order to find the disease, the Maryland Tuberculosis Association, in cooperation with the State Department of Health, holds free clinics in every county at least once a month. The examining physicians are tuberculosis specialists. The patients receive X-rays whenever necessary. Students in various counties are given the tuberculin test to see if they are, or have been, infected. Treatment, when necessary, is given throughout the state.

CHRISTMAS SEALS

Help to Protect Your Home from Tuberculosis

The Miracle House at Claiborne is a monument to the prevention of tuberculosis. Here, children in contact with the disease, are built up so they can withstand this contact and grow up with a better chance of being forever free of tuberculosis.

What happens after patients have been cured? Some employers refuse to give them jobs. An educational campaign is carried on to point out to business men that there should be no fear in hiring those cured of tuberculosis, because they have been taught to guard and take care of their health.

Sometimes, extra rest is needed after discharge from the sanatorium. To take care of this need, young girls between 15 and 25 years of age are taken to the Miracle House. This acts as a bridge between sanatorium and work.

Tuberculosis will succumb to education. Lectures, pamphlets, movies, radio programs, newspaper and magazine articles and exhibits spread the news that tuberculosis can be prevented and cured. Through this service tens of thousands of Marylanders learn the truth about tuberculosis.

In Maryland, about three times as many Negroes as white people die every year from tuberculosis. In addition to the above activities, special stress is put toward helping the Negro. Teaching clinics for Negro physicians are held. An Institute for Negro physicians is being sponsored so they may know the latest methods. Every year, an essay contest is held for Negro college students. All of these methods help them to help themselves.

These are a few of the activities of the Maryland Tuberculosis Association. Since 1904, this organization has been protecting your home from tuberculosis. Your home will keep on being protected through Christmas Seals.
