Like a "Gold Frame Around a Mechanical Masterpiece:" the Post-War Maxwell

The artist never puts the gold frame around his painting until the painting is finished, and this is true of the Maxwell car.

For five years the talent of great engineers was devoted to the chassis, and that is now a work of rare mechanical excellence through magnificent Post-War improvements, the "gold frame" has been added.

Perhaps you have seen this Post War Maxwell, and like so many others, have stopped short in your hurry and given it a good looking over. Its simple beauty, its delightful grace, its clean cut, sincere appearance, its daring simplicity you noted, and your respect for Maxwell became more definite.

But you did not know, unless you sat behind the wheel, how easy it drives, what a comfortable castering effect there is at the front axle, how snugly it clings to the road with its heavy rear axle, how decisive and sure is the emergency brake, now located on the transmission shaft!

Unless you have sat behind the wheel of the Post War Maxwell you know but little, for there is a new lure about this car that, once experienced, impresses you beyond words.

There are 300,000 Maxwells before this—all able cars. This is greater in many ways except in price---only $985 f. o. b. Detroit.
