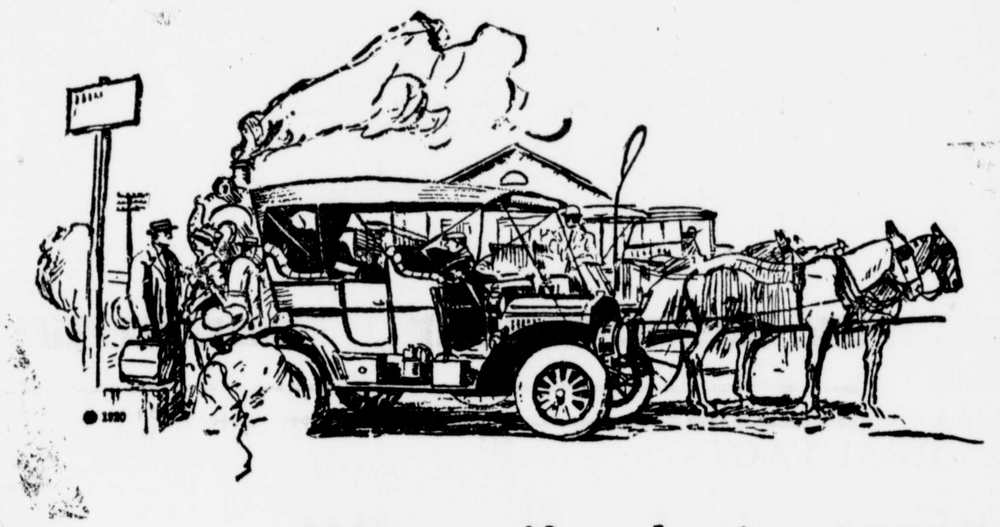
H. F. JEFFERSON & BRO.



When the train came in back in 1910

TEN years ago you might have seen one or two automobiles waiting outside the station, when the weather was pleasant.

Today the square is crowded with them. And most of the cars you generally see there are moderate-price cars.

II

Anybody who tells you that owners of moderate-price cars are not interested in the *quality of their tires* has never met very many of them.

We come in contact with the small car owner every day and we have found that he is *just as much interested* as the big car owner.

III

There is one tire, at least, that *makes no distinction* between small cars and large cars so far as quality is concerned—the U. S. Tire.

Every U. S. Tire is *just like every other* in quality—the *best* its builders know how to build.

Whatever the size of your car, the *service* you get out of U. S. Tires is *the same*. It isn't the car, but the *man who owns the car*, that sets the standard to which U. S. tires are made.

IV

We feel the same way about it. That's why we represent U. S. Tires in this community.

Select your tires according to the roads they have to travel:

In sandy or hilly country, wherever the going is apt to be heavy—The U. S. Nobby.

For ordinary country roads—The U. S. Chain or Usco.

For front wheels—The U. S. Plain.

For best results—*everywhere*—U.S. Royal Cords.
