SENATOR TYDINGS TO ADDRESS DEL-MAR-VA EDITORS

To Hold Two-Day Meeting To Celebrate Twenty-fifth Anniversary

The program committee planning the observance of the twenty-fifth anniversary of the Del-Mar-Va Press Association announced Saturday that U. S. Senator Millard E. Tydings will deliver one of the principal addresses at the banquet to be held in the Hotel DuPont, Saturday night, January 29.

The silver anniversary will be celebrated by a two-day meeting, at which time the Maryland Press Association will join with the Del-Mar-Va newspaper group. A number of reservations already have been received for the convention, which promises to bring to Wilmington the largest group of newspaper men ever convening in the city.

D. A. R. IS BENEFITTING THOUSANDS OF GIRLS AND BOYS

Now in its third year, the youth program of the D. A. R. is benefitting thousands of girls and boys. The 2500 chapters of the Society are reporting to President General, Mrs. William A. Becker, a wide list of activities to befriend youth.

Many chapters have figuratively "adopted" a number of boys and girls and are assisting them in securing an education or in securing a proper start in life. Scores of letters from these "Becker boys and girls" attest their appreciation of the aid given them.

In a message to all State Regents, Mrs. Becker said: "Becker boys and girls have become a very definite interest of the D. A. R. A great many young people have been brought under special attention of the chapters by this worthy program."

"Recent travels abroad have brought home to me the need of reaching youth with the understanding assistance if our Democracy is to be maintained. The need may not always be for money, but the problems of youth are many and a guiding hand wins confidence and leadership. Here is a glorious opportunity for true humanitarian patriotism."

The campaign to increase the number of Becker boys and girls has been enthusiastically taken up by many of the younger members of the D. A. R.

CHRISTMAS SEALS READY FOR DISTRIBUTION

The Christmas Seals are all ready for mailing to the people of the state according to the reports of the chairmen of the various counties of Maryland, and should be delivered shortly after Thanksgiving, the day upon which the sale officially commences.

Henry F. Baker of Baltimore, is general seal sale chairman for the state, and each county, with the exception of a few of the smaller ones, also has its own local chairman. The work of these chairmen has been unusually enthusiastic and their efforts indicate a successful sale for 1937.

The Christmas Seals make possible the fight to prevent tuberculosis in Maryland. They finance such statewide activities as the free chest clinics, the Miracle House, health education, medical research, the purchase of diagnostic equipment, and special work among the colored. The funds that are raised by the sale of these seals in the various counties are spent in the counties in which they were raised with the exception of a small percentage which is used to finance the program of the State Association.

This program has been instrumental in decreasing the tuberculosis death rate in Maryland by almost two-thirds in the last thirty years.

William B. Matthews, managing director of the Maryland Tuberculosis Association, said that many schools throughout the state were participating in the Christmas Seal sale activities. Through an educational unit supplied by the association, many of these schools are celebrating Wednesday, November 24th, as "Thanks for Health Day." The unit is based upon "bell ringing," a subject closely connected with the design of the Christmas Seal.

Mr. Matthews further stated that November 28th will be celebrated in many of the churches of the state as "Christmas Seal Sunday." He said, "It is hoped by the various chairmen in the several counties that the clergy of the respective counties will assist in the observance of Christmas Seal Sunday by calling to the attention of their congregations the work that is being made possible by the seals."

Approximately 27,000,000 Christmas Seals have been prepared for mailing. These will be sent to 150,000 people in the state. "If everyone would buy and use the seals sent to them," Mr. Matthews said, "the Maryland Tuberculosis Association and its affiliated county associations would have sufficient funds to put on an intensive anti-tuberculosis program that would speedily offset the recent slight rise in tuberculosis deaths.

"Last year Montgomery County had the best per capita record and Baltimore County raised the largest total. Chairmen and committees of the other counties are trying to match the records of these two during the 1937 sale," Mr. Matthews concluded.

U. OF D. BOWS TO WASHINGTON COLLEGE 16-13 SATURDAY

One field goal, kicked by Alf Anderson in the third quarter, was the ultimate margin of victory of Washington College over the University of Delaware Saturday in the final game for the Blue Hens. The score was 16-13.

The Blue Hens went out to stop Gibby Young, backfield ace of the Sho' Men. They succeeded in this but overlooked Elton Wilmot, another Washington back, who scored both Washington's touchdowns.

Washington tallied first in the initial period when Wilmot, with the ball on Delaware's 45-yard line, found a hole in the Blue Hen's line. He dodged and straight-armed the secondary and ran the 45 yards for a touchdown. The try for extra point failed. Until this time the defense of both teams had been strong and not a first down had been registered on the ground. During the remainder of the first half Delaware threatened several times but the attack always bogged down when near the goal line.

While Delaware was stopping the speedy Young, the Sho' men were doing the same with Capt. Dick Roberts of the Blue Hens. They were not so successful with Eddie Graham and Howard Viden. Graham proved a constant threat in running back punts and when he broke loose for runs from scrimmage.

The close score made it necessary for plenty of punting and the kicking on both sides was exceptionally poor.

Forward passing was a constant threat to both teams. Passes were made by the teams deep in their own territory. On such pass which Roberts made from punt formation practically on his goal line, came close to giving Delaware a touchdown which would have won the game. It was near the end of the second quarter when Roberts made the pass which Fenton Carey snared and ran 50 yards before being downed. Another pass in this quarter by Roberts deep in his territory almost resulted in disaster as Wilmot intercepted and ran to Delaware's 15 yard line. A holding penalty of 15 yards got the Blue Hens out of this hole.

Delaware came out fighting in the second half and started a passing attack which resulted in a touchdown but not before Washington had added three points on a field goal. A pass from Young to Tully had taken the ball to Delaware's 15 yard line. There the Hens held and Anderson made the placement kick to send the score to 9 to 0. It was shortly after this that Delaware started the drive which brought the Hens their first touchdown.

To Address Press Association

SENATOR MILLARD E. TYDINGS

"Glasgow Arms" Opened At Glasgow Today

The "Glasgow Arms," a modern restaurant at Glasgow, was opened to the public today.

It embodies all the latest and best equipment obtainable. One of the features will be a curb service from the restaurant and soda fountain.

Owned and managed by Mr. Gus Sclavos, he will serve the best foods money can buy. He has built up in Maryland and nearby states at the Elk Restaurant in Elkton an unsurpassed reputation of serving good things to eat. He will continue to manage the Elk Restaurant which he owns, rendering the same efficient service.

Amateur Poster Contest Started

Through the sponsorship of the Art Committee of the Women's Civic League, an amateur poster contest, open to all age groups, was started Monday, in connection with the North American Sports, Garden and Outdoor Life Show to be held in Baltimore next February. One of the purposes of the contest will be to arouse public interest in the cause of conservation.

According to Miss Anne G. Turnbull, chairman of the Art Committee of the Women's Civic League, judges for the contest will be announced in the near future.

A grand prize of $100.00 will be awarded the winner. Sixty-six other prizes, including 6 trophies, 12 books of admission tickets and 48 single admission tickets to the Show, which will be held in the Fifth Regiment Armory, Baltimore, will be awarded to other contestants.

The contest is open to all amateur artists in Maryland, the District of Columbia, Virginia, West Virginia, Pennsylvania and Delaware. Prizes will be awarded in each of the following age groups: Under fourteen years; fourteen to eighteen years; and, over eighteen years.

Additional information concerning the contest, including a set of rules, may be obtained from Show Headquarters, 811 N. Charles street; Women's Civic League, 113 West Mulberry street; Baltimore Museum of Art; Enoch Pratt Free Library and all its branches.

Manufacturer To Color Insecticides Pink

The housewife who carelessly uses lead arsenate or calcium arsenate in cooking instead of flour in the future will have no excuse except that she is color blind, for manufacturers of these insecticides have decided to color them a distinctive pink.

Many cases of accidental food poisoning occur because arsenicals are stored in pantry shelves alongside flour, soda, baking powder, and similar white powdered foods. The arsenicals are likewise white powders, and have no distinctive odor to warn the careless cook.

Calcium arsenate is used widely for spraying and dusting vegetables for pest control, and lead arsenate is used for fruits.

For years the Federal Food and Drug Administration has warned the public of this danger, but reports of food poisoning continue to appear in the papers. Only a few weeks ago several persons working in a mining camp in a western State were seriously stricken after eating flapjacks in which an insecticide was used instead of flour.

Regardless of the precautions of manufacturers, says W. G. Campbell, Chief of the Food and Drug Administration, arsenicals and other dangerour insecticides should be kept out of the reach of children. The garage or shed is the place for insecticides, not the pantry shelf.

ODD FELLOWS PARADE SATURDAY NIGHT

Starting at 7 o'clock Saturday evening, a parade of Odd Fellows and Rebekahs, accompanied by their bands, will start at the Armory and will march down Bow street to High, out High to Moffit, Moffit to Main, Main to North, North to the Armory, where the parade will disband.

MANY CCC BOYS TAKING HIGHER EDUCATION

According to a statement made to Robert Fechner, Director of the Civilian Conservation Work, by Howard W. Oxley, Director of CCC camp education, thirty-nine colleges and universities have granted scholarships to enrollees in those camps for the year 1937-38. Thirteen more such institutions are granting scholarships this fall than last year.

Some 45,000 of the 300,000 CCC enrollees are high school graduates, and some have completed part of their college work, Mr. Oxley states. He said CCC men who have been disappointed in pursuing higher education because of economic circumstances should be given, wherever practicable, an opportunity to continue their training.

Reports to Mr. Oxley from institutions which have granted scholarships to CCC enrollees show that the young men make very good students.

Information, including lists of the colleges and universities which have granted scholarships, may be had by writing the Director of the CCC, Washington, D. C.

Buys Frazer Property On Main Street

Tolson Lyons, who has occupied the store property on East Main Street, owned by the late Robert B. Frazer, for several years, has purchased it from Mrs. Frazer.

Jury Returns Verdict of Accidental Death

The jury summoned by Coroner Dodson in the case of Garland Wilson, a farmer of near Theodore, 10 miles west of here, returned a verdict of accidental death. Mr. Wilson was found dead with a bullet wound in his body. The jury decided he accidentally shot himself.

North East P. T. A.

The regular monthly meeting of the North East Parent Teachers' Association was held in the High School Auditorium Thursday, Nov. 18. This meeting was designated "Fathers' Night." Prizes were awarded as follows: to the father present who had come the greatest distance, Otis McCauley; to the one present, who had the greatest number of children, Sam McDowell; father, who had the oldest child, James Heverin; the youngest child, Edwin B. Fockler.

The main feature of the evening was a forum discussion on the Supreme Court. Members of the panel were Ralph H. Beachley, chairman, James Hughes, Esq., Rev. Irving Insley, Rev. Otis Jefferson, Edwin B. Fockler, and Joseph Grant.

Named Assistant Finance Officer

William D. Leithiser, employed in the finance office of the Veterans' Administration Facility, at Perry Point, has been named assistant to the finance officer at the regional office of the Veterans' Administration at Cleveland, Ohio. He will leave for his new post next week. Following the World War, Mr. Leithiser became editor and part owner of the Havre de Grace Republican in association with the present owners. He went to Perry Point, in 1924.

Pastor at New Charge

The Rev. Dr. S. J. Venable, of Pocomoke City, Md., who recently accepted a call to become pastor of West Nottingham Presbyterian Church, near Colora, occupied his new pulpit for the first time yesterday.

Dr. Venable had been pastor of the Pocomoke City Presbyterian Church for the last five years. Prior to that he served five years as executive secretary of the board of missions of the church at Richmond, Va. He also was pastor of a church at Suffolk, Va., for seven years. He entered the ministry in 1917.

Cost $100.00 To Solicit Business In Elkton Now

The "marriage soliciting racket" got another body blow Friday night when an ordinance was enacted by the town council, forbidding any one from soliciting in any line of business without a license costing $100.

An exception provides that a person paying taxes of $100 or more shall receive a free permit.

Recently boys and other unauthorized persons have been soliciting the business of couples coming here to marry.

The penalty for violators is a fine of not less than $25 or more than $50 or 60 days in jail.

The ordinance follows:

Sets Aside Large Acreage For Sanctuary

Inspired by a popular request, the management of The Susquehanna Power Company has set aside its broad acreage along the Susquehanna River, north of the Conowingo Dam, as a sanctuary for wild life. In carrying out this plan of protection, the Company has posted its property against trespassing with dog, trap or gun. A small herd of deer is said to be on the property at present, and its preservation is one of the chief aims of the Company in the steps which have just been taken.

William P. Titter Awarded Diamond Service Emblem

William P. Titter, an employee in the Elkton office of the Chesapeake and Potomac Telephone Company of Baltimore City, has just been awarded a diamond service emblem in recognition of thirty-five years of service with the company, according to an announcement just made by C. H. Masemore, manager.

During November a total of forty-six service emblems were given to C. & P. Telephone Company employees in Maryland and represented an aggregate of 985 years of service.

Elk Neck Services

Services Sunday, November 28, at Elk Neck Charge will be as follows: Hart's Church School at 9.45 a. m., Epworth League at 7.30, leader, Noble Buchanan. Evening service at 8 p. m. in charge of Mr. R. O. Bailey and a group of young people of North East.

Wesley: Church School at 2 p. m., Preaching at 2.45 p. m. Please note the change of time.

Governor Mails Invitations To Attend Celebration

Gov. Richard C. McMullen mailed formal invitations to each of the governors of the other original states Monday to attend the celebration in Dover on Delaware Day, Dec. 7.

Final plans for the program to be presented then were discussed with the Governor and other state officials by Donald R. Morton, executive secretary of the Delaware Sesqui-Centennial Commission, yesterday in Dover.

Mayor Woodford to Preside

Mayor J. Wallace Woodford of Dover, will preside at the ceremonies at 2.15. A plaque in memory of the signers from Delaware will be unveiled in the legislative hall.

Dr. Elliot Field, pastor of the Dover Presbyterian Church, will have charge of the religious exercises. A feature will be the singing of the Delaware Ode by a selected group of school children from Kent County.

The words of the ode were written by H. H. Hansom of Dover. Delaware composers are competing for the best music for the words. The winner is expected to be announced today or tomorrow.

The plaque was made by Millard F. Davis, Inc., jeweler, of Wilmington, and will be on display at that store before the celebration.

Dinner To Feature Program

The dinner originally scheduled to be held in the legislative hall has been transferred to the People's Congregational Church in Dover because of better facilities. Mrs Herman C. Taylor, head of the Lend a Hand Society of the church, will be in charge.

Governor McMullen will be toastmaster and will call on each of the visiting governors for an address. The commission has not yet announced the principal speaker of the evening.

Announce Engagement

The Rev. and Mrs. Lewis B. Morgan of Middletown have announced the engagement of their daughter Miss Elizabeth Frances Morgan to Mr. E. Clark Fontaine, Jr., of Baltimore.

EMPLOYMENT DROP OF 80,000 JOBS REVEALED

Miss Perkins Reports Decline of 145,000 Jobs In Manufacturing Industries—Says She Doesn't Believe Anyone Can Explain Recession In October

Employment declined 80,000 jobs from mid-September to mid-October in the nation's principal industries, Miss Frances Perkins, Secretary of Labor, reported Monday at Washington.

The Labor Department's survey showed a decrease of 145,000 jobs over the month in the manufacturing industries, but gains of 65,000 in coal mining and retail trade, which partially offset this decline.

Secretary Perkins called attention to the fact that this was the second successive month in which employment in the manufacturing industries fell off, whereas seasonal gains at this time of year ordinarily are made. She pointed out, however, that a comparison of employment in all the industries covered in the survey showed a gain of 600,000 workers over Octobr, 1936.

Unabe To Give Cause

Miss Perkins, in answer to questions at a press conference, said she didn't think anybody could say exactly what caused the employment decline last month, as compared with September. She observed that it should be kept in mind that there was an "abnormally" long period of rising employment before this fall's setback.

Normally, she said, employment increases in a "choppy" manner as a country recovers from a depression, with frequent recessions marking the upward trend. For almost two years up to September, she pointed out, the gain in employment was virtually uninterrupted.

Despite the decline in employment last month, the Labor Department's survey stated, weekly pay rolls increased by $4,200,000 over the September level. This was explained by the fact that Labor Day and the Jewish holidays in September reduced payrolls that month. The October pay rolls, although greater than September's, were smaller by $7,200,000 than those of August.

Industries Cited

The decline in the manufacturing industry, Miss Perkins noted, was caused chiefly by recessions in the blast furnaces, steel works, rolling mills, foundries and machine shops, electrical machinery, cotton goods and women's clothing industries. These industries registered gains during the summer, when declines normally occur, and showed declines last month, when increases generally take place.

Of the eighty-nine industries surveyed by the department, however, emploment gains were reported by thirty-one. The largest were in the automobile and the beet sugar industries, both showing the influence of seasonal conditions.

Dividing the manufacturing industries into those producing durable and those producing non-durable goods, the survey showed that employment in the durable goods group remained unchanged over the month, standing at 97.3 per cent of the 1923-25 average. Employment in the non-durable goods division dropped from 107.3 in September to 103.7 in October.

Thus, it was pointed out, although several of the durable goods industries such as steel mills and machine shops showed decreases, the automobile industry made an employment increase of 80,000, which kept the total employment level in the durable or heavy goods group unchanged from the previous month.

CECIL COUNTY LIBRARY OPENS DECEMBER FIRST

Directors of the Cecil County Library met Tuesday for the first time in its new quarters in the Progressive Club Building on West Main street near Bridge street, Elkton, and inspected the improvements and equipment which have been installed under the direction of Miss Adeline J. Pratt, State Director of Public Libraries.

The Directors voted to open the Library to the public and to commence the free distribution of books on Wednesday, December 1st, at 3.00 o'clock. Thereafter, it is planned to have the Library open on Mondays and Fridays from 3.00 to 5.00 p. m., and on Wednesdays and Saturdays from 7.00 to 9.00 p. m.

All persons desiring to make use of the Library are requested to make application by post card or letter for registration cards and it is especially desired that they state at the same time the title or subject matter of any books which they would like to have supplied.

Delivery of books to every part of Cecil County will be made through the courtesy of Mac's Laundry.

No charges are to be made for use of books for a reasonable time, usually two weeks, with possible renewals, nor is there any charge for delivery.

The Directors particularly desire to be advised of any books, pictures, maps, documents, posters or other interesting historical papers which any person would care to donate or loan to the Library.

Offers of the use of copies of current magazines will be greatly appreciated.

It is hoped that the county will make full use of the facilities now available to us through the Maryland Public Library Advisory Commission.

STATE DEPARTMENT OF HEALTH ALWAYS ON THE JOB

An emergency call was received at the Central Bacteriological Laboratory of the State Department of Health, at midnight, one night last week, from a physician in Southern Maryland, for laboratory aid in diagnosis of a suspected case of pneumonia. Members of the patient's family served as the doctor's messengers and brought a specimen of sputum for examination.

In speaking of the experience, Dr. R. H. Riley, Director of the State Department of Health said that some of the laboratory staff are always on call after the day's work is over, for emergency service. Accordingly, in less than thirty minutes, the tests were under way. The verdict was positive for a certain type of penumonia ,and a few hours later, the serum used in combatting that particular type of the disease was being administered.

Service of this sort is available at the departmental laboratories scattered throughout the State, to physicians practicing in the Counties, at any hour of the night, Dr. Riley said. The laboratories are so situated that they form a network covering the entire State. The Central laboratory is located at the headquarters of the Department in Baltimore City; the laboratory for the Eastern Shore is at Hurlock, and the other branch laboratories are at Cumberland, Hagerstown, Frederick, and Rockville. All are in operation every day in the year, including Sundays and holidays.

During the last four months—from July to the end of October—over 30,000 tests for the presence of disease-producing germs have been made in the six laboratories on specimens submitted by physicians, to aid in the diagonsis of diphtheria, scarlet fever, typhoid, dsyentery, undulant fever, spotted fever, meningitis, penumonia, and other communicable diseases. "These figures," Dr. Riley said, "represent only a part of the work carried on. In addition to the tests made for physicians in private practice, and for State institutions, examinations for the presence of disease-bearing germs in water, milk, oysters and other foods, constitute an important part of the activities of the laboratories.

"Physicians who avail themselves of the service of the Bureau of Bacteriology either take, or send the specimens or other material submitted for examination, to the nearest laboratory. Containers for the specimens, with instructions as to their use, are supplied to the doctors, free of charge. A report of the laboratory findings is sent to the doctor by telephone or mail as soon as the tests are completed. A duplicate copy of the report is sent at the same time to the County Health Officer. Dr. C. A. Perry is Chief of the Bureau.

"There are about 800 physicians practicing in the Counties, and the number who make use of the laboratories has increased steadily, year by year. No charge is made for the examnations. Practicing physicians in Baltimore are served by the laboratories of the Baltimore City Department of Health."
