Do Not Buy Until You See Willys Light

WILLYS Light does *more* than bring city comforts *within reach* of country homes. It makes the enjoyment of the conveniences and drudgery-relieving advantages of electricity *practical* and *economical* for everybody now without central station service.

The perfected Willys Light embodies many *exclusive* advantages of vital importance to every prospective purchaser. That is why you are advised to put off buying an individual electric light and power plant until you have the opportunity to see Willys Light.

Superior in power, in quietness, in simplicity and economy of operation and upkeep, Willys Light has met with marked success by reason of its advanced features.

It is driven by an air-cooled Willys-Knight sleeve-valve engine. It is free from carbon trouble. Carbon *increases* the efficiency of this quiet powerful engine, which is used on the finest motor cars. It cuts fuel cost in two by burning kerosene. It has no troublesome pumps, water tanks or radiator. It has greater battery capacity. It produces more current with equal amount of fuel. It is self-cranking, self-running, self-stopping. It is simple to operate and gives continuous daily service with minimum attention.

Those deprived of electric light and power service, can now avail themselves of its benefits through Willys Light, with complete confidence in its fitness to its purpose.

Send for descriptive Willys Light book. Territory still open for live dealers. Write for information.
