The Hub Store,
Millington, Md.

Established 1877.

AUCTIONEER

THIS IS TO NOTIFY THE PUBLIC THAT AVE REMOVED TO CHESTERTOWN AND AM PREPARED TO CRY SALES IN KENT AND QUEEN ANNES COUNTIES ON REASONABE TERMS.

Shopping Made Easy.

No longer must the married man spend frenzied hours trying to match silks over the counters of the department stores. The government has decided that the sufferings of the silk-matching husband are just too horrible and is planning to alleviate them by standardization. Soon Henry will be able to order E-6785 and carry it home to Jane with the absolute certainty that there will be no come-back. The magic mechanism is the colorimeter, a device which is being perfected by the United States bureau of standards. The vibrations of light—which determine color—will be thrown onto one plane by the colorimeter and split up. Definite color standards so determined will be used in grading crude oil and paints as well as color fabrics. —Milestone.

The Soap Berry Tree.

The jaboncello, or soap berry tree, grows in the humid parts of western Ecuador. It attains a height of 50 feet and has wide-spreading branches and immense quantities of fruit of the size and shape of cherries. The nearby transparent yellowish skin and pulp surrounding the round black seeds are so saponaceous as to be used instead of soap, being equivalent to more than 50 times their weight of that material."

Pain Gives Warning.

The nervous system is our life-saving service and every time a nerve aches or quivers in pain it is a blessing in disguise. The first bit of toothache warns you that disease germs are attacking its structure. An ache in the head is notice that something is wrong somewhere and not always is it in the head itself. Pain is not nature's method of punishment, it is her way of warning. When you feel pain don't merely try to allay it, seek out its real cause and stop that.

Helmet Styles Unchanged.

Helmet styles have not changed in centuries. There is a curious resemblance between the iron pots worn by ancient knights and those employed by the soldiers of America and Europe. Indeed, ancient and medieval armor dating back to the time of the Crusades has been imitated by the twentieth century. Some of the designs found in museums have not even been altered.

Canadian Honored.

At Balaklava, Canada was represented by Lieut. Alexander Dunn of Toronto, an officer of the Light Brigade. He was the first native of Canada to receive the Victoria Cross. At Waterloo Capt. Alexander McNab, the first Canadian to hold a commission in the British regular army, was among the heroic dead of that historic battlefield.

Business and Collections.

Small Gordon is the son of a physician and is fond of being with his father when he types his monthly statements. Meeting him one morning on his way to the mail box with a handful of envelopes, a neighbor called to him: "How is business, Gordon?" To which he replied: "Business is good, but killections is poor."

Suffers in Silence.

The average millionaire knows how unpopular it is to be rich, but he goes right along and endures the painful responsibilities of wealth, suffering the scorn and calumny of a cruel world in silence, and awaits his vindication beyond the grave.—Houston Post.

Her Dire Threat.

Selma, aged three and a half, climbed to her place on her father's knee. He being worried, put her down. She stood looking at him seriously for a moment and then said: "Well, if you don't want no baby I'll just go to war."

Coal Mine Ablaze.

At Brule, near St. Etienne, a coal mine has been on fire for ages and has given the district quite a volcanic aspect. All attempts to extinguish it have been futile. It still blazes and smolders.

Mermaids' Uniforms.

Elizabeth was looking at a fairy book, when she espied some mermaids on a page that big sister had just turned over. She opened her big eyes and said, "Oh, sister, wait a minute. Let me see their beauty uniforms."

Carbide of Calcium.

Sweden and Norway together manufacture more carbide of calcium than any other single nation, but use very little of it, exporting almost the entire production.

Philippines Population.

Government officials recently estimated the population of the Philippines at slightly more than 9,500,000, the Island of Luzon having about one-half the number.

Another Boyhood Ambition.

Our idea of an ideal situation would be to be paid a large salary for serving in a merely advisory capacity.—Ohio State Journal.

Certainly Wrong.

Anybody that is fighting everybody is wrong.

"The Treatment You Finally Take!"
OLD DR. THEEL'S
1719 Spring Garden St. PHIL'A., PA. 1865 50 yrs 1915
I GOT CURED!

PERSONAL AND SOCIAL

Mr. Foster Parker and family, who have been spending the past two months in Massachusetts, are home again.

Mr. Lewis Wood and daughter are spending the week in Baltimore.

Mrs. Linwood Moore, of Marcus Hook, Pa., is the guest of Mr. and Mrs. Wm. H. McKee.

Mr. and Mrs. Edward Robinson are visitinfi relatives near Hillsboro, Md.

Messrs. Edgar Pyle, George Elliott, William Reed and Robbie Robinson, of the proving grounds at Aberdeen, spent Sunday at home.

Mr. William Smith, son of Mrs. Belle Smith, of Chestertown, has been notified by the Curtis Publishing Co., that he has been promoted to membership in the League of Curtis Salesmen because of his long service, reliability and faithfulness in all dealings with his customers.

Miss Doris Paris, of West Virginia, arrived Wednesday and will be assistant millinery trimmer for H. F. Jefferson & Bro.

Mrs. W. W. Hubbard, who is spending the winter in Washington, spent the past week at her home in Chestertown.

Mr. and Mrs. A. L. Richardson, the famous genealogists, of Baltimore, spent the week-end with Mr. and Mrs. W. W. Hubbard.

Mrs. Ira T. Leager, of Ridgely, visited her brother, Mr. and Mrs. J. F. Allen, on Sunday.

Miss Ida Smith, of Salisbury, spent the week-end the guest of her parents, Mr. and Mrs. C. S. Smith.

M. and Mrs. Clarence Newcomb returned home on Monday and were given a reception at the home of the former's mother, Mrs. Alice Newcomb, on Cannon street on Monday evening.

Mr. Earle Dodson, of Wilmington, has been the guest of his sister, Mrs. Samuel Wallis, the past few days.

Mr. Norman Jefferson entertained the Jefferson family at a sumptuous dinner on Sunday.

Mr. and Mrs. Harry Lee are visiting Mr. and Mrs. Lee on Riverside Terrace.

Mr. Walter LeCompte, of near Chestertown, left last week for Baltimore to work.

Mr. and Mrs. Harry F. Jefferson are visiting in Philadelphia.

Mrs. Alfred Crew has been very sick at her home on High street the past few days.

Mr. Oliver Stoops and family have moved to the Wroth house on High street.

Mr. Henry T. Deaver has been appointed discount clerk in the Centreville National Bank.

Sunday's Baltimore Sun contained a photograph of Mrs. Ca[illegible] Earle Withgott, nee Miss Louise [illegible]ane, attired in her wedding gow[illegible]

Origin of Dover's Powder.

"Dover's powder," an old-fashioned remedy still to be found at most druggists', is named after Captain Dover, a worthy of the seventeenth century. Captain Dover's other claim to fame is that he rescued Alexander Selkirk, the castaway of the island of Juan Fernandez, and thus was instrumental in giving "Robinson Crusoe" to the world. Captain Dover practiced medicine in an independent way—chiefly on his own men—and in this way came to concoct the powder which bears his name.

Oak First for Tables.

Oak was the wood first used in tables then walnut came into general use in the middle of the seventeenth century. An early form of table was the chair table, convenient because it served the purpose of a seat when the top was lifted and stood against the side of the room. But gradually the table took its present form and use. It became the custom to leave the board upon the trestle instead of removing both, and in time the piece of furniture was called the table.

Enough for a Party.

Gladys was visiting her aunt. One day, as they were going down town Gladys noticed three rather untidy children playing in front of a house and remarked about it. "There are ten children living in that house and only one mother to care for all of them, so she cannot always keep them as clean as mothers who have only one or two to care for," said her aunt. "Ten?" asked Gladys. "Ten? Why, they can have a party without inviting anyone."

Shrinking From Death.

Is it quite fair to dub a man a coward because he is "afraid to die?" Death, the prospect of it, even when it lies many years ahead, makes many of us quake. What, then, of the death that the air, full of whining bullets, shells, bombs, grenades, holds? "All that a man hath will he give for his life" is very true, and to shrink from death is but human and natural.—London Tit-Bits.

The Heart Is Very Busy.

Your heart is a very busy organ. While you breathe once, it beats four times, says Popular Science Monthly. At each beat it sends four pounds of blood through your veins and arteries. The weight of the circulating blood is 29 pounds. When you run, your legs and the other parts of your body need more blood, so your heart must pump faster.

Aircraft Standardized.

It is less than a score of years since the first heavier-than-air machine successfully carried a passenger into the air. It is less than 15 years since the art of controlling such a craft was imparted by the inventor to another, yet today aircraft have been standardized and factories turn them out with the ease that motorcar builders produce their product.

Clever Youngster.

A little fellow whose father is connected with a railroad has picked up many railroad phrases. One day while waiting with his mother in a large station the youngster rode about on his little cart. Suddenly a man blocked the little rider's way. The latter, lustily shouting "low bridge," passed safely between the man's legs.

Electricity on Submarines.

All submarines are operated by electricity, as obviously they could not be operated by steam, when submerged. In addition to its use for propulsion electricity is utilized on submarines for lighting, for fans, for wireless communications and to cook all meals for the crew.

California's Good Roads.

The state of California has voted $15,000,000 to be spent in perfecting the state highway system and not a single county failed to give the empowering measure a majority.

Improving the Bottle.

As a variation on the nonrefillable bottle a New York man has invented attachments for ordinary bottles that prevent their contents being poured out if they have been refilled.

Takes Pictures at Right Angles.

Of English invention is a camera that looks like a short telescope and takes photographs at right angles to its user's line of vision without the subject's knowledge.

To Be Sure.

Honest to goodness—a familiar phrase. Well, when we meet goodness we should be honest to it.—Louisville Courier-Journal.

Substitute for Pepsin.

Health experts in the Philippines are trying to develop an industry in the dried juice of the papaya for medical use as a substitute for pepsin.

Consider Others.

Look pleasant, even though you are behind your own face and can't see it.

The Difference.

A soldier marks time with his feet, a clock with its hands.

CASTORIA
For Infants and Children
In Use For Over 30 Years
Always bears the Signature of Chas. H. Fletcher

When Your Child Cries

at night and tosses restlessly, you feel worried Mother Gray's Sweet Powders for Children Break up Colds in 24 hours, Relieve Faverishness. Constipation, Teething Disorders, and destroy worms. Used by Mothers for 30 years. All Druggists, 25c. Sample FREE. A. S. Olmsted, Le Roy, N. Y.

TEN REASONS WHY
You Should Have a
PIPELESS CALORIC FURNACE
IN YOUR HOME
Health, Comfort and Convenience.

1—The Caloric conserves health by keeping an even temperature of circulated, moist, warm air throughout the house.

2—Heats from one to eighteen rooms with only one register.

3—Requires only a minimum amount of space. No pipes to obstruct the cellar.

4—Keeps the dust and dirt of fuel and ashes out of the house.

5—Does not heat the cellar, thereby permitting the storage of perishable products in the basement.

6—Maintains the proper fire with very little attention. All drafts regulated from floor above.

ECONOMY.

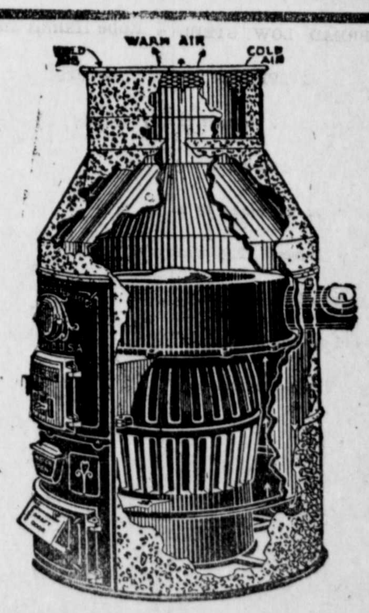
7—Reduces coal bills. No heat is lost through radiation in the basement and walls. Every pound of fuel consumed delivers a maximum amount of heat directly to the rooms.

8—Can be installed in old buildings without the necessity of costly remodeling. Can be placed in new buildings with less trouble and expense than any other type of furnace manufactured.

9—Its low cost places it within the reach of thousands of home owners who have previously been forced to rely upon inadequate stove heating.

GUARANTEE

10—The Caloric Patented Pipeless Furnace is manufactured and guaranteed by The Monitor Stove and Range Company, an organization which has been making and selling heating appliances for 98 years. The Monitor Ironclad written guarantee, that is given with every Caloric Pipeless Furnace, insures satisfaction to the purchaser.



F. B. HARPER,
STILL POND, MARYLAND.

Shake Into Your Shoes

Allen's Foot-Ease, the antiseptic powder for painful, smarting tender, nervous feet. It takes the sting out of corns and bunions. Over 100,000 packages are being used by the American, French and British troops at the front. Sold everywhere, 25c.

FALSE TEETH We pay up to $12 for old or broken sets Send Parcel Post or write for particulars, Domestic Supply Co., Dept. 24, Binghamton, NY

LIGHTNING

DOESN'T WARN US OF ITS COMING
The damage is done before we realize it—Building struck and Live Stock killed.
And then who suffers loss?
Are you taking chances?
At the usual [illegible] we cover Live Stock against LIGHTNING anywhere.
Are you sure your policy reads that way?
