NEW PARALYSIS THEORY

Baltimore Scientist Believes That Uncooked Foods Carry Germ.

Having established the infectious character of poliomyelitis, or Infantile paralysis, the pathological department of Johns Hopkins Hospital is trying to ascertain how the germ is transmitted. It has been definitely ascertained that the seat of infection is in the larger intestine, and that the germ is taken into the system by the mouth, this discovery being credited to Dr. H. T. Burrows.

Transmission of the disease is to be attempted through monkeys. Rabbits have been used in the last two months and the inoculations have been found to develop paralysis symptoms almost identical with those in the human being.

Dr. Hampel has a theory that candy ice cream, fruit and other uncooked foods that children eat, are primarily responsible for bringing the germ into the system. That theory will be fully tested when the physicians have completed their transmission experiments.

Stabbed In The Back

How Many Chestertown Readers Have Had Those Sudden Twinges?

Have you ever had a "crick" in the back?

Does your back ache with a dull, heavy, draggy throb?

Is it hard to straighten up after stooping?

Hard to arise from a chair or turn in bed?

Is the urine dark colored? Passages irregular?

When your kidneys need attention, use a tested kidney remedy.

Use Doan's Kidney Pills—the remedy that has proved its merit.

Convincing testimony in a Chestertown citizen's statement.

Mrs. W. M. Maslin, High St., Chestertown, says: "I suffered from a most painful back. I was caused great pain when I tried to get up out of a chair after sitting down. I surely was in a bad way until I tried Doan's Kidney Pills. I used one box and I haven't been bothered since. Doan's Kidney Pills did me more good than any other medicine I took and I cannot recommend them too highly.

Price 50c at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Maslin had. Foster Milburn Co., Props., Buffalo, N. Y.
